Foreword

Even though the name BENGAL ENGINEERING COLLEGE, SIBPUR is well known in the field of engineering education, it may perhaps be a news to many, especially to the non-professional, that this academic institute was founded 125 years ago and was established within the premises of Writers' Buildings, Calcutta. Like its name, the contributions of the Sibpurites — the fine products of the College, in the nation-building activities, particularly in free India, are also well known, requiring neither cataloguing nor eulogizing. The College has always been popularly known as Sibpur Engineering College ; and even today its real name is either obscure or not even known to many in this Country.

The College has gone through its ups and downs just as it happens to any renowned institute. But it has withstood the test of time. There exist today many engineering institutes throughout the Country and often B. E. College is equated with them for deficiencies. It is indeed sad. With its built-in and inherent qualities the College will become the leading engineering institute and assume the highest pedestal in engineering education given the proper financial and other supports at the right times.

Let the past and the present students and the teachers of the College, as also the future generation, while celebrating this memorable 125th Anniversary make it a point that all Sibpurites will help in uplifting the living standards of the great mass of the contrymen living in the villages. Such a pledge will, no doubt, make the occasion more meaningful.

It requires lot of effort and co-ordination to make such an important function, spread over a few days, a success. I can say that the present student, staff and ex-students have worked very hard to make it a success. I am sure that this join effort will continue in future to make Sibpore College the brightest star in engineering education.

The Souvenir volume published on the occasion of the 125th Anniversary celebration, I hope, will be received with appreciation by the participants to this memorable event. And to the Sibpurites of the future years this publication will, I take it, serve as a bridge between the present and the future.

R. Law

उप-राष्ट्रपति, भारत
नई दिल्ली
VICE-PRESIDENT
INDIA
NEW DELHI

July 31, 1981.

I am glad to learn that the
Bengal Engineering College, is
celebrating its 125th Anniversary
by the end of this year. I send
my best wishes for the success of
the celebration.

(M. Hidayatullah)

GOVERNOR OF WEST BENGAL

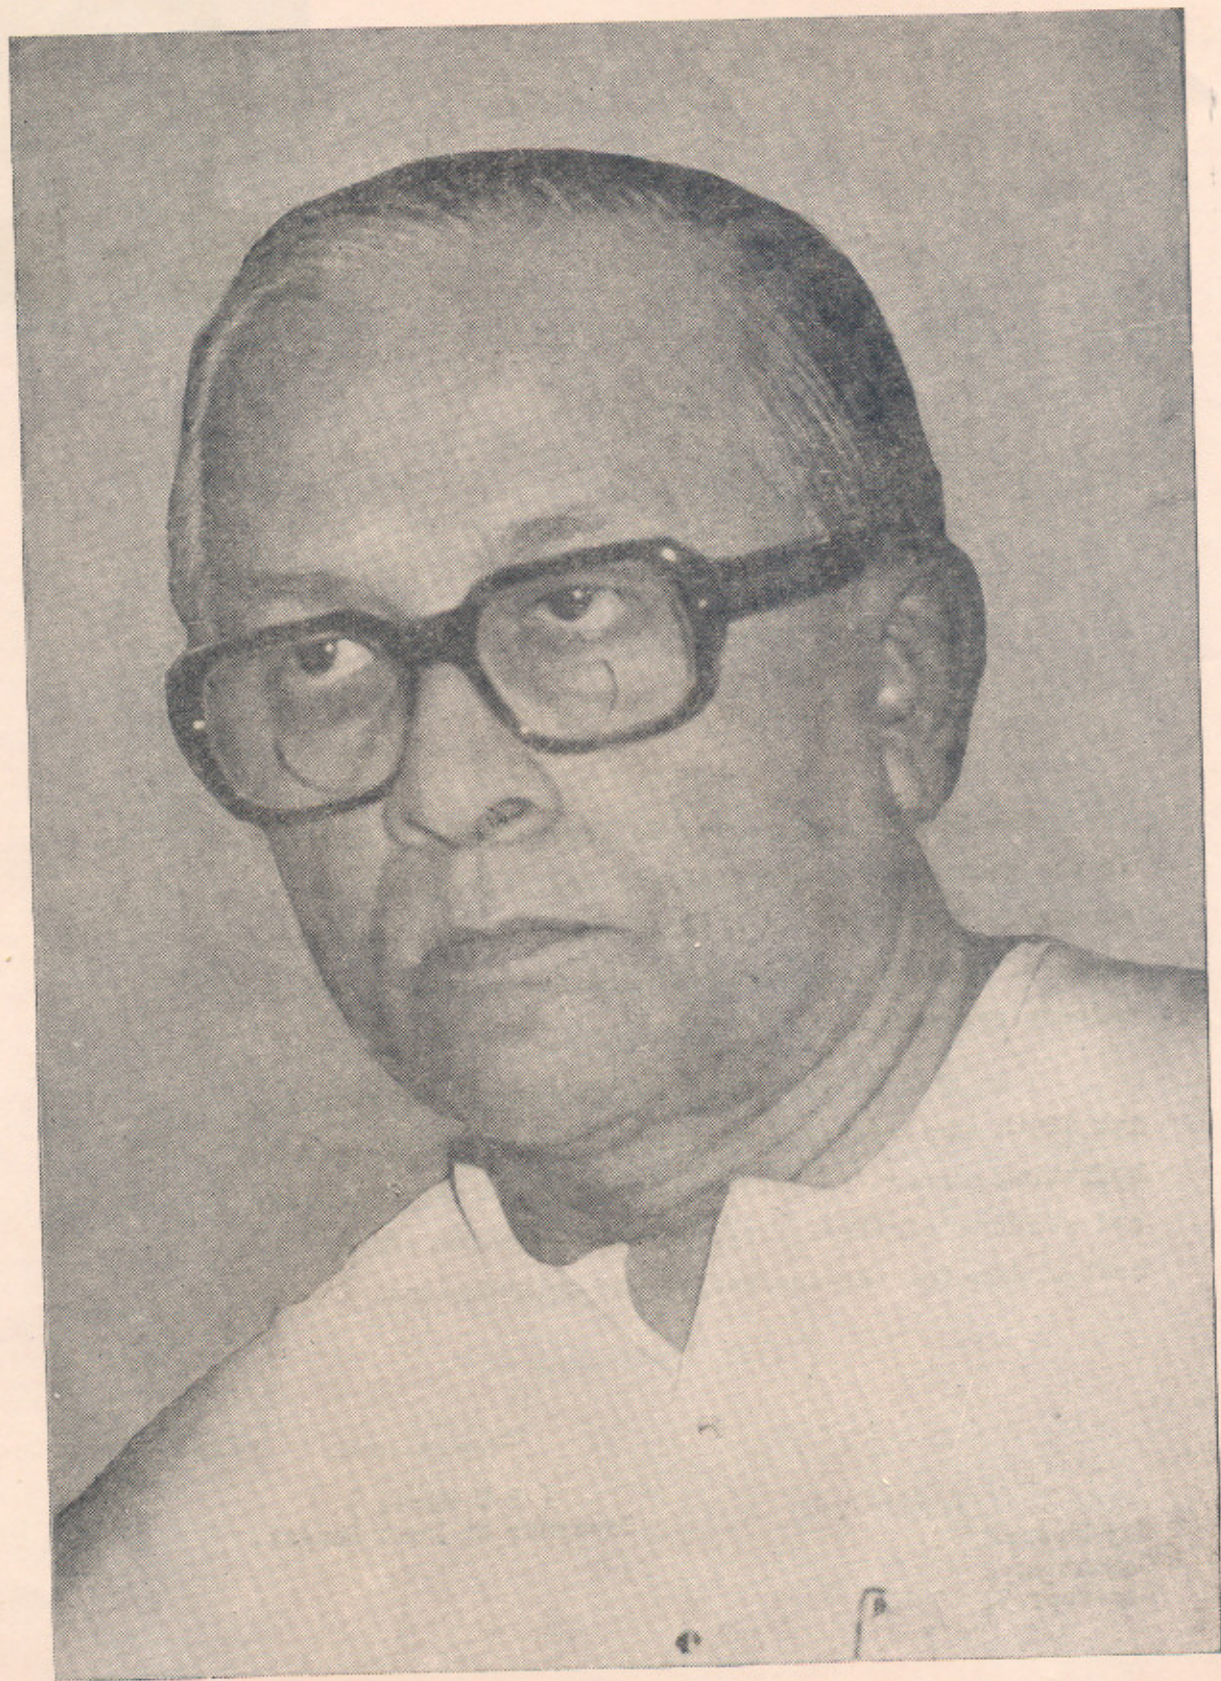

The Bengal Engineering College, Shibpur, Howrah is the second oldest engineering institution of the country. It has played a vital role in promoting the cause of engineering education and has produced many eminent engineers.

I am glad to know that the College is celebrating its 125th anniversary from 5th to 21st December in a befitting manner. I send my greetings to the teachers and students of the College on this occasion and my best wishes for the success of the celebrations.

A handwritten signature in dark ink, appearing to read 'B D Pande'.

(B D Pande)
Governor of West Bengal.

Raj Bhavan,
Calcutta,
December 3, 1981.

CHIEF MINISTER
WEST BENGAL

July 13, 1981.

I am glad to know that the Bengal Engineering College completes its 125 years of existence this year. This institution has made commendable service to the cause of technical education in our country. I am sure that this college will continue to play an important role in the sphere of technological studies.

I extend my greetings to the students, teachers and staff of the college and wish the celebrations all success.

Jyoti Basu
(Jyoti Basu)

The University of Birmingham

Chancellor's Court, P.O. Box 363, Birmingham B 15 2 TT

From the Vice-Chancellor and Principal:
The Lord Hunter of Newington, DL LLD FRCP

5th August, 1981

On behalf of the University of Birmingham I write to offer our warmest congratulations and good wishes to Bengal Engineering College on the occasion of your 125th Anniversary Celebrations.

We salute your past achievements and wish you every success in the future.

Hunter of Newington

Hunter of Newington

UNIVERSITY OF CAMBRIDGE

From The Vice-Chancellor

SIR PETER SWINNERTON-DYER, F.R.S.

THE OLD SCHOOLS
CAMBRIDGE
CB2 1TN

6 AUGUST 1981

I read with great interest your letter of 20 July regarding the forthcoming anniversary of the Bengal Engineering College. The University of Cambridge was closely associated with the development of higher education in India in the nineteenth century, and it is with particular pleasure therefore that I send, on behalf of the Chancellor and members of the University, our warmest felicitations on the auspicious occasion of your anniversary, and our good wishes for your continued success.

Peter Swinnerton-Dyer

University of London, Senate House, Malet Street, WC1E 7HU

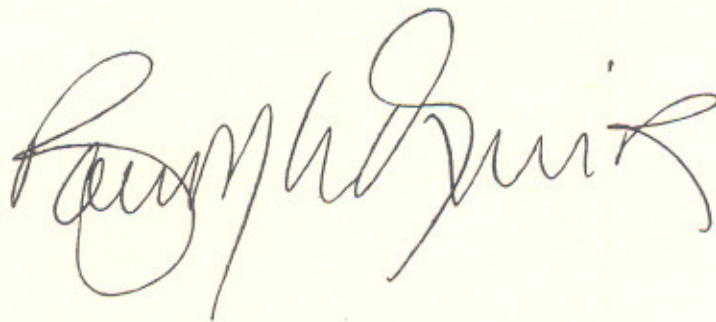

From the Vice-Chancellor

Professor Randolph Quirk CBE FBA

6 November 1981

Thank you for your letter of 20 July 1981 informing the
Chancellor of the University of London of the 125th Anniver-
sary of Bengal Engineering College at the end of this year.

I write on behalf of the University of London to congratulate
Bengal Engineering College on its development since its
inauguration in 1856 and to convey our good wishes for the
future.

UNIVERSITY OF BOMBAY

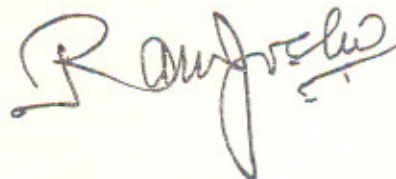

Vice-Chancellor

M E S S A G E

I am very happy to know that the Bengal Engineering College is celebrating its 125th Anniversary Celebrations, and that it proposes to bring out a Souvenir to commemorate the event at the end of this year. On this memorable occasion, I send my greetings and good wishes to all those who are connected with the College.

One hundred and twenty-five years is a fairly long time in the life of a college and one can confidently say that it has stood the test of time which is not measured merely by the clock but by the achievements, which in the case of the Bengal Engineering College are ample. It is the second oldest technical institution in India and has facilities for teaching in seven disciplines in engineering.

The University of Bombay also is currently celebrating the Post-Centennial Silver Jubilee Year and is therefore naturally happy to greet an institution, which has established its reputation as a seat of learning for the last 125 years. I hope and trust that the years ahead will bring to the college added opportunities for greater engineering services not only to West Bengal but to the rest of our country as well.

July 31, 1981

I am happy to know that the Bengal Engineering College, Howrah (West Bengal) will be completing 125 years of its glorious existence at the end of this year. The College had a modest beginning in 1856 initially as a Department of Civil Engineering, which has now grown into a big institution, and has 7 disciplines of engineering and is the second oldest technical institution in India. I am glad to know that this occasion is being celebrated in a befitting manner by holding seminars, lectures, engineering exhibition etc. and that a Souvenir Volume is also to be published. I have no doubt in my mind that this College will grow from strength to strength. I send my warm greetings and good wishes for the success of the celebrations and the Souvenir.

In the field of Engineering Education, the B. E. College has a proud and enviable record. Its alumni have adorned many high positions and have contributed greatly to the developmental activities in the country. Its teachers and students have also maintained high standards of academic attainment and brought name and fame to the institution. The college has pioneered and blazed new trails in several fields of educational endeavour. It is, therefore, fitting that the significant landmark of the 125th anniversary of the college should be celebrated appropriately. I have much pleasure in offering my felicitations to all connected with the work of the college in various spheres and in wishing your celebrations all success. May the college continue to be in the vanguard of technical education and technological progress of the country.

10th August 1981

I am very glad to know that Bengal Engineering College, Howrah, will complete 125 years of its establishment this year, 1981. One of the foremost Institutions in India in the field of Technical Education, Bengal Engineering College has served the nation with its expertise during the last hundred years, and more. On the auspicious occasion of its 125th anniversary, the College will provide an opportunity to its alumni, present students and the new generation to rededicate themselves to the service of the nation.

(P. K. Ghosh)

Dated : August 7, 1981

I am very happy to learn that the Bengal Engineering College, Howrah, will be celebrating its 125th anniversary this year. It is a matter of pride that our two institutions laid the foundation of technological education in this country as far back as the middle of the last century.

On behalf of this University, I would like to send my felicitations for the glorious era of service rendered by your College and express the hope that your alumni will continue to enrich the technological heritage of our country.

Yours sincerely,

Jagdish Narain

R. K. PODDAR, M.Sc., Ph.D
VICE CHANCELLOR

SENATE HOUSE
CALCUTTA - 700 073

2nd December 1981

It gives me much pleasure to learn that the Bengal Engineering College, Howrah, is going to celebrate its 125th anniversary in December, 1981. During these long years of its existence, the Institute has rendered unique service in preparing young engineers, architects and metallurgists. This is the second oldest engineering college in India and its alumni now occupy eminent positions not only in our country but also abroad.

On this historic occasion, I, on behalf of the University of Calcutta, offer the most warm and hearty congratulations and convey a message of goodwill and admiration. I am certain that this college will continue to render dedicated service for the cause of higher education in different branches of Engineering and Technology.

I wish the celebrations all success.

Das, Satya R. Kar Roy, B. Auddy, S. C. Nandi, D. K. Ghosh, S. C. Lahiri, A. K. Majumdar, S. K. Biswas, J. L. Chakraborty, P. K. Roy, Durga Basu, Saroj Kumar Datta, P. N. Banerjee, P. K. Das, R. K. Dutt, Gautam Roy, Indranath Sinha, Parthapratiim Ganguly, Sudipta Mukherjee, Ila Ghosh, Devjani Majumder, Manju Halder.

Sub-Committees

(1) PUBLICATION SUB-COMMITTEE

Chairman — Prof. P. Banerjee
Co-Chairman — Dr. B. P. Banerjee
Convener — Shri D. K. Ghosh
Jt. Conveners — Shri A. K. Bhunia,
 Shri S. N. Hazra,
 Shri Kunal Mitra Mustafi.

Members : Sarvashri A. S. Sarkar, S. K. Sur, S. N. Banerjee, D. Das Gupta, J. N. Kar, S. M. Dev, A. Bose, S. N. Majumdar, Amar Ghosh, N. Das Gupta, Arup Bhattacharya, Sudipta Chakraborty, Subhasis Ghosal, Gautam Biswas, Uday Ghosh, Abhijit Ghosh, Saumitra Chatterjee, Subhamoy Ghosal & Amitabha Ray.

(2) EXHIBITION SUB-COMMITTEE

Chairman — Shri D. Mukherjee
Co-Chairman — Shri Alope Roy
Convener — Shri A. K. Majumdar
Jt. Conveners — Shri Joydeb Sarkar,
 Shri Ramen Ganguli,
 Shri Debabrata Chakraborty.

Members : Sarvashri Sambhu Nath Biswas, S. Das, Achintya Sarkar, H. K. Bose, Amiya Roy, B. Palit, K. Das Gupta, T. Mukherjee, Manas Sanyal, Abhijit Banerjee, Gautam Roy Biswas, Gopinath Chatterjee, Sobhon Majumdar, Abhijit Basu, Snehasis Ghosal, Saumitra Tarafdar.

(3) SEMINAR SUB COMMITTEE

Chairman — Prof. Bijit Ghosh
Co-Chairman — Prof. P. K. Som
Convener — Shri Salil Lahiri
Jt. Conveners — Dr. J. K. Sen,
 Dr. D. N. Roy,
 Shri V. Rabi.

Members : Sarvashri P. Pal, C. R. Mahato, A. M. Ghosh, Santimoy Chakraborty, Sisir Neogy, Rajat Mohan Chatterjee, Sujit Mohan Chatterjee, Biplab Roy, Nilratan Banerjee, Sandip Chatterjee, Gautam Ray, Asoke Majumdar, Kaji Wasim Alam, Shakti-

moy Goswami, Dipankar Mitra, Mausumi Bhattacharya.

(4) REGISTRATION SUB-COMMITTEE

<i>Chairman</i>	— Dr. Madhusudan Maity
<i>Co-Chairman</i>	— Shri J. N. Roy
<i>Convener</i>	— Prof. S.C. Nandi,
<i>Jt. Conveners</i>	— Dr. D. Mukherjee, Shri Tapash Roy, Shri Sudipta Mukherjee.

Members : Sarvashri S. Talapatra, B. C. Chattopadhyay, Jayanta Chakraborty, Kartick Chatterjee, G. K. Ghosh, S. N. Banerjee, S. B. Mallick, Dipak Sen Gupta, Subol Maji, R. K. Bera, Gautam Kumar Ghosh, Rabi Shankar Chanda, Amit Mukherjee, Nachiketa Nandy, Subimal Mukherjee, Debasis Chatterjee, Abhijit Das, Rudra Ray, Subhankar Chakraborty.

(5) CULTURAL PROGRAMME & RE-UNION SUB-COMMITTEE

<i>Chairman</i>	— Shri B. Dev
<i>Co-Chairman</i>	— Shri Biswanath Ghosh
<i>Convener</i>	— Prof. J. L. Chakraborty
<i>Jt. Conveners</i>	— Shri B. Dasgupta, Shri Mihir Ghosh, Shri Rammohan Chatterjee.

Members : Sarvashri S. K. Mukherjee, Gautam Mondal, Bibhash Ranjan Adhikari, Partha Adhikari, Kalyan Brata Dasgupta, Gautam Kar, Gauri Sankar Das, Tapas Mukherjee, Amit Ray, Haraprasad Ghatak, Swarup Bhattacharya, Swarup Mitra.

(6) REFRESHMENT SUB-COMMITTEE

<i>Chairman</i>	— Dr. Keshab Mukherjee
<i>Co-Chairman</i>	— Prof. A. K. Chaudhuri
<i>Convener</i>	— Dr. P. K. Roy
<i>Jt. Conveners</i>	— Shri Jyoti Ranjan Roy Shri Gangadhar Mondal, Shri Gautam Kundu.

Members : Sarvashri S. K. Sinha Roy, Sk. Golam Rabbani, Ashim Bose, Jayanta Das, Saumya Brata Bhattacharya, Dibyendu Sarkar, Sandip Datta Gupta, Sauvanik Ray, Biswarup Saha.

(7) DECORATION SUB-COMMITTEE

<i>Chairman</i>	— Shri K. K. Biswas
<i>Co-Chairman</i>	— Dr. K. K. Banerjee
<i>Convener</i>	— Shri Durga Basu
<i>Jt. Conveners</i>	— Shri C. L. Chakraborty, Shri D. Mallik, Shri Barun Biswas, Shri Rajat Ray.

Members : Sarvashri P. K. Sinha Roy, S. Bhattacharjee, Md. Rafique, Anjan Mitra, Aloke Bhair, Debmalya Banerjee, Saumya Dasgupta, Arunava Dasgupta, Jaydev Ghosh, Anirban Das, Gautam Mukherjee.

(8) TRANSPORT & ACCOMMODATION SUB-COMMITTEE

<i>Chairman</i>	— Dr. S. R. Pramanick
<i>Co-Chairman</i>	— Prof. B. P. Sen
<i>Convener</i>	— Shri S. K. Dutta
<i>Jt. Conveners</i>	— Shri U. K. Ghosh, Shri Prithwiraj Ghosh.

Members : Sarvashri R. K. Ghosh, K. C. Mukherjee, Shrish Chandra Ghosh, Subrata Kar, Dilip Datta, Saumitra Maity, Martuz Ali, Subrata Chowdhuri, Debasis Banerjee, Subrata Mukherjee, Asis Sen Anup Bhattacharya.

(9) STUDENTS' PROGRAMME SUB-COMMITTEE

<i>Chairman</i>	— Shri Kalyan De
<i>Co-Chairman</i>	— Dr. P. P. Das
<i>Convener</i>	— Shri P. N. Banerjee
<i>Jt. Conveners</i>	— Shri Manoj Mitra, Shri Deb Kusum Datta, Shri Nilanjan Sengupta.

Members : Sarvashri H. S. Ghosh, Jayanta Pradhan, Sitangshu Sekhar Ghosh, A. K. Dhara, Madhushree Sen, Biman Banerjee, Amit Mukherjee, Saumen Chaudhuri, Nabarun Chaudhuri, Arunava Ray, Sangeeta Chatterjee, Sandip Seth, Debanjan Ray.

(10) VOLUNTER & MEDICAL AID SUB-COMMITTEE

Chairman — Shri Subir Das Gupta
Co-Chairman — Shri S. R. Kar Roy
Convener — Dr. P. K. Das
Jt. Conveners — Dr. A. K. Das Gupta,
 Shri P. K. Nandi,
 Shri Subir Kumar Datta,
 Shri Swarajit Ray.

Members : Sarvashri P. K. Gayen, Satyabrata Bhattacharjee, N. R. Chakraborty, C. Mitra, P. Jana, S. K. Srimani, Sudha Kanti Ghosh, Sambhu Nath Basu, J. M. Sinha, N. Bera, Gopal Dey, Pradip Das, Mrinal Kundu, Amitava Seal, Kalipada Das, Saumitra Sanyal, Manojit Banerjee, Amitava Kamal Sen.

(11) SPORTS & GAMES SUB-COMMITTEE

Chairman — Shri R. D. Baul
Co-Chairman — Shri B. Auddy
Convener — Dr. R. K. Dutta
Jt. Conveners — Shri Sankar Bose,
 Shri Nikhilesh Bhaduri,
 Shri Nilanjan Ray.

Members : Sarvashri Achintya Roy, D. C. Sarkar, N. K. Das Gupta, Manoranjan Das, D. K. Chowdhury, A. K. Das Gupta, Debasis Tafadar, B. Hari, Dipannita Mukherjee, Karabi Bhattacharya, Bhibas Chandra Ghosh, Asis Chaudhury.

(12) PUBLICITY SUB-COMMITTEE

Chairman — Dr. Gokul Mukherjee
Co-Chairman — Shri N. D. Sanyal
Convener — Dr. S. K. Biswas
Jt. Conveners — Shri S. K. Ghosh,
 Shri Archan Kusum Majumdar.

Members : Sarvashri Barun Patra, Bijit Datta, Chandan Banerjee, Arup Guha Neogi, Partha Biswas, Sanjit Samaddar.

(13) FINANCE SUB-COMMITTEE

Chairman — Shri H. D. Ganguly
Co-Chairman — Dr. S. P. Brahma
Treasurer — Shri T. K. Chakraborti
Convener — Dr. A. Das Gupta
Jt. Conveners — Shri Indrajit Datta.

Members : Sarvashri H. S. Varma, S. P. Bhattar, A. Poddar, M. B. Ghosh, Prasanta Banerjee, Samresh Chakraborty, Tushar Kanti Ghorui, Premansu Sanyal, Partha Munshi, Suchibrata Mitra, Samir, Datta, Sarit Banik Chaudhury, Kalyan Chakraborty, Goutam Banerjee, Debasis Banerjee.

(14) LADIES PROGRAMME

Chairman — Smt. Ila Ghosh
Co-Chairman — Smt. Debjani Majumdar
Convener — Smt. Manju Haldar
Jt. Conveners — Smt. Manidipa Mukherjee,
 Smt. Aditi Gupta,
 Smt. Champakali Ghosh.

Members : Smt. Sumita Banerjee (Ganguli), Smt. Bandana Basu, Smt. Debjani Bhattacharyya, Smt. Maitrayee Thakur, Smt. Sipra Bit, Smt. Jaya Chatterjee, Smt. Sanjukta Banerjee, Smt. Nidrita Mitra.

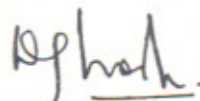

Proem

B. E. College. The Alma Mater. Indeed, the bounteous mother as the Latin term means. Even the name itself provokes sweet sentiment, invokes pleasant memories, revokes age and/or status differences amongst the past and present students alike. It is a day of all days, an occasion of all occasions that the beloved College, rambling gloriously across the span of time, is entering into the 125th year on the 24th November, 1981. Surely, it calls for celebration. The gala function organized by the present and past students of the College to commemorate the QUIN-SILVER JUBILEE, cannot but be more commendable.

The present SOUVENIR volume released as a part and parcel of the eventful programme has been compiled to provide a glimpse of the College through a century and a quarter—a flash-back of some of the events and some of the personalities attached or associated with this higher centre of technological learning—a chronicle of the past and the present; an articulation of (family) traditions in profession—a documentation for the current generation and for the posterity as well—to be treasured and preserved as a memoir of the Alma Mater.

The Publication Sub-Committee have endeavoured to bring out the Souvenir as close to its objectives as possible from whatever scant, moth-eaten and dusty records that are available and also from personal knowledge. Presumably some errors and omissions may have inadvertently found their ways in the publication notwithstanding the editorial care and caution, for which the Sub-Committee seeks pardon of the readers in anticipation.

The toils and tears and the pressure and agonies endured by the members of the Sub-Committee, particularly the Task Forces and the present students, in planning, layout, execution and especially in collecting advertisements cannot be portrayed in this proem in black and white, but surely the devotion and determination can be greatfully acknowledged. The spontaneous support and patronage extended by the alumni of the College at every aspect involved in bringing out an exacting publication of the present kind can neither be extolled in wordy epithets; if at all can be attributed to camaraderie for the common cause. Even if, in this regards, space constraint prevents the presentation of a fuller list of all the other dedicated colleagues, the names of Shri Haridas Nandy (1944) and Shri Amitabha Ray (M. E. student) needs especially be mentioned for the invaluable advice and help extended by them in fulfilling the given assignment. It will also be an unpardonable lapse if simultaneously the graceful support of the different firms, organizations and well-wishers who have released advertisements for this Souvenir are not acknowledged and put on record.

D. K. GHOSH,
Convener
Publication Sub-Committee.

PROF. A. K. SEAL
Principal

BENGAL ENGINEERING COLLEGE

On this happy occasion of the 125th Anniversary of our College, I feel privileged and at the same time overwhelmed to get an opportunity to express my feelings towards my alma mater.

As an alumnus, who has been associated with the College for more than 30 years—as a student, as a member of the faculty and, for the last two and half years, as the Principal—I look back with a feeling of pride, joy and affection for this age-old institution. In spite of many ups and downs, this College has stood the test of time and it is an occasion when its past records may be studied with a view to planning for its future development.

Celebrations are not always restricted to rejoicing and the programme for the 125th Anniversary Celebration will include technical seminars, lectures, panel discussions and a fortnight-long Engineering-cum-Industrial Exhibition on one hand and students' programmes comprising inter-collegiate cultural functions and sports and games on the other.

Let us all pledge to create an environment for the healthy growth of this institution—an environment that will help us in the preservation of our rich heritage and will release the creative energy so vital for the realisation of our ideals. I sincerely wish and pray that this great Institution will continue its march of progress in conformity with the glory that has been symbolic of the Bengal Engineering College.

Seal

History of the College

THE IDEA

THE beginning of the history of the Bengal Engineering College coincides with the initiation of technical education in India. Though the importance of scientific and technical education in the development of India was recognised by the then educationists and the administrators, but very little efforts were made in this direction before the forties of the last century. Their efforts were accentuated because of the need for trained personnel for development works, such as, excavation of canals, building of railroads etc. Serious thought, was given by the British administration to the idea that training our youths would obviously reduce the costs by not having to invite technical personnel from abroad. This idea was put to practice by creating a Civil Engineering class in the Hindu College in the year 1843-44, but the post of the Professor remained vacant due to non-availability of a suitable person.

In July, 1847, the Council of Education was asked by Government to report on two schemes, one formulated by the Government of Bombay for the establishment of a Subordinate Branch of Engineers and the other by the Military Board "to restrict the employment of persons in the Department of Public Works to those of the Military class (and therefore to Europeans)." After considering the report of the Council, the then Governor-

General Lord Dalhousie recorded on the 29th August, 1848, a minute recommending to the Court of Directors of the East India Company, the establishment of an Engineering class at each of the Presidencies.

In March, 1854, the Council of Education submitted another proposal for the establishment of a College of Engineering as a separate Department of the proposed Presidency College which was to replace the Hindu College on the 15th June, 1855. In May, 1854, Lieut Col. H. Goodwyn, Chief Engineer of Bengal, advocated the constitution of a College of Engineering "for the general improvement of the Department of Public Works." This was followed by another recommendation for the immediate establishment of a Training School "as a nucleus and preliminary adjunct to the College." Government of Bengal concurred with the Chief Engineer and forwarded the proposals to the Government of India, who, after considering all the schemes, submitted their recommendations to the Court of Directors. The Court of Directors in their Despatch No. 47 of 2nd May, 1854, approved the proposal for the establishment of a separate Engineering College. This paved the way to the creation of a Government College of Engineering at Calcutta.

Under instruction from the Government of Bengal, the Chief Engineer prepared a scheme for the establish-

BISHOP'S COLLEGE FROM AN OLD PAINTING

ment of a College of Civil Engineering and its necessary Companion Training School and submitted the same to the Secretary to the Government of Bengal, General Department, under his letter No. 2175, dated the 16th October, 1854. While submitting this scheme the Chief Engineer stated that one of the objects of the proposed College and the practical Training School would be "to meet the very great demand in the Department of Public Works of Bengal and the Lower Provinces; generally, for Executive Engineers scientifically educated and practically versed in the methods of applying the science and art of Europe to the architectural and building requirements of India with Indian means." It was also stated that Assistant Executive Engineers and Surveyors, Assistant Engineers, Overseers, Draughtsmen, Artificers, Agents etc., could be trained with advantage in the proposed College. The salient features of the scheme were that the College would consist of two departments—the Senior and the Junior, and the Training School would be formed into three classes. There was also a provision in the scheme for the training of commissioned as well as non-commissioned officers and soldiers. The estimated cost of running the College and the Training School was shown to be Rs. 12,550/- per month.

The then Lieut. Governor of Bengal, Mr. F. I. Halliday, appended on the 25th November, 1854, a minute to the scheme submitted by the Chief Engineer and the same was forwarded to the Government of India on the 4th December, 1854 (Letter No. 84, dated the 4th December, 1854). The complete design of the proposed institution together with an estimate amounting to Rs. 5,80,850-12-5 for a total floor-space of 2,41,468 s.ft. at Rs. 2-6-11 per s.ft., for buildings was also forwarded to the Government of India.

Though the proposed Engineering College was intended to be established at Calcutta, Government of Bengal, however, thought that it would be a better idea, and perhaps more advantageous from the point of view of training, to locate the College at Raneegunge owing to its healthy climate and proximity to the mineral belt. The Chief Engineer was asked on the 24th March, 1855, to examine and report on the location of the proposed College. He replied on the 17th April, 1855, saying that the College should be constituted at or near Calcutta as it was the intention to utilise the Professors of Chemistry and Geology of the Presidency College for teaching these subjects at the Engineering College. Besides, no separate medical arrangement in the form of a Dispensary and a Hospital would be necessary if the College was situated at Calcutta.

The detailed scheme together with the estimates were duly forwarded to the Court of Directors, and their

sanction was received with some modifications in the original plans submitted by the Chief Engineer in Despatch No. 18 of 19th September, 1855. The final approval of the Government of India to the constitution and establishment of a Civil Engineering College at Calcutta was received on the 12th February, 1856.

INCEPTION

At last, the long cherished day came on the 1st October, 1856, when premises No. 9, 10, 11 of Writers' Building and later on Premises No. 1, on the 1st November, 1856, was occupied and Lieut. E. C. E. Williams was appointed as Principal on a staff salary of Rs. 600/- p.m. Sanction to spend a sum of Rs. 1,500/- in the first instance for purchasing furniture, etc. for the College was also given.

Sanction to the entertainment of the Establishment at a cost of Rs. 242/- per month was received from Government in their letter, dated the 31st October, 1856.

Sanction to the entertainment of the Instructive Staff of the College including the Principal at an expenditure not exceeding Rs. 2,100/- per mensem was communicated by the Government of India while conveying their decision to open the College. On the strength of that sanction, Government of Bengal in their letter No. 1255, dated the 22nd October, 1856, sanctioned the following staff:—

	Salary per mensem
(i) Principal ..	Rs. 600/- plus free house.
(ii) Professor of Civil Engineering & Architecture. ..	Rs. 700/-.
(iii) Professor of Mathematics. ..	Rs. 380/- including Rs. 80/- as Presidency House-rent allowance.
(iv) Professor of Surveying. ..	Rs. 380/- including Rs. 80/- as Presidency House-rent allowance.

The Principal was asked to select the Professors and report their names to Government for issue of appointment letters.

The Principal selected Capt. W. S. Sherwill of the Engineers as Professor of Surveying and Mr. Mohendro Lall Shome, a distinguished graduate of the Presidency College, as Professor of Mathematics since no Englishman with the requisite qualification was readily available, and reported their names to Government for approval. Government were, however, reluctant to approve of the appointment of Mr. Mohendro Lall Shome but agreed to appoint

him purely in an acting capacity so long as a suitable Englishman was not available. Paragraph 3 of Government letter No. 1335, dated the 13th November, 1856, received by the D.P.I. in this connection makes interesting reading and is reproduced below :

"3. With regard to the nomination of Baboo Mohendro Lall Shome to officiate as Professor of Mathematics on the full salary assigned to the officer, I am desired to state that Lieut. Governor objects on principle to give to a Native of this country a salary which is considered sufficient to attract an English candidate ; but in this instance His Honor will permit it as a strictly temporary arrangement in the understanding that it must not become a precedent."

As no suitable candidate was available to fill up the Professorship in Civil Engineering and Architecture, the post was left vacant. Appointment letters were issued to the two candidates selected by the Principal on the 22nd November, 1856.

As regards syllabus, the Principal tentatively decided to give instructions in the following subjects :—

Mathematics	Landscape drawing
Civil Engineering	Mechanical drawing
Architecture	Architectural drawing
Surveying	Topographical drawing
Geodesy	Perspective drawing
Astronomy	Geometrical Projection
Natural Philosophy	Mapping including Projections of the sphere
Mineralogy and Geology	Physical Geography
Chemistry and Botany	Photography

It was arranged that the students of the Engineering College would be allowed to attend lectures in Botany and Chemistry at the Presidency College.

After joining his office as Principal, Lieut. Williams issued on the 25th September, 1856, the following notification inviting applications for admission to the Civil Engineering College :—

"Notification

Government College of Civil Engineering at the
Presidency Nos. 9, 10, 11 Writers' Buildings

1. The Civil Engineering College at the Presidency will be opened on or about the 1st November next.

2. The object is to educate youths under 22 years of age both theoretically and practically as Civil Engi-

neers, for the higher grades of the Department of Public Works.

3. Candidates will be required to produce certificates of good moral character and of sound constitution.

They may be either Europeans, East Indians, or Natives and will have to undergo an examination previous to entering the College.

4. On joining the College, an entrance fee of Rs. 10/- and a monthly fee of Rs. 5/- will be demanded from each student.

5. A detailed prospectus will be published shortly ; in the meantime, candidates are requested to apply in person to the Principal of the College at the office of the Director of Public Instruction No. 88 South Colingate Street between the hours of 11 A.M. and 3 P.M. on Wednesdays and Saturdays.

6. The period for admission to the first session will be extended beyond the 1st November, two months, or to the 31st December next, in consequence of the short notice now given of the opening of the College."

The detailed prospectus referred to in paragraph 5 of the above notification was published on the 17th November, 1856, in the form of a draft prospectus, as some of the points had not yet been decided by Government, and is reproduced below :

"Draft Prospectus

Civil Engineering College at the Presidency

1. The Civil Engineering College at the Presidency is intended to educate as Civil Engineers European, East Indian and Native Youths under 22 years of age at the time of entering.

2. Every candidate will be required to produce a certificate of good moral character, which should have reference more particularly to his conduct during the two years immediately preceding his presentation for admission, and be given under the hand of his present instructor or employer.

3. A medical certificate is not required, except the candidate purposes, when qualified, to seek Government employ, such certificate, when furnished, should

have reference to the goodness of eye-sight and soundness of constitution of the candidate to undergo the fatigues of active employment as an Engineer or Surveyor.

4. Forms of application for admission and of certificates will be supplied on application to the Principal.

5. A candidate's application being found satisfactory he will be required to undergo an examination previous to being received.

6. For admission to the first session the preliminary examination will embrace the subjects comprised in the first year's course of Government Colleges for 1856-57; but for the second and following sessions it will include those comprised in the second year's course known as the "Senior Scholarship Standard".

7. There will ordinarily be but one session in each year; but the first year will be divided into two Terms so that the second batch of successful candidates will be admitted on the 1st June next after examination during the month of May.

8. The long vacation will commence about the 15th April of each year and cease on the 31st May. The short vacation will include the Doorga Pooja Holidays.

9. Examinations will be held periodically and prizes awarded.

10. The duration of the College Course will generally extend over 2 years, but under existing circumstances, students will be entitled to a certificate in Engineering on passing a successful examination in the

subjects laid down in para No. 62 of Public Works Notification No. 117 of the 17th June, 1856.

11. It is to be clearly understood that the fact of passing a successful final examination at the C. E. College or of obtaining a College certificate constitutes no claim for employ in any of the Public Departments under Government.

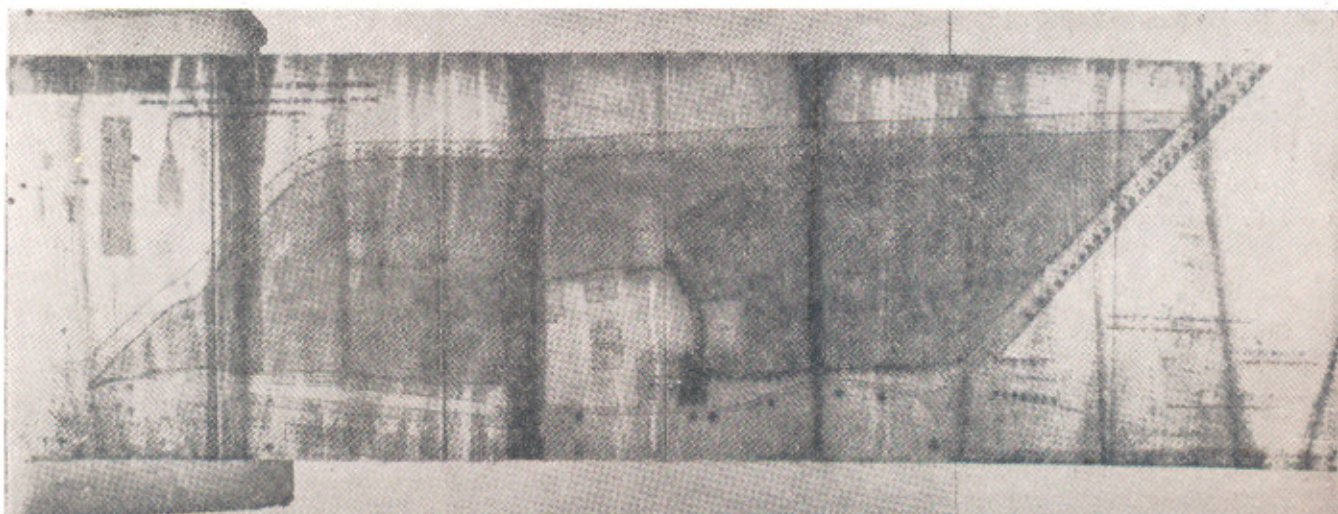

12. On joining the College, an entrance fee of Rs. 10/- and a monthly fee of Rs. 5/- will be demanded from each student; but students of other Government Colleges exempt from similar fees will also be exempt in the C. E. College.

13. A candidate having already paid an entrance fee in any Government College will only have to pay the difference (if any) between that fee and Rs. 10/-, the entrance fee to the C. E. College, provided he will be a student at some Government College.

14. Holders of Government scholarships will be permitted to retain them in the C. E. College for the same time as they would have been entitled to keep them, had they remained at their original colleges, subject to the same conditions as regards progress in their studies. They are exempt from fees only so long as they retain their scholarships.

The foregoing is yet incomplete and subject to modification."

On the 19th November, 1856, a notice for holding an admission test on the 20th November at 10 A.M. was circulated by the Principal. It was mentioned in the notice that similar tests would be repeated at intervals up to the 31st December, 1856, when admission

PLAN OF B. E. COLLEGE CAMPUS 1880 FROM AN OLD DRAWING

to the first session would cease. The Principal further notified that successful candidates would be received into the College on and after Monday the 24th November. The first test was duly held at Writers' Buildings on Thursday, the 20th November, 1856, at 10 A.M.

All preliminary arrangements for opening the College having been completed, Government of Bengal communicated their sanction to the opening of the College in the following letter :—

"No. 1358

To The Principal of the Civil Engineering College

General Education :

Sir,

I am directed to acknowledge the receipt of your docket No. 44, dated the 15th instant and in reply to state that, pending the issue of orders on the points referred by you for the decision of Government, the Lieutenant Governor sanctions the opening of the Civil Engineering College for the admission of all persons who may pass the prescribed examination for the purpose.

I have etc.,

Fort William

The 20th November, 1856.

Sd/- C. T. Buckland,

*Junior Secretary to the
Government of Bengal."*

THE FOUNDATION DAY

The Civil Engineering College, Calcutta, was opened on the 24th November, 1856, with 10 students and an Instructive Staff of two, namely, the Principal and Mr. Mohendro Lall Shome, the officiating Professor of Mathematics. Thus began another chapter of advancement in scientific and technical education. The foundation of a great institution for the Engineers of India was laid.

CIVIL ENGINEERING COLLEGE CALCUTTA, (1856-1864)

Capt. W. S. Sherwill, an officer of the Engineers, joined on the 1st December, 1856, as Professor of Surveying. On that date the number of students rose to 21. By April, 1857, the number went up to 31.

The question whether a guarantee of public employ in the Public Works Department should be given to the graduates of the Colleges had been under the consideration of Government of some time. Government of Bengal decided to give such a guarantee, and in their letter No. 1416, dated the 4th December, 1856, communicated this decision to the Government of India. The following

appointments were guaranteed to the most distinguished students :—

5 appointments the engineer branch	in	2 to Europeans 3 to Indians	Salary beginning from Rs. 100/- to 200/- per mensem.
13 appointments in the upper subordinate branch.		5 to Europeans 8 to Indians	Salary beginning with Rs. 60/- per mensem.
30 appointment in the lower subordinates branch.		30 to Indians	Salary beginning with Rs. 25/- or 40/- per ing to qualifica- mensem accord- tion.

With the establishment of the Calcutta University on January 24, 1857, a revolutionary change took place in the advancement of education in all its branches. The Faculty of Civil Engineering was formed simultaneously with eight members, and General Low, the Commander-in-Chief, was elected its first President at the meeting held on the 8th April, 1857. The Civil Engineering College was affiliated to the University by a Resolution passed on the 2nd May, 1857. Lieut. Williams, Principal of the College, was elected a member of the Faculty of Civil Engineering on the 12th December. On the 30th of July next year, he became a member of the Syndicate to represent the Faculty.

Years rolled by. By March 1859 the student strength rose up to 66, number of professors remaining the same. This cost a lot of strain to the members of the teaching staff and the College lost efficiency in proportion.

It was in 1860, when, as per recommendation of the then Principal the original regulation was amended and a three years theoretical with two years practical training course for the degree Licentiate in Civil Engineering in addition to that for the M.C.E. degree was introduced.

The affection of the Principal, Lt. Williams can be adjudged from the fact that even on his way to Europe he forwarded from Aden, a memorandum on staff shortage which resulted in the appointment of Lt. H. D. Gordon as Professor of Constructive Design and Mr. C. Grant as Drawing Master.

At that time Capt. G. Chesney, Asst. Principal of Thomason College, Roorkee was officiating as Principal till the appointment of Major W. E. Warrand as Principal in 1861.

Capt. A. E. Perkins relieved Lt. Gordon as professor of Constructive Design in the same year. Capt. Sherwill left at the end of 1861. Mr. Rukstuhl, a young German Engineer, joined in 1862 temporarily as Lecturer in Sur-

PRESIDENCY
COLLEGE
FROM 1855-1874

veying. After the transfer of Major Warrant, Major J. C. Medley joined as the Officiating Principal in 1862 and left in January, 1863. Lt. G. S. Hills, who had earlier joined the College as Asst. Principal next officiated as Principal for a few months. Mr. T. Martin took over from Lt. Hills sometime in June, 1863, and acted as the Principal till November, 1864. The teaching staff was further strengthened in 1861 by the inclusion of Mr. Khetter Nath Bhattacharjee and Mr. Tarak Nath Dutta as Master of Surveying and Engineering and Master of Mathematics respectively.

It will be noteworthy that Mr. Khettar Nath Bhattacharjee was the first Indian professor in technical subjects of the College.

The first batch of students appeared in the theoretical part of the L.C.E. Degree Examination in 1861. Six of them came out successful, four being placed in the First Division and two in the Second Division. Mr. Dinno Nath Sen stood first and won a Gold Medal. He distinguished himself as an Engineer and was well known all over Bengal. The names of the successful candidates of the first L.C.E. Examination held in 1861 are given below :

First Division :

Dinno Nath Sen
Mothora Nath Chatterjee
Omesh Chunder Ghose
H. M. Adams

Second Division :

Jadub Chunder Dey
Boycunto Nath Dey

In August, 1862, Government of India invited the views of the Government of Bengal as to the expediency of uniting the Civil Engineering College with the Presidency College. Unfortunately, the Government of Bengal did not lay any stress on the maintenance of the College as a separate institution and, on the contrary, agreed to accept the suggestion. The proposition was then referred to the Secretary of State for India, and his approval was received in Despatch No. 23 dated the 7th November 1864.

This unfortunate decision impeded the progress of engineering as a major branch of studies for at least fifteen years that followed.

The administrative control was assumed by the Principal of the Presidency College in the same month, and the process of amalgamation was completed in the month of April, 1865. Thus ended, though temporarily, the separate existence of the Civil Engineering College that was brought into being as a full-fledged institution through the untiring efforts of Lieut. Williams, the first Principal of the College, despite the interruptions caused by that "Sepoy Mutiny of 1857".

AS AN ADJUNCT OF THE PRESIDENCY COLLEGE (1865-1879)

This is a rather uneventful chapter in the history of the Engineering College which lost its independent existence as a separate institution in November, 1864, when the administrative control of the Engineering College passed on to the Principal of the Presidency College, Mr. J. Sutcliffe and it became a part of that College. The idea

at first was to maintain the engineering classes in a separate building to be hired as near the Presidency College as possible. As a measure of economy, however, this idea was dropped, and eventually the classes were transferred to the Presidency College building in April, 1865. At the time of transfer there were 32 regular and 23 out-students.

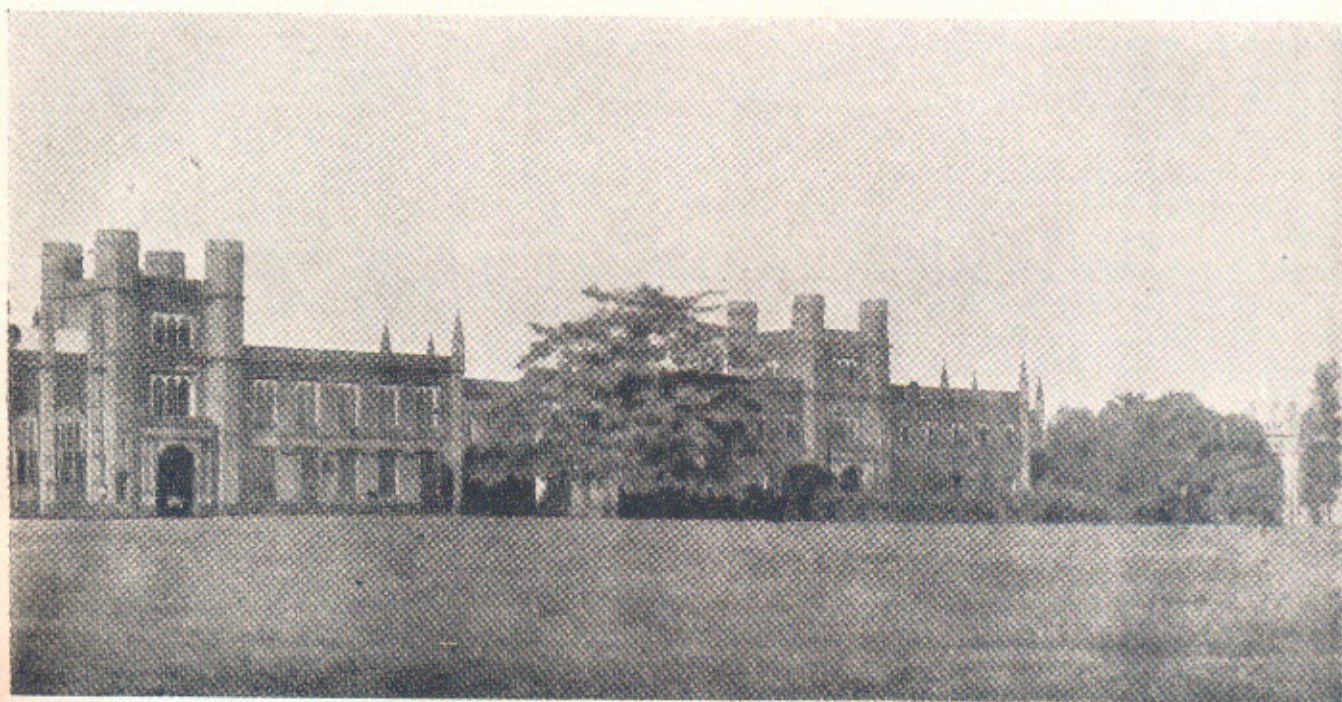

The Presidency College was duly affiliated on July 15, 1865 to the Calcutta University in respect of the Civil Engineering Department.

After the amalgamation, the Civil Engineering Department of the Presidency College started with the four Instructive Staff. There was no increase in the sanctioned strength, as far as could be gathered, till 1869, when the staff was strengthened by the appointment of two Assistant Professors in view of the rush of students. Shri Ananda Mohan Basu, the distinguished educationist, and the first Indian Ranglur, was a Professor of the Engineering Department for a short period in 1870.

The Presidency College building was not commodious enough for accommodating the classes of the Engineering Department, and the result was over-crowding. This told upon both the Departments—Engineering and General. In 1872 the Hare School moved to a new building, and the rooms vacated by the School were occupied by the Civil Engineering Department.

J. S. Sutcliff, Principal 1865-1876

BISHOP'S COLLEGE 1880

S. F. Downing, First Principal,
Government Engineering College
1880-1891

The first Degree examination of Bachelor in Civil Engineering (B.C.E.) was held in 1864. Two candidates Satkari Chattopadhyaya and Ambika Charan Chaudhuri came out successful.

The end of the gloomy period of the College seemed near when in 1878 the Government of Bengal appointed a Committee to consider the question of the establishment of a Practical Training Institution for Engineers at Calcutta in connection with the Workshops of the Public Works Department. The Committee was further asked to report whether it would not be desirable to remove the Civil Engineering Department from the Presidency College to the neighbourhood of the proposed Training Institution to enable the two to work together as one institution for imparting an integrated technical education and training for engineers. The Committee recommended that both theoretical and practical training should be imparted to Civil and Mechanical Engineers and also the subordinate staff of the Public Works Department. They further recommended removal of the Engineering Department from the Presidency College, as this arrangement was not conducive to the promotion of engineering.

DREAM COMES TRUE (1880-1887)

Tiny stems were sprouting out from the seeds sown in 1856 and on them were inscribed the letters "Government Engineering College, Howrah". The mighty Ganges flowing unceasingly witnessed the humble beginning of

the college on her bank. It bore the testimony of transformation of a wilderness of high grass, creeping shrubs and stagnant pools of the Bishop's College of Sibpur into a site of pleasant green and eye-catching Gothic buildings below the vast expanse of the blue sky.

The premises of the Bishop's College at Sibpur near which the Public Works Department Workshops and Manufactories were recently constructed were acquired under the Land Acquisition Act (Act X of 1870) by a Declaration dated the 29th March, 1880. The price was settled by negotiation with the owner, the Society for the Propagation of the Gospel, and fixed at Rs. 300,000/-—Rupees two Lakhs for the buildings and Rupees one Lakh for the land measuring approximately 120 bighas. Possession of the premises was taken on the 16th February, 1880, and a deed of sale was extended on the 16th August of the same year. On the 5th April, 1880, the Engineering Department moved to the new site which the College occupies to this day, and was redesignated as the "Government Engineering College, Howrah".

The land and building consisting mainly of the Eastern Block, Western Block, Central Block, Chapel, Library, Dining Hall, Principal's Quarters, Doctor's Quarters, Executive Engineer's Quarters, Octagonal Bungalow, three Bungalows for students and the Old Chemical Laboratory were acquired by Government in 1880 for the Engineering College.

The first session of the College under the name of the "Government Engineering College, Howrah", started at Sibpur on the 5th April, 1880 with 73 students. Mr. S. F. Downing, Professor of Engineering, was transferred from the Presidency College as Principal of this College. Mr. J. S. Slater, Mr. J. H. Gilliland and Mr. Dwarka Nath Dutta were also transferred from the Presidency College and appointed as Professor of Civil Engineering, Professor of Mathematics and Assistant Teacher of Drawing and Surveying, respectively. Mr. J. T. Bartlett was temporarily appointed as Professor of Drawing. The Workshops of the Public Works Department at Sibpur were attached to the College for instructional training of the students.

At about the same time 80 Apprentices of the Government Workshops at Dehri-on-Sone were transferred to Sibpur, and the Apprentice Department of the College was formed.

At the instance of the Government of Bengal, the University of Calcutta revised its regulations further in order to enable a candidate to obtain a License in Engineering or the Degree of Bachelor in Engineering in either of the two branches—(A) Civil Engineering

and (B) Mechanical Engineering. The following courses of instructions were accordingly sanctioned :—

(i) The Engineer Class was divided into two sections, — (A) Civil and (B) Mechanical. The courses of instruction were of four years' duration followed by one year's practical training ;

(ii) Overseer Class (C) ; and

(iii) Mechanical Apprentice Class (D).

The courses of instruction were of three and a half years' duration followed by one and a half years' practical training.

An admission fee of Rs. 10/- and a monthly tuition fee of Rs. 8/- were payable for the Engineer Class and those for the Overseer Class were Rs. 5/- and Rs. 3/- respectively. Mechanical Apprentices, on the other hand,

OLD COLLEGE BUILDING

were paid an allowance. Europeans and Anglo-Indians used to get Rs. 5/- a month and Indian Apprentices Rs. 3/- a month. Special Entrance Tests were held for admission. The College was affiliated to the University of Calcutta with effect from the 1st April, 1880, by a resolution of the Syndicate passed on the 17th April, 1880.

On the 12th April, 1880, Director of Public Instruction issued a Notification saying that owing to the unexpectedly large number of applicants for admission to the new Engineering College, and the difficulty of obtaining lodgings in Howrah and the neighbourhood, it has been decided to postpone admission to the College of new students until the beginning of the new session in June, 1880. Additional accommodation on the premises for 200 Indian students would be provided by that date.

By a Resolution No. 2803-E, dated the 22nd November, 1881, the control of the College and its students as distinguished from the Workshops were transferred from the Public Works Department to the Education Department. The system of appointing Monitors for the Engineer Classes was introduced in the year 1881-82, and on the recommendation of the Board of Visitors, Government sanctioned on the 27th January, 1882, payment of remuneration at the rate of Rs. 3/- per mensem to each of the two Monitors of the Charistian students of A and B classes and at the rate of Re. 1/- per mensem to the Monitor of the Indian students. Sibpur Volunteer Rifle Corps was also organised and sanctioned in the same year.

In December, 1880, about 32 bighas of land intervening between the P.W.D. Workshops and the College were acquired at a cost of Rs. 25,200/- for remodelling of the Workshops and also for expansion of the College.

An untowards incident took place on the 22nd April, 1881, over an alleged assault by Mr. Fouracres, the Superintendent of the Workshops, on one Srish Chandra Lahiri, a student of the second year Engineer Class. The students did not attend the Workshops on the 25th April, and a petition signed by 87 students was submitted on the same day. As a sequel to this incident as many as 70 students were expelled from the College. The matter, however, ended happily consequent to the intervention of some social stalwart, of Bengal and the expelled students were subsequently re-admitted.

The University Regulations were revised in the year 1883-84. The First Examination in Engineering was introduced for the first time with effect from the 1st August, 1883. L.C.E. was abolished and L.E. (License

in Engineering) was introduced in its place. The Degree of B.C.E. was replaced by B.E. (Bachelor in Engineering) at the same time. The revised Regulations in respect of B.E. came into effect on and from the 1st January, 1885.

The First Examination in Engineering was held in 1883, and out of five students that appeared only one came out successful. The First Examination in L.E. was held the following year. One candidate appeared with success. The first B.E. Examination was held in the year 1886. Out of two candidates appearing in that examination only one was successful. His name is Sarabji Shavaksha.

Distinguished engineers passing from the College at that time were B. M. Mitra, A. P. Sarkar and A. C. Mitra (the last named was in charge of the construction of the Victoria Memorial).

Mr. Mondy was appointed as Professor of Mechanical Engineering but no class could be formed due to the number of students being less than six which was minimum prescribed strength to start a class. The Capital outlay during the period 1880 to 1887 on lands and buildings of the college was Rs.7,87,434/- and the expenses on the College staff including establishment and contingencies amounted to Rs. 3,86,540/-. The output was not correspondingly satisfactory. Only 33 engineers and 68 subordinates or overseers came out of the college during this period out of a total number of 1,027 students.

On the representation of the Principal that the present designation of the College was giving rise to postal irregularities and delays on account of letters and other communications being invariably addressed to Howrah, the designation was changed to the "Civil Engineering College, Seebpore" by Government Order No. 395, dated the 18th May, 1887, as Seebpore was the nearest Post office. The spelling 'Seebpore' gradually underwent a change for the better and a more rational one, namely 'Sibpur.'

CIVIL ENGINEERING COLLEGE, SIBPUR (1887-1921)

The roots of the College were by this time firmly established and it was the time for rapid expansion. Numerous views on teaching techniques and practical training, etc. were now pouring in. They were blended and ultimately the Institution was well set for technical instructions in its highest sense.

From the year 1889, the College became a wholly residential Institution. Savings out of money paid by the students to the College Mess Fund used to be credited to the Treasury and were not utilised for their benefit.

J. S. Slater, Principal, 1892-1898

For the first time in March, 1891, it was decided that such savings accruing in any year should be utilised for the benefit of the students.

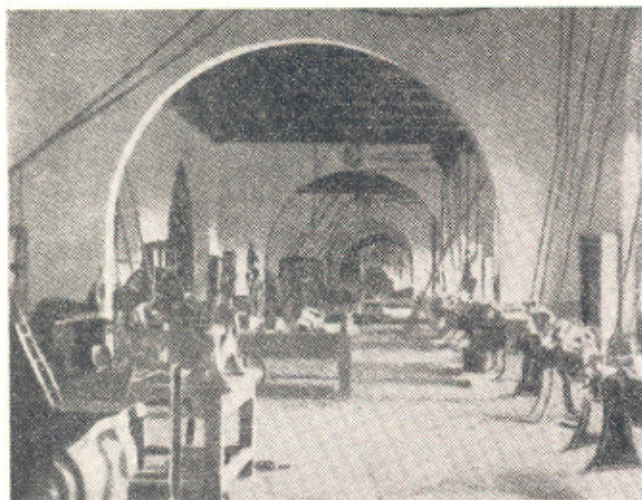

An important decision aimed at promoting the study of engineering as a career was taken in September, 1891, and all appointments in the Upper Sub-ordinate Grade of the Public Works Department of the Government of Bengal were reserved for being filled up by the graduates of the College. This step definitely helped in attracting Indian youths to engineering.

Mr. Downing, Principal of the College, died in 1891. He was associated with the College for 22 years and his death was a severe blow to the Institution. Mr. J. S. Slater became the Principal in his place.

Sibpur Workshops, which were under the control of the Public Works Department and run, more or less, on a commercial basis could not be utilised solely for instructive purposes. To remove this lacuna in the method of instruction, the authorities of the College had, for some time past, been trying for their transfer from the Public Works Department to the Education Department. In May, 1894, Government sanctioned the transfer of

a part of the Workshops to the Education Department and placed a sum of Rs. 50,000/- at the disposal of the Principal to erect new shops for the College. The Workshops were finally transferred to the Education Department in April, 1897.

Later on Artisan Apprentice Training on special request of Mr. Walter Saise, Manager of E.I. Railway Engineering Department was introduced and electric lighting installation for the college dormitories, classrooms etc. was completed in 1896 as proposed by Dr. P. Bruhl, Professor of Physics.

P.W.D. Workshop, converted to College Workshop

Prof. Bruhl's calls for special attention. After leaving this College he served the Presidency College as its Professor of Botany; and then the University of Calcutta as its Registrar and Professor of Botany. He was a famous research scholar in his days. He had worked on Solar Energy as well.

An Agricultural Department was established in 1898 to be discontinued in 1908. During this time additional intake of students resulted in the creation of one, two-storied block for the Hindu students and another single-storied block for the Muslim students, now known as "Slater House" and "Baby-Slater House" respectively.

The first attempt to start a magazine was made in 1903. A monthly magazine in vernacular under the title of "Shibpur College Patrika" was published in the same year. A grant of Rs. 100/- was received from Government for this publication. This venture unfortunately did not last long and with the departure of the editors from the College, the publication was discontinued the following year.

The principle of utilising the savings out of the Mess Fund for the benefit of the contributors was recognised

A. Macdonnel, Principal, 1899-1900, 1905

as early as 1891. Rules for the "Special Mess Fund" were framed for the first time in 1904, and were finally approved by Government.

B. Heaton, Principal, 1904-1921

To provide facilities for the training of qualified Managers and Assistant Managers for the Mines in India, a Mining Department for the College was sanctioned in 1905. Subsequently after finalising the curriculum of mining instruction with particular reference to the practical training of the students, the Mining Classes were opened in February, 1906, with Mr. E. H. Robertson as Professor-in-Charge of the Mining Department.

Mr. Slater who had been officiating as D. P. I. retired in June, 1905, and Mr. B. Heaton who had been officiating since 1904 became the permanent Principal of the College.

The Regulations of the Calcutta University were further revised during the year 1905-06. The First Examination in Engineering was changed to "Intermediate Examination in Engineering" (I.E.) and "Licence in Engineering" (L.E.) was abolished at the same time. The Degree of Doctor in Engineering was adopted and substituted for that of the Master of Engineering.

When the College was about safely ensconced at Sibpur and was developing into an institution of high standard, it was suddenly decided to shift it to a healthier site since the health of Sibpur in those days had not been quite satisfactory. Of the various alternative sites, such as Ranchi, Hazaribag, Dehri, Madhupur and Khargpur, mentioned in this connection, Ranchi was selected to be the new site for the College. Mr. Heaton, the Principal of the College was one of the sponsors of the 'removal scheme'. Negotiations started for disposal of the land and buildings at Sibpur, and the Commissioners for the Port of Calcutta made an offer of Rs. 11,97,500/- for the property.

This Scheme was then referred to the Government of India for sanction. While the Government of India agreed to the proposal for removal of the College to Ranchi on account of the bad health of Sibpur, they did not, however, agree to the disposal of the land since the Part Commissioners did not require it for any immediate use. The College was thus saved from immediate removal to Ranchi. The Society for the Propagation of Gospel, the original owner of the premises, also raised an objection to the effect that, according to the terms of the agreement between the Society and the Government, the latter had undertaken the responsibility of maintaining for ever the Chapel and the Cemetery attached to the College. All these led to a stalemate, and nothing materialised during the next few years. By 1911-12, the health of Sibpur improved appreciably as a result of opening up of jungles and execution of a big drainage Scheme by the Bengal Nagpur Railway. Some of the original sponsors of the scheme including Mr. Heaton changed their mind and started advocating for the reten-

tion of the College at its present site. Eventually, Dr. C. A. Bentley, the Sanitary Commissioner, was asked to report on the state of health of Sibpur area.

Accepting the findings of the Sanitary Commissioner, Government revoked in July, 1918, their earlier Order and decided to retain the Civil Engineering College at its present site. This ended the long period of uncertainty lasting for over 14 years resulting in suspension of all development Projects.

In the mean time the Government decided in August, 1909 to form a Governing Body for the college. The power and functions were also formulated. The first Governing Body was constituted in February, 1910 with the Member, Board of Revenue as Ex-Officio President for supervision and management of the College.

Messing arrangements were not quite satisfactory and, though the number of students increased, the arrangements remained more or less as before. There was clamour for improving the system of messing but no proper arrangement could be made for a long time. Eventually there was a 'hunger-strike' in February, 1916. After this unhappy episode some improvement was effected in the system. The Principal in a note made the following remark which also carries the understone of sectarian intentions :

"Amongst our needs is a hostel where we can admit the sons of the richer Indians who have adopted European habits of living. As regards the class of students now attending the College, we must reform their messing and barrack arrangements. We must have a separate mess for the Engineers. At present all students, whatever be their social position, their differing diets and habits mess together in a mess run on the cheapest possible lines solely in the interest of the very poorest. Here our future masters of engineering mess with the future subordinates ; they would far rather have separate arrangements, and such must be provided if we desire our future officers to mix in after life on reasonably social easy terms with their equals who have been educated elsewhere under more favourable conditions".

During the ensuing few years some minor projects for development of the College were taken up and many students passed out of the college and distinguished themselves in their profession as Engineers as well as in other spheres of life.

The nomenclature of the College was changed by Government Notification No. 353-Edn., dated the 12th February, 1920, to the "Bengal Engineering College, Sibpur". As the Botanic Gardens Post Office was then the nearest Post Office, the new nomenclature caused pos-

tal delays. Consequently, in Government Order No. 713-Edn, dated the 24th Mhrch, 1921, the word 'Sibpur' was deleted and the College was redesignated as the *Bengal Engineering College*.

BENGAL ENGINEERING COLLEGE, (1921-1945)

The Bengal Engineering College, popularly known as the B. E. College, was now firmly established and destined to play its part in producing the designers, builders and architects of modern India. Despite the prolonged uncertainty arising out of the 'Ranchi Removal Scheme', the College did not suffer either in its popularity or in effecting such improvements as were possible under the prevailing circumstances. The tempo of progressive developments was not only maintained but raised to a sufficiently high pitch so as to transform this institution into the leading Engineering College of the country.

The first reform undertaken during the period was to re-organise the various Departments of the College. A Committee under the Chairmanship of Sir Rajendra Nath Mookerjee, a most distinguished ex-student of this College, was formed in February, 1919. In accordance with these recommendations the Board of Control for Apprenticeship Training was created in 1921. Also by a Government order the various Departments of the College were reorganised.

The Upper Subordinate Classes were abolished after 42 years' of existence. The last link of the College with the Public Works Department was severed, and no more students were sent up for the examinations under the Joint Technical Board after July, 1922. The control of the examinations in the improved Mechanical and Electrical Engineering courses was transferred to the newly-created Board of Control for Apprenticeship Training with effect from March, 1922. After this reform the College was concerned solely with the training of persons to occupy higher position in the engineering industries and establishments of the country. The Bengal Engineering College is the first Engineering College in India to attain this higher status.

Mr. Heaton retired as Principal in 1921 after 31 years' association with the College. Mr. T. H. Richardson took over from him as the next Principal.

During the period 1921 to 1925, several projects for expansion and improvement of the College were implemented. Some residential quarters, the new Assembly and Examination Hall was built in 1920 at a cost of over Rs. 22,344/-. The Electro-Technical Laboratory was extended at a cost of Rs. 7,027/-. A portion of the 'Jheel' to the north and east of the playing fields was reclaimed

T. H. Richardson, Principal, 1922-1932

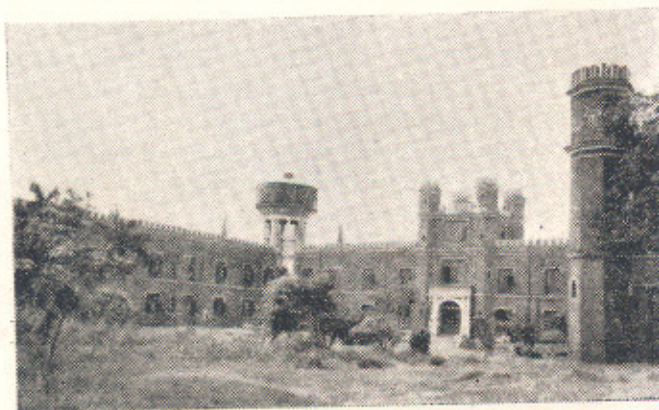

at a cost of Rs. 35,920/-. Labour quarters were built at a cost of Rs. 15,544-. Additional cook-rooms were also built at a cost of Rs. 4,691/-. Sanitary and water-supply fittings were provided in residential quarters at a cost of Rs. 37,345/-. A new Barrack for Anglo-Indian students was constructed at a cost of Rs. 1,75,144/- and opened in the beginning of 1925. This Barrack was named 'Heaton House'. The Water-works which cost a total of Rs. 1,63,750/- was completed in 1924, and the new Turret Clock presented by Sir Rajendra Nath Mookerjee in 1921, was installed in its tower. The Sewerage Scheme was completed in the same year. New Barrack latrines were also built. The Activated Sludge Plant, which is the first of its kind in India, was completed in 1925, and the new barrack latrines were brought into use under the guidance of one of our illustrious students, Sri S. K. Chakravarti. The Power House and the Electrical Engineering Department were considerably improved by the addition of new Boilers, Alternators, Converters, Switch-Boards, etc. The underground cable was completely replaced by overhead wiring. A new Storage Battery of 60 cells (of 487 amp-hrs. capacity) was installed in January, 1924. A small Pelton Wheel and Water Turbine were added to the Mechanical Engineering Depart-

A. Macdonald, Principal, 1928-36

ment, and a Brinell Hardness Tester to the Strength of Materials Laboratory in 1925.

Efforts were made to raise the standard of Mechanical and Electrical Departments so that degree could also be conferred on them. Simultaneously, the Mining Department was closed down due to lack of students since the Indian School of Mines at Dhanbad constructed by one of the ex-students of the College, Anath Bandhu Bhattacharya, came into being.

DOWNING HOUSE HOSTEL

The guaranteed appointment in the Indian Service of Engineers, which was in vogue ever since 1884, was abolished, and all classes subsequent to those admitted in 1924 could no longer expect to avail of it. Henceforward, recruitment to I.S.E. till its abolition was done on the basis of competitive examinations.

Mr. Richardson, Principal of the college, retired on the 16th November, 1928, and Mr. A. Macdonald became the Principal.

Further development project was undertaken and the 220-Volt Overhead A.C. lines were completely replaced by underground cables during 1929-30.

R. Wolfenden, Principal, 1936-38

The Associateship Examination in Mechanical Engineering was accepted by the Institution of Engineers, (India), as of good graduate standing and as such exempted from Parts A and B of the examination for Associate Membership of that Institution. Meanwhile, it was felt that the time was ripe for introducing the Degree course in Mechanical Engineering in this college too. As the College had already been affiliated to the Calcutta University in Mechanical Engineering up to the B. E. standard preparations were made to introduce the course.

C. V. Miller, Principal, 1938 and 1943-1945

Sanction of Government was received on the 18th July, 1930. The first batch of students appeared at the Degree Examination in July, 1932.

Another proposal to introduce a Special Course of Marine Engineering at the College was mooted sometime in 1930. The scheme did not, however, mature.

The Degree course in Electrical Engineering was introduced during the year 1935-36, and the first batch of students appeared at the Degree examination in 1936.

The practice of holding the Annual Survey Camp at one fixed place was changed and it was decided to hold the camp at three different places in successive years, with effect from 1935-36. The Swimming Tank was opened in 1937-38. 'Slater House' and 'Downing House' Hostels were provided with covered bathing places in 1938-39. In May, 1938, 5 posts of Visiting Lecturers in Accountancy, Railways, Irrigation, Waterworks, Drainage and Sewage Disposal, and Workshop Management were created under a new Scheme.

Mr. Macdonald left the College on leave preparatory to retirement in August, 1936, and Mr. R. Wolfenden, Inspector of European Schools, became the Principal with effect from the 2nd November of that year. Mr. Wolfenden proceed on leave, preparatory to retirement, on the 18th August, 1938, and Mr. C. V. Miller, Professor of Civil Engineering, became the Officiating Principal. Dr. A. H. Pandya, a renowned Engineer of international repute, took over as Principal on the 21st September, 1939. He is the youngest and the first Indian Principal of the College.

The Degree course in Metallurgy was introduced in 1939-40 and commenced on the 6th November, 1939. The post of a Lecturer in Metallurgy was created with the introduction of the course.

During the first World War, the Testing Laboratory of the College was utilised for testing of war materials. During the second World War, a large number of technicians for the Munition Factories, Armed Services and the Technical Wing of the Air Force were trained up in the College Workshops which served as a combined centre under a special technical training scheme. Tem-

Dr. A. H. Pandya, First Indian Permanent Principal

N. N. Sen, Principal, 1945-49

porary barracks and class-rooms were built in November, 1940, and training commenced in February, 1941. To make room for the technicians, admission to the first-year class in 1940-41 had to be suspended. Dr. Pandya piloted the scheme in the whole of the Eastern Region. This Scheme was finally wound up in June, 1945. Subsequently, on the 2nd April, 1943, Dr. Pandya left the College on deputation and joined the Directorate-General of Munition Production as Director of Metals and eventually became the Deputy Director-General. Mr. C. V. Miller, Vice-Principal of the College, was appointed to act as Principal in his place.

By a Government Resolution, dated the 2nd December, 1943, a Committee under the Chairmanship of Mr. F. Rahman was constituted to enquire amongst other things the prevailing state of technical and industrial education in Bengal with reference to higher technical education and also to suggest a comprehensive scheme of industrial and technical education so as to serve the progressive needs of the industries and the people of Bengal. The Principal of the College was appointed a member of this Committee. After an elaborate enquiry the Committee submitted a report. In regard to this College, it was pointed out by the Committee that Workshops and Labo-

ratory arrangements at the College were inadequate and if successful training in higher engineering, commensurate with the needs of the Government as well as of the industries was to be achieved, these defects should be removed. The Committee further observed that apart from the Degree course in Civil, Mechanical, Electrical and Metallurgical Engineering, which were already in existence, arrangements for starting new course, such as Ship-building, Aeronautics, etc., should also be made and that this College should impart training in higher engineering only, leaving the Diploma and the Associateship courses to be conducted at the Calcutta Technical School. The recommendations of the Committee were followed up, as will be seen in the next section.

After the retirement of Mr. Miller in 1948, Mr. N. N. Sen, Vice-Principal and Professor of Metallurgy and Chemistry, was appointed the Principal of the College with effect from 1st April, 1945.

A NEW ERA (1945-1956)

THE year 1945 is a memorable year and the beginning of an era of rapid development and progress in the history of the College. The end of the devastating war that started in 1939 was in sight, and along with it came the realisation of the magnitude of the task of reconstruction. The importance of applied Science and Technology and necessary man-power for fulfilment of the task were, however, keenly felt. Meanwhile, industries in the country were expanding and their needs as well as the needs of the Government for higher technical personnel to meet the increasing activities became urgent. This College which was one of the new institutions for producing the higher engineering personnel, had to keep pace with the expanding activities. What was most urgently needed was the development of the College consistent with the demands of the day as well as what might be required in the immediate future. A "Committee for the development of Higher Engineering and Technical Education in Bengal" was accordingly formed. The Committee was particularly asked to submit its report by May, 1945.

The Development Committee report, submitted on the 19th May, 1945, was divided into two parts—one for the 'Immediate Plan' and the other for the 'Five-year Plan'. The 'Immediate Plan', proposals confined its recommendations to higher engineering training and the training of supervisory personnel, and that the Plan aimed at increasing the number of qualified engineers and supervisors in the more important and immediately necessary branches of engineering, improving their quality and standard and also at providing facilities for advanced instruction and research. Government accepted these recommendations contained in the 'Immediate Plan'. The

Calcutta University framed new curricula and syllabi and revised the Regulations relating to the Degree Examination in various branches of Engineering. Final sanction of Government to the adoption of the new regulations was received in Government Order No. 2653 Edn. dated the 25th November, 1946. The 'Immediate Plan' for improvement of the College was given effect to from the academic session 1945-46. The College was so long generating its own electricity. To meet the increased load the electric supply system was re-modelled and supply of energy in bulk at 6,000 V pressure was arranged from the Calcutta Electric Supply Corporation from December, 1946. The University Training Corps was re-organised into the National Cadet Corps, and two Senior Divisions of the N.C.C. were formed during the two successive years. The Bengal Engineering College Alumni Congress was constituted on the 18th August, 1945.

'The Immediate Plan' was fully implemented in 1947-48 i.e., over a period of three years.

The object of the Five-Year Plan prepared by the Development Committee was the ultimate attainment of converting the Bengal Engineering College into a most

modern and well-equipped institution comparable to the best western institutions, with a greater range of degree courses and facilities for the post-graduate and research work.

The capital expenditure required to implement this Plan was estimated at Rs. 98,86,000/- and the recurring expenditure at Rs. 14,66,900/- per year at the end of the Plan-period. Against this recurring expenditure a credit of about Rs. 4,00,000/- was expected on account of fees and workshop receipts. Two new degree courses, namely, Architecture and Town and Regional Planning would be added, and as many as 1,200 students would be trained in the College at a time. The average cost of educating a student would decrease to Rs. 1,220/-.

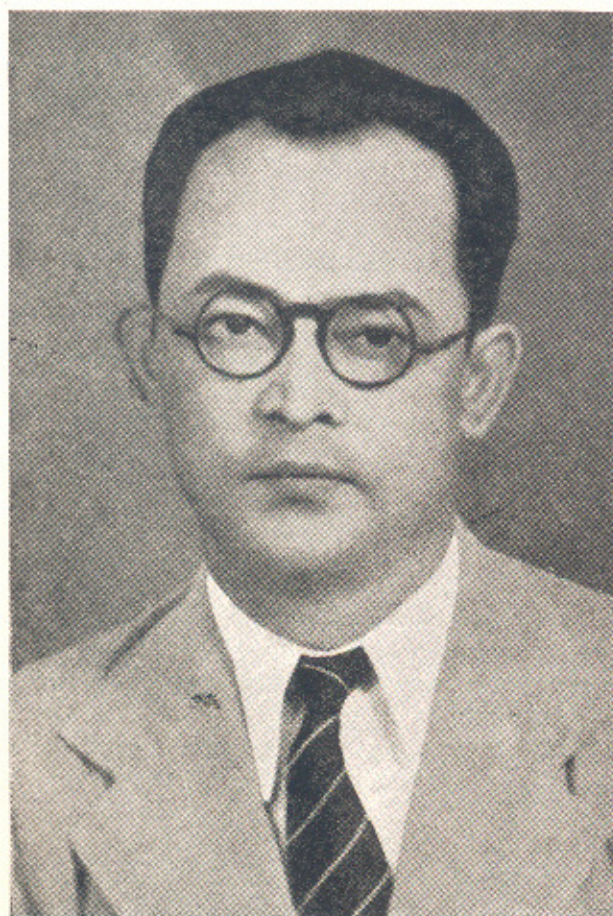

The 15th of August, 1947, came and India earned independence. A new democracy was ushered in with new ideas and new hopes to the millions. Development of the country in all spheres, which was neglected so long, was taken up in right earnest. It was indeed a stupendous task, and the call on the engineers was naturally great and urgent. The necessity of developing this Institution into one of the very best was more urgently needed than ever before. The National Government decided to give immediate effect to the Five Year Plan as recommended by the Development Committee.

The 'Five Year Plan' was sanctioned in Government Order No. 4234-Edn. dated the 9th November, 1948. To implement the Plan, Government agreed to provide a total sum of Rs. 97,00,000/- for capital expenditure under the following heads :

Acquisition of additional land	— Rs. 1,20,000
New Buildings	— 70,00,000
Improvement and expansion of the	
Water Supply and Sewage Plant	— 2,00,000
Furniture	— 3,80,000
Additional equipment and machinery	— 20,00,000
	Rs. 97,00,000

An annual recurring cost of Rs. 13,20,000/- was also provided. Implementation of the Plan began from the 1st of July, 1948. A new Department of Training was created on the 28th May, 1948 to serve as a link between the College and the Government and other Bodies and industries for arranging practical training for the Graduate Engineers and also to help them in securing suitable employment after the training.

A change in the office of the Principal took place in 1949. Mr. N. N. Sen proceeded on leave, on the 5th

Dr. S. R. Sengupta, Principal 1949-55

January, 1949 preparatory to retirement, and Dr. S. R. Sengupta was appointed Principal in his place from the same date.

The construction of building under the plan was started on the 18th December, 1949. Dr. B. C. Roy, the Chief Minister of West Bengal, laid the foundation stone of the Administrative Block on the 5th February, 1950. The Office of the College was shifted to the new building on the 10th June, 1950. Two new Departments were created and two new Degree Courses were introduced from the academic session 1949-50. These Courses are (i) the Degree in Architecture and (ii) the Post-Graduate Diploma in Town and Regional Planning. The former was a five-year course, and the latter a two-year post-graduate Diploma Course for graduates in Civil Engineering and a one year post-graduate Diploma Course for graduates, in Architecture.

Mr. R. G. P. S. Fairbairn, Principal 1955-56

A Polytechnic with a capacity to take in 350 boys was sanctioned in 1950-51 and was started on the 12th July, 1950 as part of a scheme to rehabilitate displaced youths by giving them training in various trades.

To provide accommodation for the increased number of students the building programme included the construction of several new Hostels. As many as four new Hostels were built during the period 1951-54. The first Hostel was opened on the 17th August, 1951, by Dr. Tarachand, Secretary to the Government of India, Ministry of Education. This was named after Principal Richardson as the 'Richardson Hall'. The remaining three Hostels were built in 1952, 1953 and 1954 and were opened in July of each year. These were named after the three successive Principals as the 'Macdonald Hall', the 'Wolfenden Hall' and the 'Pandya Hall' respectively. Two funds known as the 'Institute Building and Sports Pavilion Fund' and the 'B. E. College Poor Fund', later re-named as 'Students' Aid Fund', were created in 1951.

A new Post-Graduate certificate course in Naval Architecture was introduced during the year 1952-53. The Calcutta University approved new Regulations for the Degree of Master of Engineering (M.E) in Civil, Mechanical, Electrical and Metallurgical Engineering on the 25th April, 1953.

The Five Year Plan period was over in 1953. Though the face of the College was completely changed because of implementation of the various phases of the plan as recommended by the Development Committee, the building programme, however, could not be fully executed within the sanctioned allotment due to rising prices as also on account of urgent demands on materials and resources in connection with the 'First Five-Year Plan' of India. This naturally retarded the rate of execution of the plan, and the programme of work could not be completed in spite of generous contributions from the Government of India.

A grant of Rs. 30,000/- was received during the year from the Government of India for the purchase of equipment for starting an Ore-dressing Laboratory.

The College suffered a heavy loss when Dr. S. R. Sen Gupta, Principal of the College, left on deputation, on the 12th March, 1954, to join his new post as Director of the Indian Institute of Technology, Kharagpur. But for his initiative, drive and zeal, the development plans could not have been implemented. He successfully piloted the plans from the stage of their initiation to that of implementation. Mr. R. G. P. S. Fairbairn, Professor of Mechanical Engineering, was appointed Principal in his place.

On the 30th September, 1954, Government of West Bengal approved a scheme for the interchange of staff between this College and the Indian Institute of Technology, Kharagpur, for the mutual benefit of both the insti-

tutions. Under another scheme sponsored by the Technical Co-operative Administration, U.S.A., an agreement was concluded between the Bengal Engineering College and the University of Wisconsin. In accordance with terms of that agreement six Guest Professors from the U.S.A. joined the College at the beginning of the session 1954-55. In exchange five members of the Teaching Staff of this College went to the U.S.A. as Research Associates and Research Fellows for one year in order to learn the technique, method and organisation of Teaching, Laboratory work and practical work in Industry.

Research activities in the College started as far back as 1901 when Upendra Nath Kar, a student of the College, was awarded an Elliot Research scholarship of Rs. 100/-, tenable for one year, for conducting investigations in the region of electricity and magnetism with special reference to electrical engineering at the College Laboratory. With the installation of a 100-ton Testing Machine in 1902-03, scope for research in the early days of the College was somewhat enlarged. Arrangement was made for holding regular research tests with Indian timbers,

and the facilities available in the College Laboratories were utilised by the Inspector-General of Forests. During the year 1907-1908, arrangements were almost completed for purchasing an apparatus for research in Absorption Spectrometry. From that period onwards research work gradually expanded in the various laboratories of the College. There was, however, no proper arrangement for any sustained research, not to speak of any post-graduate research work. The Development Committee noticed this deficiency and in one of its recommendations suggested adequate provision for stimulating research by students. Research scholarships were liberally granted so as to make the students interested in this field. The Government of India allotted to this College thirteen senior scholarships (3 each in Civil, Mechanical and Electrical Engineering and 2 each in Metallurgical and Architecture) of the value of Rs. 200/- a month tenable for three years. There are also ten college research fellowships of Rs. 75/- a month tenable for one year, but renewable for another year. During the period from 1948-49 to 1955-56 the following research schemes were in operation at the College :—

SL. No	Name of Scheme	Investigator-in-Charge	Date from which operated	Sanctioning Authority
1.	Development of Gas Turbine and Jet Propulsion Unit.	(1) Dr. S. R. SenGupta (2) Prof. D. Banerjee	Nov. 30, 1950	Council of Scientific and Industrial Research.
2.	Investigation of R. C. coupled F. M. Oscillator (Successfully completed on 1. 9. 53).	Dr. H. Rakshit	-do-	-do-
3.	Gases in Steel.	Dr. G. P. Chatterjee	-do-	-do-
4.	Studies on the corrosion of metals and alloys with special reference to the effect of Titanium.	(1) Dr. G. P. Chatterjee (2) Dr. B. Chatterjee	March 10, 1952	-do-
5.	Flash Steam Generator (Discontinued from 1. 3. 55).	Shri R. K. Mukherjee	June 26, 1951	-do-
6.	Studies on binary and ternary alloy system with Titanium as one of the alloying constituents.	(1) Dr. G. P. Chatterjee (2) Dr. B. Chatterjee	March 10, 1952	-do-
7.	Study of Microsiesms and Sea Waves and their co-relation with cyclonic disturbances.	(1) Dr. S. K. Chakraborty	Jany. 7, 1952	-do-
8.	Design and Development of Instruments for Cosmic Ray measurement and a study of allied theoretical problems.	Dr. S. K. Chakraborty	Nov. 6, 1951	Govt. of India, Atomic Energy Commission.

9. The development of Auto-Engines using Power Alcohol as Fuel (Since transferred to Jodhpur College of Technology).	(1) Prof. R. G. P. S. Fairbairn (2) Shri G. Baraya	Jan. 7, 1955	Council of Scientific and Industrial Research.
10. Construction of 100 watt.r.c coupled F. M. Oscillator (Discontinued from 1. 3. 56).	Dr. H. Rakshit	April 1, 1954	-do-
11. Development of Electronic Torque-meter (Discontinued from 1. 3. 56).	-do-	July 1, 1954	-do-
12. Development of New Alloys with reference to elements available in this country.	(1) Dr. G. P. Chatterjee (2) Dr. B. Chatterjee	Sept. 1, 1954	-do-

The research work has produced results. A Three-staged axial flow Compressor and a Combustion Chamber have been designed and manufactured in the College. Turbine and other components have also been designed and manufactured.

After the lapse of several years, the students of the College started the publication of an annual journal known as the "Bengal Engineering College Annual" or more popularly known as "B E C A". BECA is now pub-

lished regularly at the time of the Annual Reunion Meeting of the present and past students of the College.

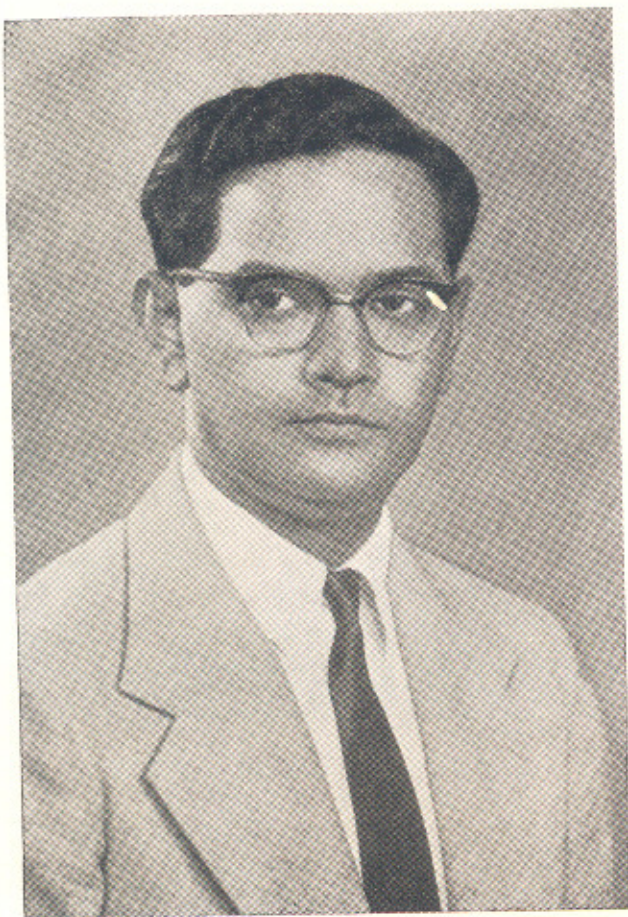

One of the recommendation of the Development Committee was for an adequate financial provision for the regular publication of a Technical Bulletin from the College. The Government of West Bengal accepted this recommendation and sanctioned a total annual expenditure of Rs. 10,000/- under the Five-Year Plan for the publication of Technical Bulletins. The first bulletin was published in 1949 and comprised the lectures which were delivered by a Visiting Lecturer.

Degree courses were further enlarged during the year 1955-56. The Calcutta University framed new Regulations creating the Degree of D. Phil. in Engineering. The Master of Engineering courses in Civil, Mechanical, Electrical and Metallurgical Engineering (of one year's duration for honours graduates and of two years duration for pass graduates) were introduced. It may be noted here that the Degree of Doctor of Science in Engineering was created some years ago. A new four-year Degree Course in Mining Engineering has since been introduced from the session 1956-57.

Mr. R. G. P. S. Fairbairn proceeded on leave preparatory to retirement on May 16, 1956 after 18 years' service in the College, and Mr. A. C. Roy, Head of the Department of Applied Mechanics, succeeded him as the new Principal.

THE CENTENARY (1956)

Marching triumphantly through the passage and the concomitant test of time—through odds or odium, through perseverance or pessimism, in determination or in distractions, in glimmer or in gloom, in hopes or in disappointments, in toils and in tears or in successes and in cheers, the Bengal Engineering College, Sibpur, the pioneer amongst the centres of higher learning in technology

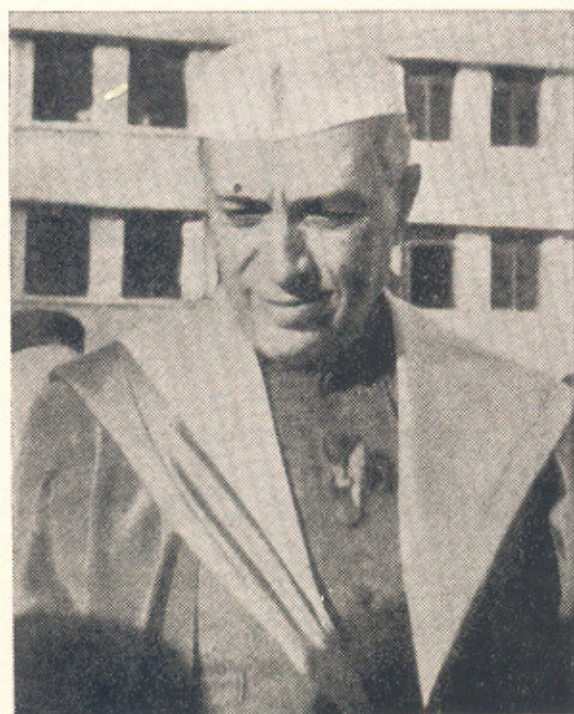

A. C. Roy. Principal, 1956-66

Dr. B. C. Roy addressing the opening day meeting of the Centenary

in India, which has produced a galaxy of personnel in the profession, a few dozens among them, completed its 100 years of glory towards the close of the year 1956, since its founding in an embryonic form a century ago, on the 24th November, 1856 with 10 students and

Shri Nehru in a happy mood after the meeting

Members of Sluk, the Slovak Folk Art Ensemble

2 teachers. An occasion like this calls for revelry; indeed the Centenary Celebration organised by a Committee, with Shri J. N. Das Gupta as President, Prof. A. C. Roy, the then Principal and Shri Akshoy Bose as Vice-Presidents and Shri S. N. Gupta as Honorary General Secretary, had been a land mark in the history of B. E. College. A study of the full list of the "Organizing Committee" for the Centenary Celebration is a good revelation as to how the full cross-section from the stalwarts amongst the alumni to the interested person even at the grass-root level—of the well-wishers of the College contributed their devoted service in the all round success of a grandiose event.

The gala Centenary Celebration function was inaugurated by Dr. B. C. Roy, the then Chief Minister of West Bengal, on the 25th December, 1956, in the presence of the well known educationist, Sir Ramaswami Mudaliar and a distinguished gathering of guests, alumni and students. The entire programme included symposia, engineering exhibi-

Prof. Satyen Bose in the Symposium

Exhibition.

Shri Nehru is inquisitive and
Principal Roy gives informations
about this College.

tion, publication of a Centenary Souvenir volume, games, sports, feasts, cultural entertainments—a balanced blend of serious business with light mood and mirth.

The exhibition in particular organised by the past and present students and staff of the College in collaboration with reputed commercial houses dealing in engineering goods created enthusiastic response among the general public. The then Prime Minister of India, Pandit Jawaharlal Nehru graced the Concluding Session of the Centenary Celebrations on 14th January 1957.

Reports had been received that the alumni of the College who had been residing abroad during the centenary year and were deprived of the chance to participate in the

main Centenary Celebration, had in their own ways observed the occasion through meetings, get-togethers or the kind.

To commemorate the Centenary Year, the Government of India sanctioned a sum of Rs. 1 lakh to be utilised on Centenary Lectures and other developmental activities. The Calcutta Electric Supply Corporation offered to train one of the Electrical or Mechanical Engineering students in their organisation in Calcutta for one year to be followed by two years' training in England at the Corporation's expense. However, so far only four Centenary Lectures could be arranged and the interest accruing out of the said fund is yet to be utilized for developmental activities. Nor is there any information whether the offer made by the C.E.S.C. has been implemented.

EX-STUDENTS
CELEBRATING
CENTENARY
IN
LONDON
1956

POST-CENTENARY PERIOD (1956-1981)

Two new students' hostels were built during 1956-58 and named after two successive Principals, Prof. N. N. Sen and Prof. Dr. S. R. Sengupta. The Government of India sanctioned 13 senior research scholarships of the value of Rs. 200 per month each and tenable for three years. The Electrical Engineering Department got a new building and the Mechanical Engineering Department a new Fuel and Lubricant laboratory during this period.

The Students' Institute and the College authorities arrived at an agreement about the establishment of a Students' Union from the next academic session i.e., 1956-57. The nature and composition of the Union was formulated and a constitution was framed. Shri Binoy Majumdar and Shri Arun Kumar Mazumdar became its first President and General Secretary respectively.

Over the years many distinguished persons from India and abroad visited the College and were impressed by the activities. The names of Prof. N. Caiapuoli, Deputy Director of Science Department, UNESCO Head Quarters, Paris, (1956), Prof. Rumjanzev Surgey Vasiljeviel, Deputy Director of Higher Education, Professor specialist in Mechanical Technology, UNESCO (1956), Prof. August Buckey, Minister of Education in Banaria (1956), Dr. Baldwin, Vice-President of the University of Wisconsin, U.S.A. (1956), Shri C. D. Deshmukh, Chairman University Grant Commission and Mrs. Deshmukh, Member National Planning Commission (1956), Marshall Bulganin, Prime Minister U.S.S.R. and Mr. N. S. Kurshev, Member of the Presidium of the Supreme Soviet (30.11.1955), Dr. Grayson Kirk, President of Colombia University, Mrs. Kirk, U.S.A. (1956) are a few luminaries worth mentioning.

Even though the University of Calcutta had earlier accorded permission to the College to admit student for Master of Engineering (M.E.) degree in a member of disciplines, the need for the formation of a council for post graduate studies was, however, felt for developing the existing facilities of higher studies and research. The inauguration the Post Graduate Council on the 20th December, 1957 by Prof. N. R. Sidhanta, the then Vice-

Chancellor of the University of Calcutta and with Dr. D. M. Sen, the then Secretary of the Education Department of the Government of West Bengal, as the Chief guest, heralded the beginning of an important phase in the development of post graduate studies in the College.

In the year 1956, the Central Government sanctioned grants for the starting of a Department of Telecommunication Engineering for a five years integrated course of studies with a student intake of 40 per year. However, it seems no action was taken in opening the department and the students who had already been admitted for the proposed discipline were transferred to the Electrical Engineering course with the option that they could take up Communication Engineering in the final year as an Elective subject. The strength of the Electrical Engineering students in the third year class rose to 100, and paucity of space and shortage of staff caused great hardship to both the students and teachers.

A large exhibition displaying the works of the students of Architecture from Kharagpur, Delhi, Bombay, Nagpur and this College was organised in connection with the N.A.S.A. Convention during 20-25th January, 1958. The Exhibition was inaugurated by Mr. Bernhard F. Mathews, F.R.I.B.A., F.I.A.A., a well known practising Architect, and included exhibits from the United States Information Service, the British Information Service and the French Consulate.

In year 1958-59 the following research projects were undertaken by the College :

Name of the scheme	Investigator-in-charge	Sponsoring authority
1. Development of Pulse Velocity Method for testing concrete	Prof. P. N. Chatterjee	C.S.I.R.
2. Development of non-destructive testing of concrete bricks and other clay produced by Resonant Frequency method	Prof. P.N. Chatterjee	C.S.I.R.
3. Investigation of Low Alloy High Strength Steel	Prof. N. N. Sen	C.S.I.R.
4. Senior Research Fellowship for analysis of non-linear phenomenon in Automatic Control System.	Prof. S. N. Ray	C.S.I.R.

A new four storied block was added to the east of Block-II of the main College Building during this period to provide additional space for the Department of Civil Engineering.

That the students of the College had not been shunned from the mainstream of the society, though living virtually in isolation in a compulsorily residential College, had nicely been reflected in the Annual Report of B.E. College, 1959-60. The Report revealed that only in the previous year "The students and the staff made a combined effort towards the collection of money and clothes from door to door for the people hit by the flood in West Bengal and contributed their collection to the Vice-Chancellor's Flood Relief Fund." The students also ran a free night school within the College campus out of their own resources for the children of the locality. They also constructed a set of hutments for a primary school at Santinagar near Bakultala, Sibpur, Howrah.

The introduction of Teachers' Training during 1959-60 was a noteworthy event. The expansion of the industrial sector and an ever-increasing demand for technical personnel in other spheres in the profession created a perennial shortage of staff in technical institutions. Consequently the Ministry of Scientific Research and Cultural Affairs introduced a Teacher Training programme in a number of technical colleges including B.E. College. The Teacher Training scheme had been introduced in this College since August 1959 with 20 teacher-trainees distributed over different disciplines. Notwithstanding the fact that teaching staff shortage still persists, the scheme, unfortunately, has since lapsed into non-existence, although its revivification is under consideration.

Excerpts from Welcome Address by the Principal during the Degree Awarding Ceremony, 1981 may be pointed out in this connection. "In spite of our best efforts it has not been possible to fill up the vacant posts of Lecturers in engineering subjects because of qualification constraints imposed by the U.G.C. Payscale, where a good master's degree in engineering with two years' experience have been made essential. To solve this problem, the State Government has recently been approached with the proposal for creation of "Teacher Fellows" scheme in which a fresh engineering graduate with a first class degree would be eligible for enrolment". Coupled with this, the problem presumably hinges also around the fact that salaries for teachers are not as attractive as those offered by Private Sectors who are perhaps the largest employers of engineers. It is intriguing to note that the condition had just been opposite when the College was first started: the Professor of Civil Engineering was entitled to a salary of Rs. 700 only per month in 1856—the present equivalent of which can easily be imagined.

With the expansion of the College in all spheres, the necessity for keeping the members of the staff and the students well informed of the latest activities was keenly felt. To ensure quick circulation of such information a

weekly news bulletin, namely, "College News", was started in 1959-60.

In addition to the normal and regular research work, the following research schemes sponsored by the Council of Agricultural Research were in operation in different departments of the College during the period:

Concrete Structure	—Dr. K. K. Banerjee
Geophysical Aspects of Cosmic Rays	—Dr. S. K. Chakrabarti
Distribution of Clay Minerals in different homigons of Indian Soils	—Dr. B. Chatterjee

Ten Research Fellowship each of a value of Rs. 75 only per month was also sanctioned by the Government of West Bengal during the year (1959-60).

The five year integrated course for students who have completed their Higher Secondary studies in the Science and Technical streams was introduced in 1960. For the session 1960-61 the quota for Higher Secondary candidates was fixed at 80 in addition to 400 I.Sc. candidates. Three new students hostels viz., Hostel Numbers 7, 8 and 9 were constructed during the year. The same period also saw the unfortunate winding up of the post graduate diploma course in Naval Architecture and Marine Engineering which was started in 1952-53.

In 1961-62 the Analog Computer was set for operation in the Electrical Engineering Department. The National Buildings Organisation under the Ministry of Works, Housing and Supply, Government of India, introduced a scheme for training and experimenting on construction of Rural Housing, and established a Rural Housing Wing at the College.

To meet the increasing demand for technicians and engineers the students intake capacity of the College had been increased during the First and Second Five Year Plans of the nation. The following table will indicate the growth of students' population in the college at the end of the First and Second Five Year Plans as compared to the students' population on 31st March 1947, i.e., prior to the introduction of Five Year Plans:

Year	Total No. of students
31st March 1947	464
31st March 1956	662
31st March 1961	1481
31st March 1962	1818

But unfortunately, almost no provisions were made for increasing the strength of teaching staff nor of the students' amenities. However, construction of four more new hostels were started during the next session in order to cope up with the increasing demand for hostel accommodation (1962-63).

On his appointment as the Vice-Chancellor of North Bengal University, Prof. A. C. Roy handed over his charge as the Principal on 31st May, 1966. Prof. A. K. Roy, Vice-Principal (Admn) and Professor & Head of the Department of Mining Engineering, took over the charge of the College and continued till 18th July, 1967. On the following day, i.e. 19th July 1967, Prof. D. Banerjee, Professor of the Mechanical Engineering Department, took over charge as the Principal of the College.

Prof. D. Banerjee, Principal 1967-1977

The political turbulences of the early seventies of this century precipitated a serious glut, *inter alia*, in the entire educational sphere in West Bengal. And inescapably B.E. College, like other educational institutes, suffered serious set-backs and consequences from the prevailing social disorder. To quote, in this regards, from the Report of the Principal cum Member-Secretary to the Governing Body at a meeting on the 11th July, 1977,

"During the early part of the year 1970, the education atmosphere was vitiated in many parts of the country, particularly West Bengal. It came as a rude shock to all educationists and quite naturally, the waves of disturbances touched this prestigious institution as well, slowing down its academic progress to a considerable extent." The College had to be closed on several occasions for long periods. There were no fixed academic sessions and examinations were held irregularly. A large number of valuable books of the College library were destroyed. Record would reveal that no regular meeting of the Governing Body could be held. A sense of dejection and pessimism pervaded over the large majority of the students and the beloved teaching community. A number of students were murdered. The cenotaph raised within the College Compounds, dedicated to the deceased, still stands as the silent witness to the gruesome murders of Asim Ganguli, a popular student, right within the premises during those harrowing days. The Student Union elections were not held for years; fear and frustration loomed large over the whole campus.

However, the nightmarish days had eventually come to an end and the academic atmosphere in the campus was gradually restored. The development activities which had been disrupted were taken up again. The Government of West Bengal had earlier sanctioned a substantial amount of money for the "development of facilities for Post Graduate courses in Engineering and Technology at the Bengal Engineering College," vide government of West Bengal Education Department, Technical Branch letter No. 1280-Edn(T)/4C-20/66 Pt. II/68, dated 30th September, 1968, an excerpt of which is given as follows :

In pursuance of the recommendation of the All India Council for Technical Education, the Government of India in their letter No. F.24-20/65-T.2, dated the 31st May, 1967 approved the revised scheme of the introduction of the following Post-Graduate courses at the Bengal Engineering College with an intake of 20 students to each of Civil, Mechanical, Electrical, against the sanctioned annual intake of 100 students and approved Rs. 15.70 lakhs non-recurring and Rs. 14.65 lakhs recurring per year for the first five years.

The details of the subjects had been, (1) Civil Engineering : Structural Engineering, Concrete Technology, Irrigation and Flood Control, Soil Mechanics and Foundation Engineering, Public Health Engineering ; (2) Mechanical Engineering : Gas Turbines, Metal Processing, Heat Transfer, Machine Design and Dynamics of Machine, Gas Dynamics ; (3) Electrical Engineering : Electrical Machines, Power System Analysis, Servo Mechanism, Advanced Electronics ; (4) Applied Mechanics : Hydraulic Machines, Advanced Hydraulics, Fluid Mechanics,

Applied Elasticity ; (5) Metallurgical Engineering : Physical Metallurgy, Process Metallurgy.

The Government of India would bear 100% of the non-recurring expenditure and 100% of the recurring expenditure for the first five years in the first instance of the scheme. The non-recurring grant included substantial amount for the construction of a building. Sanction of the Governor had duly been accorded to the introduction of the revised scheme of post-graduate courses.

Unfortunately, the foundation stone for the proposed building could not be laid down as yet. Out of the 34 new posts of teaching sanctioned for recruitment within 1971, only 16 posts were filled upto 1974. Perhaps the development of Post Graduate studies at the College did not receive adequate favourable inclinations so far as its implementation was concerned. Nonetheless, during the period from 1956 to 1972 as many as 299 students have passed the Master of Engineering degree in different branches of engineering and 17 have been awarded Doctorate degree. In addition, a number of research schemes were sanctioned by the C.S.I.R. (Council of Scientific & Industrial Research — Department of Science and Technology, Govt. of India). The total number of such project during the period was 12 and the number of research papers published were about 250.

Following that period the College continued to draw post graduate students from Industry for Master of Engineering degree as well as for Doctoral course. The field of specialisation were very and wide, and the course on Operation Research, Management, Energy Conversion Technology, Nuclear Engineering and Computer Science were introduced in the post-graduate studies.

The Centenary Alumni House, an important land mark within the sprawling campus of the College, which, at the same time can as well be cited as a prodigious monument of fellow-feelings amongst the ex-students of the College, was constructed through the maguamimous patronage of the Govt. of West Bengal and the helping hands extended by M/S Shalimar Tar Products Ltd., M/S S. N. Roy & Sons, M/S D. P. Kumar, M/S Steelways, M/S Powell & Co, M/S Bengal Construction Co and others. It was inaugurated on the 24th November, 1968 by Dr. Bhabatosh Dutta, the then Secretary, Education Department, Govt. of West Bengal.

During the same year, i.e. in 1968, the Department of Telecommunication Engineering had been established.

One commendable activity of the College during the year 1972 was the setting up of a Review Committee (vide

letter No. 847-Edn (T), dated 19th June, 1972) headed by Prof. B. Sen Gupto, Ex-Director, I.I.T., Madras. The Government thought it was advisable to set up one such Review Committee to have a close look at the present state of growth and the development of the institution in general and to assess the requirements for its future development in particular. Even though the recommendations of the Review Committee had been accepted in principle the translation of the accepted recommendations of the Review Committee into reality has been rather sluggish. However, in March, 1976 and with the grant of Rs. 26.25 lakhs from the Government of West Bengal, vide Order No. 1413-Edn(T), dated 23rd August, 1976, Computer Centre was established in the Department of Electrical Engineering with the installation of TDC-316 Digital Computer in three successive stages. The Computer Centre was formally inaugurated by Rear Admiral Krishan Dev, Chairman and Managing Director, Garden Reach Workshops Ltd., Calcutta in April, 1977.

The Cultrual activities of the students were revived since 1976 through participations in all India competitions inspite of various constraints and limitations. In March, 1977 elections to the Students' Union was held in the College after many years. Now hope for an academic atmosphere sprang up among both students and teachers. Students representations in the Colleg Council, an advisory body to the Princopal in nearly all administrative and academic matter, was granted and later the representation was made permanent.

Prof. D. Banerjee became the Director of Technical Education, West Bengal on 1st June, 1977 and simultaneously held the post of the Principal for some time. He eventually handed over his charges as the Principal to Prof. B. K. Dutta, Professor and Head of the Department of Mechanical Engineering, on the 18th July, 1977. After a few months Prof. P. K. Ray, Head of the Department of Mining Engineering and the first Vice-Principal (Administration) of the College, was appointed as the Acting Principal.

Downing Hostel, which had been the abode, even though temparary for four years or even less, of so many ex-students of the College and with which many a sweet memoirs are attached, ceased to be a students' hostel with effect from 1977.

In the month of September, 1978, natural calamity had struck a severe blow to West Bengal in the form of unprecedented flood. B. E. College, too, could not escape the fury ; a portion of its campus got innundated, with water standing 6 to 7 ft deep at places. Living was rendered miserable without food or drinking water. But the yomen service volunteered spontaneously by the students and the

members of the staff alike helped in mitigating the sufferings of the residents, especially in maintaining a regular supply of fresh water, thus preventing any spread of disease/epidemic in any form. Amidst distress the esprit de corps and the thrill experienced by all had indeed been highly redeeming.

It may be worth mentioning here that the tranquility and the regular academic atmosphere of the College had been shaken once again in 1978 owing to a prolonged agitation by the mess employees. However, the matter was amicably settled as a result of sympathetic handling of the situation by the Government.

Prof P K Roy having reached the age of superannuation, Dr A K Seal, the Head of the Department of Metallurgical Engineering, assumed charge as the Principal of Bengal Engineering College, Sibpur, on the 5th March, 1979.

It may be highlighted that in January/April, 1979 the Computer Centre received a special assistance of Rs. 5.60 lakhs of which Central share was Rs. 4.2 lakhs and State share was Rs. 1.4 lakhs under the direct Central assistance scheme of the Govt. of India, Ministry of Education and Social Welfare for connecting the TDC-316 computer centre with RJE BURROUGH'S 6700 computer system at the Regional Computer Centre, Calcutta.

In addition to that, in September, 1979, in order to initiate the development of Micro-Processor Laboratory in the Computer Centre a grant was obtained from the Government of West Bengal (vide Govt. order No. 1187-Edn(T), dated 20th September, 1978) to acquire the MICRO 78 system. The main objective of this laboratory is to develop real time applications in the Eastern region and to design and develop real time devices/inter phases to suit each dedicated applications. Provisions are being kept for linking the Micro system with the TDC system so that the larger system can also be used for real time applications wherever necessary. Micro-Processor Laboratory has been already functioning and doing very significant work in the various branches of engineering. It is to be noted that in the near future the Micro-Processor is going to have a very big impact in the industry and B E College is destined to train the engineers of this College for the benefit of the industries and the country at large.

To keep pace with the development of Computer Science, the teaching of the technology was introduced as a compulsory subject in the senior under-graduate and post-graduate courses, and the subject of numerical methods and computer programming had been introduced

in all branches of engineering in under-graduate and post-graduate curricula.

A significant change in the composition of the Governing Body of the B. E. College took place when, by a Government notification it was conceded that the President of the Students' Union would, ex-officio, be a permanent representative on the Body; besides, there would be two permanent elective representations from amongst the teaching staff and one from the non-teaching staff.

During the same year, that is in 1979, a Xerox machine was installed in the Journal Section of the Library. Also installed in the College was a 50 KW generator as a measure of captive electrical power supply to the workshops and some other parts of the College. It may be mentioned here that further Government sanction has been obtained for the augmentation of the power supply with another 160 KW generator.

With a view to fostering close co-operation and collaboration between the industries and the college, orientation/refresher courses are regularly arranged. In addition to this, a consultative service cell has been established to deal with the industrial requirement and to bring teachers of this college in direct contact with the industries, thereby improving the teaching methodology to the students. This also helps to expose our students, under-graduate and post-graduate, to the R & D problems of the industries, making the training of the students of this college more fruitful.

The most significant development during the period of 1979-80 was the implementation of 4 years engineering degree course following the introduction of the 10 + 2 school leaving courses as per the national policy. The first batch of the 4 year degree course will come out in the year of 1982 and the last batch of 5 year degree course came out in the year 1981.

It is interesting to note that "Extra Curricular Activity" as a subject has been introduced in the 4 year degree course in order to activate the students' discipline and to involve them in various extra curricular activities and to make them a complete engineer.

In this connection another important step forward is that B. E. College is in the process of introducing part-time Master of Engineering evening courses for the benefit of the aspiring practising engineers in the industry to enhance their knowledge and to increase their qualification in order to keep pace with the latest developments in their field.

A Centre for "Manpower Development in the Micro-

processor Technology in power Sector" has been set up in this institution by the Electronics Commission, Government of India, for which an amount of Rs. 4.80 lakhs has already been sanctioned as a first phase grant. It can hardly be over emphasized in this connection that, this is the first time in the history of this College that such a centre has been set up by the Government of India in the whole of eastern region.

EDITORIAL YARN, TO CONCLUDE

We stop here recounting the B. E. College story, in which we have traced in brief the history of its origin and its subsequent founding on that auspicious 24th day of November, 1856, with 10 students on the roll and 2 teachers on the staff list. No doubt it had been a modest beginning, yet had been supercharged with far reaching promises, proved true over a span of time of a century and a quarter.

With the limited sources and resources available at our disposal as also due to the constraint of the number of pages allotted, this documentation of chronicle of the College compiled and presented in this Souvenir Volume can never be claimed to be complete, comprehensive and/or

fool-proof, but it can certainly be hoped that the exposition, even in the form as it is, will give a good glimpse of the by-gone days since its inception, and the students, teachers and other persons connected at any point of time with this magnificent seat of technical learning would relish reading it.

In the opening line of this yarn we have stated that we stop recounting the B. E. College story; because, thus far and this much we know. There is no doubt that our beloved College will have a far way to go and much much more to yield which posterity shall witness. A technological institution, enjoying a premier position amongst other academies of the similar kind — a pioneer, which has ever been in the forefront in matters relating to engineering education in India, cannot stop short and come to a stand-still with the completion of the 125th year. The College will, traversing from peak to peak of achievements, surely forge gloriously ahead, maintaining its leadership amongst the comity of seminaries in science, engineering and technology, stretching into eternity, or atleast thriving till such time as education will be imparted and research work done on the esoteric areas of knowledge for the benefit of mankind. To us there can be no end of the B. E. College story; it is only that our story-telling has come to an end and so we stop.

3RD YEAR MIN. E. CLASS (NEW REGN.) SECTION—D(Y)

Bhatta, Naw Raj.
 Chakraborty, Bhaskar.
 Chakraborty, Bivansu.
 Dawn, Biswajit.
 Hossein Hassan Zadeh Salmasi.
 Kundu, Ranapratap.
 Mandal, Kallol.
 Mandal, Samarendra Nath.
 Mitra, Goutam.
 Mukherjee, Chanchal.
 Raychaudhuri, Anirban.
 Yadav, Umesh Ray.

3RD YEAR MET. E. CLASS (NEW REGN.) SECTION—D(X)

Banerjee, Manojit.
 Bhattacharyya, Mausumi.
 Das, Siddhartha.
 Dutta, Rabi Sankar.
 Dhua, Sanjoy Kumar.
 Ganguly, Hironmoy.
 Ganguly, Parthapratim.
 Gupta, Amit Kumar.
 Halder, Arunansu.
 Kundu, Amitava.
 Kundu, Nilotpal.
 Majumdar, Apurba.
 Mandal, Ashok Taru.
 Mandal, Sumanta.
 Manna, Indranil.
 Mukherjee, Bhaskar.
 Mukherjee, Nirod Krishna.
 Mukherjee, Pradip.
 Ray, Goutam.
 Ray, Punnya Sloke.
 Saha, Jayanta Kumar.

3RD YEAR ETC. CLASS (NEW REGN.) SECTION—E(X)

Adhikari, Prasanta Kumar.
 Banerjee, Biswadeb.
 Basu, Subhadip.
 Bhanja, Suparna.
 Bhattacharyya, Anup Kr.
 Bhattacharyya, Arup Kr.
 Bhattacharyya, Premendra Nath.
 Biswas, Gautam.
 Chakraborty, Ashok.
 Chakraborty, Subhrojyoti.
 Chatterjee, Sasanka.
 Chatterjee, Sudip Kr.
 Das, Nityananda.
 Ghosh, Shekhar.
 Halder, Biswajit.
 Konar, Amit.
 Mandal, Judugopal.
 Mandal, Subrata Kr.
 Mandal, Swapan.

Mitra, Nidrita.
Mitra, Asish.
Mukherjee, Mihir Kr.
Mukherjee, Satyaranjan.
Pal, Biswajit.
Pal, Ramkrishna.
Ray, Niladrimohan.
Sengupta, Rajat.
Sikder, Prosanna Kr.
Talukdar, Anineya Kanti.

3RD YEAR ARCHITECTURE CLASS (NEW REGULATION)

Banerjee, Saumyen.
Bagchi, Tribeni Prosad.
Bhair, Alope Kumar.
Chatterjee, Sangita.
Chatterjee, Subrata.
Dasgupta, Papia.
Datta, Debksunum.
Datta, Ratul.
Ghosh, Anasua.
Ghosh, Joydev.
Gupta, Aditi.
Jana, Anandagopal.
Kar, Sarbani.
Mukherjee, Dipanwita.
Ray, Enankashekhar.
Sen, Indrajit.

4TH YEAR C. E. CLASS (NEW REGN.) SECTION—A(X)

Adhya, Partha.
Banerjee, Goutam.
Banerjee, Goutam Kr.
Banerjee, Syam Sundar.
Barman, Somenath.
Basak, Siddhartha Sankar.
Basu, Malay Kumar.
Bose, Partha.
Basu, Pradip Kumar.
Bhaduri, Indrajit.
Bharati, Omneth.
Bhattacharyya, Tonmoy.
Bhattacharyya, Tapan.
Bhaumik, Debabrata.
Chakraborty, Amit Kr.
Chakraborty, Asim Kr.
Chakraborty, Biswajit.
Chakraborty, Debabrata.
Chakraborty, Tamal Krishna.
Chandra, Dipankar.
Chaudhuri, Anindya.
Das, Asoktaru.
Das, Sushil Chandra.
Dasgupta, Debasis.
Datta, Atanu.
Datta, Prabir.
Datta, Sudip.
Datta, Swapan Kumar.
Dey, Anup Kumar.
Dey, Dilip Kumar.
Debnath, Pranesh Chandra.
Fayez Ahmad Moh'd Ahmad Noufal.

4TH YEAR C. E. CLASS (NEW REGN.)

SECTION—A(Y)

Ghosh, Saibal.
Ghosh, Sunil Kumar.
Goel, Alok.
Goswami, Subhamoy.
Jhavar, Ashok Kumar.
Kar, Prabir Kumar.
Kumar, Anupam.
Kundu, Pronab Kumar.

Pal, Prabir Kumar.
Patra, Barun Kumar.
Ray, Prithwis Kanti.
Saha, Krishna Das.
Saha, Sumita.
Sengupta, Kausik.

4TH YEAR ARCH. CLASS (NEW REGN.)

Banerjee, Achintya Kumar.
Barman, Jaydip.
Bhaumik, Subir.
Chakraborty, Sudipta.
Chatterjee, Soumitra.
Dasgupta, Kalyanbrata.
De Sarkar, Satyajit.
Ganguly, Sankha Suvra.
Guha, Sanmay.
Kishore Thapa.
Mitra, Anjan.
Naresh Man Singh Amaty.
Ray, Rajat.
Sen, Pradipsankar.
Shrestha, Shesh Krishna.

1981-82

2ND YEAR MASTER OF ENGINEERING (1981-82)

CIVIL ENGINEERING

Chatterjee, Anjan Kumar.
Dey, Ashoke.
Ghosh, Ashoke Kumar.
Jasu, Soumendra Nath.
Saha, Sarat Kumar.
Seth, Sasanka Sekhar.
Umed, Surana.

ELECTRICAL ENGINEERING

Bhadra, Pankaj Kumar.
Das, Amit Kumar.
Das, Buddhadeb.
Ghosh, Suprakash.
Mitra, Swarup.
Mukherjee, Subhasis.

MECHANICAL ENGINEERING

Banerjee, Pradip Kumar.
Dam, Prabhan Kumar.
Pal, Animesh Kumar.
Panja, Pranay Kumar.

E & T C ENGINEERING

Biswas, Dipnarayan.
Chakraborty, Durgapada.
Datta, Atanu Kanti.

APPLIED MECHANICS

Ray, Chitrabhanu.

METALLURGICAL ENGINEERING

Choudhury, Ashis Kumar.
Nandi, Pradip Kumar.

M. T. R. P.

Adhikari, Goutam Baran.
Gupta, Susmita.

2ND YEAR (1980-81)
MASTER OF ENGINEERING
CIVIL ENGINEERING

Alam, Md. Munir.
Acharya, Malay Kumar.
Addy, Uttam Kumar.
Ghosh, Subhendu Kumar.
Kumar, Barun Krishna.
Marik, Pinaki Ranjan.
Pal, Saudas.
Sengupta, Asimanta.

ELECTRICAL ENGINEERING

Banerjee, Rajaram.
Ghosh, Binode Ranjan.
Laha, Asim Kumar.
Ray, Sisir Kumar.
Sinha, Asok.

MECHANICAL ENGINEERING

Basu, Tapan Kumar.
Biswas, Pradip Kumar.
Chatterjee, Sankar Pada.
Dutta Choudhuri, Indrajit.
Maity, Kanchan.
Ghosh, Prabir Kumar.

E & T C ENGINEERING

Barman, Debnath.

M. T. R. P.

Banerjee, Ratna.
Basu, Bhaskar.
Das, Anirban.

Mitra, Daisy.
Mukherjee, Gautam.

1981-82
1ST YEAR
MASTER OF ENGINEERING
CIVIL ENGINEERING

Biswas, Debatosh.
Bhattacharyya, Maniklal.
Chandra, Subhendu.
Chowdhury, Dinesh Chandra.
Ghosh, Partha.
Ghosh, Saibal.
Kar, Subrata Kumar.
Khanra, Chandi Prasad.
Majumdar, Shantanu.
Ray, Purnendu.
Sarkar, Biswajit.
Sinha, Indrajit Kumar.
Sinha, Sontosh Kumar.
Talukdar, Pranab.

ELECTRICAL ENGINEERING

Bandyopadhyay, Partha Pratim.
Bhattacharyya, Goutam.
Das, Nirmal.
Dey, Partha Sarathi.
Ghosh, Partha Sarathi.
Kundu, Palas.
Mukherjee, Subrata.
Paul, Somnath.

Choudhuri, Arindam.
De, Rakha Hari.
Pal, Saibal.

M. T. R. P.

Mukherjee, Goutam.
Pal, Sankar.
Pal, Ujjal Kumar.
Bose, Biswajit.

Present Activities

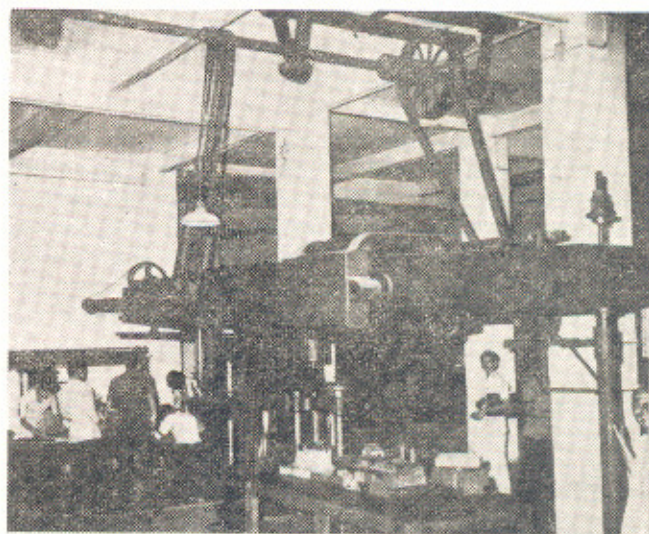

DEPARTMENT OF APPLIED MECHANICS

FACULTY MEMBERS

1. Prof. A. K. Chaudhuri, B.Sc. (Engg.) (B.H.U.), M.S. (Wisconsin), A.M.I.E.;—Professor.
2. Dr. A. Dasgupta, B.E. (Civil) (C.U.), Docteur de Grenoble (France), A.M.I.E.;—Professor.
3. Dr. P. K. Das, Passed Sections A and B (M.E.) of Associate Membership Examination from Institution of Engineers (India), M.S. (Wisconsin), Ph.D. (Jadavpur University).—Assistant Professor.
4. Dr. S. Talapatra, B.E. (Civil) (C.U.), M.E. (Civil) (C.U.), M.I.E. on deputation to I.I.T., Kharagpur.—Assistant Professor.
5. Dr. S. Das, B.E. (Mech.) (C.U.), M.E. (Mech.) (C.U.), D.Phil. (Mech.) (C.U.).—Assistant Professor.
6. Dr. D. Mukherjee, B.E. (Cal.), M.E., Ph.D., A.M.I.E.—Assistant Professor.
7. Shri B. N. Basu, B.E. (Mech.) (C.U.), M.I.E.—Lecturer.
8. Shri S. Sengupta, B.E. (Civil) (C.U.), M.E. (Civil) (C.U.).—Lecturer.
9. Shri D. Sengupta, B.E. (Civil) (C.U.), M.E. (Civil) (C.U.), A.M.I.E.—Lecturer.
10. Shri D. Das, B.C.E. (J.U.), M.E. (C.U.).—Lecturer.
11. Shri A. Ghosh, B.C.E. (Civil) (J.U.), M.E. (Civil) (C.U.).—Lecturer.
12. Shri B. N. Dutta, B.E. (Mech.) (C.U.), M.E. (Mech.) (C.U.).—Lecturer.
13. Shri J. Chakraborty, B.E. (Civil) (C.U.), M.E. (civil) (C.U.).—Lecturer.
14. Shri S. Maji, B.E. (Civil) (C.U.), M.E. (Civil) (C.U.).—Lecturer.
15. Shri T. Pathak, B.C.E.—Demonstrator.

HISTORY OF THE DEPARTMENT

The Department of Applied Mechanics in Bengal Engineering College was established as a separate major engineering department in 1947 on the recommendation of the Re-organisation Committee (1945) with the objective of developing Applied Me-

chanics as a fundamental discipline. In 1953, the Drawing Section was attached to the A.M. Department on the recommendation of the Review Committee (1953) and the department was renamed as the Department of Applied Mechanics, Graphics and Drawing.

Since the small beginning of the department in 1947, there has been a considerable amount of expansion of activities in different fields. As regards laboratories, the department started only with two laboratories, viz., Hydraulics and Strength of Materials with limited facilities. Since then, the Hydraulics Laboratory has been developed much and a new Experimental Stress Analysis Laboratory with the provision for carrying out experiments on Photoelasticity has been developed. At present the department offers courses in 17 Under-graduate and 18 Post-graduate subjects with a teaching load of 620 hours and a staff strength of 32 including the Drawing Section. Up-till now the department has turned out about 55 Nos. of Master of Engineering and 5 Nos. of Ph. D. degree holders. Approximately 55 Nos. of research papers have been published from the department since 1947.

AIMS AND DISCIPLINES OF STUDIES AND RESPONSIBILITIES OF THE DEPARTMENT

Apart from offering various courses in under-graduate level, the department is entrusted with running the post-graduate curriculum in various fields of specialization. The aim of the whole discipline is to train students who can make a unified approach to the solution of advanced problems in solid and fluid mechanics as encountered mainly in Civil and Mechanical Engineering. The students are en-

couraged to attempt a rigorous analysis of the problems without making empirical simplifications much common to practising engineers. Thus, the students are trained to be Engineer Scientists who may be able to apply various techniques of experimental and theoretical mechanics to solve problems which may be inter-disciplinary in nature embracing more than one branches of engineering.

In recent times, there has been extensive developments in the areas of fluid controls and drives which are covered under the name of Fluidics. The field of Fluidics is developing very fast with ever increasing scope of application in industries. The field of Hydraulic Machines as developed in this department is, therefore, a broad-based one and can hardly be covered under the field of Turbo-machinery.

RESEARCH PROGRAMME OF THE DEPARTMENT

At present post-graduate activities are going on in different fields of specialization in the department and a number of Ph.D. theses have been sponsored circumventing problems including Stress Concentration around holes in plates; Analysis of plates and shells with mixed boundary conditions; Analysis of glassfibre re-inforced plastics by Photoelasticity; Pressure variation along the pump and turbine blades in Stationary and Rotating Conditions; Investigation of steady and unsteady unconfined ground-water flow phenomena through Hele-Shaw analogy; Magneto Hydrodynamics Power Generation; Transportation of solid through pipe lines, and Power Generation from sea-wave.

COURSES OF STUDY

The Department of Applied Mechanics is at present entrusted with offering lecture and laboratory courses in Applied Mechanics subjects in both Undergraduate and Post-graduate levels and also the Drawing subjects in Under-graduate Curriculum.

POST-GRADUATE ACTIVITIES

The department is carrying on its Post-graduate

activities on the following field of specialization : (a) Applied Elasticity; (b) Fluid Mechanics; (c) Hydraulics; and (d) Hydraulic Machines and Systems.

INTERACTION BETWEEN INDUSTRY AND THE DEPARTMENT IN THE FIELD OF CONSULTATIVE SERVICE

The department has undertaken various types of consultative jobs of the State and Central Governments and Undertakings and important industries in the country.

ARCHITECTURE, TOWN AND REGIONAL PLANNING

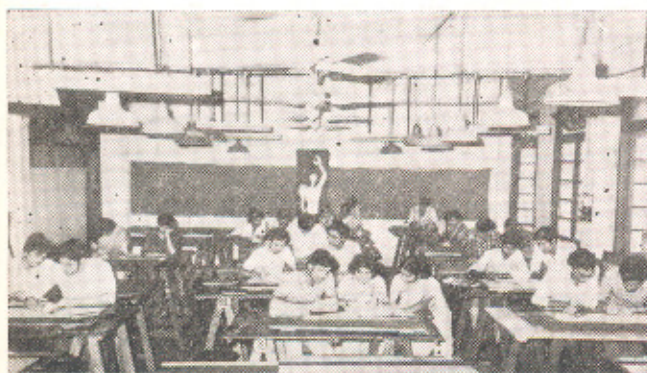

FACULTY MEMBERS

1. Prof. A. K. De, B.E. (Civil), Dip. T. P. (Manchester), F.I.E., F.I.T.P., F.R.T.P.I.; Professor of Town & Regional Planning, & Vice-Principal (Admn.)—Town Planning, Housing.
2. Prof. K. K. Palchaudhuri, B.Arch. (Cal.), M.Tech. (I.I.T. Kgp.), A.I.I.A., A.I.T.P., Assoc. Member of Regional Science Assocn. of India. Professor of Town & Regional Planning—Arch. Design and Settlement Plng., Urban Design and Urban Renewal.
3. Prof. Jaydev Sarkar, B.Arch. (Cal.), M.Arch. (Cal.), D.T.R.P. (Cal.), M.T.R.P. (Cal.), A.I.I.A.; Professor of Architecture, & Head of the Deptt.—Human Settlements and Rural Housing in Specific environmentally stressed area, History of Indian Architecture & Plang.
4. Prof. C. L. Chakraborty, B.Arch. (Cal.), M.Arch. (I.I.T. Kgp.), D.T.R.P. (Cal.), Member of Council of Architecture; Asstt. Prof. of Town & Regional Planning—Architecture & Plang., History of Arch., Climatology, Social aspects of Human Settlements, Rural Settlement Planning.
5. Prof. D. P. Mallick, B.Arch. (Cal.), M.Arch. (British Columbia), D.T.R.P. (Cal.); Asstt. Prof. of Architecture—Architectural Design, Housing, Urban Design, Environmental Psychology.
6. Prof. S. C. Set, B.Arch. (Cal.), M.C.P. (I.I.T. Kgp.); Asstt. Prof. of Town & Regional Planning—Landscape Architecture, Architectural Design, Environmental Design and Urbanscape.
7. Mrs. M. Halder, B.Arch. (Cal.), M.C.P. (I.I.T. Kgp.), A.I.T.P., Member of Inst. of Public Admn.; Lecturer in Town & Regional Planning—Architectural Design, Urban Design, Urban Planning.
8. Mr. C. Mitra, B.Arch. (J.U.), M.Arch. (I.I.T. Kgp.), Member of Council of Architecture; Lecturer in Architecture—Building System & Management.

HISTORY OF THE DEPARTMENT

The Department was started in July, 1949, on the recommendations of the Special Committee appointed by the Government of West Bengal for the re-organisation and development of the College. B. Arch. Degree Course was started in July, 1949 and part-time post-graduate D.T.R.P. Course was started in December, 1949. In fact, both the Courses were started for the first time in the country in this college.

The Department made a quiet beginning under the guidance of its own staff members and visiting staff, mainly drawn from practising Architects of Calcutta. The Department owes considerably to Mr. B. F. Mathews, Mr. B. N. Chaudhuri and Mr. K. A. Kirtikar for the efforts and contributions they made during the start.

During the last thirty-two years the Department had experienced considerable progress under the able leadership of Prof. J. A. Stein, Prof. E. Sacriste, Prof. J. A. Cordes, Prof. G. K. Paknikar, Prof. A. K. De and Prof. K. K. Palchaudhuri. The students of this Department received valuable guidance from Prof. R. Bose, Prof. D. Aichbhowmic, Prof. S. Banerjee, Shri S. C. Mukherjee and Shri G. C. Roy during this period. During mid-fifties the Department had been fortunate in having valuable assistance by Guest Professors like Prof. T. L. Hansen, Prof. R. C. Marshall, Prof. R. F. Olwell and Prof. Cutler.

COURSES BEING OFFERED

The Department is running at present the following Courses under the University of Calcutta :

- (1) 4-years' Degree Course in Architecture (B. Arch.).
- (2) 2-years' full time Master's Degree Course in Town & Regional Planning (M.T.R.P.).
- (3) 2-years' part-time post-graduate Diploma Course in Traffic and Transportation Engg. (D.T.T.E.).

There is provision for Master of Architecture and Ph.D. (Engg.) in Architecture both of the Calcutta University by submitting thesis only.

RESEARCH ACTIVITIES & CONSULTATIVE SERVICES

The Department has so far undertaken following research programmes during last three decades :

Research on 'Low Cost Housing' was undertaken during early fifties, several designs of houses suitable for tropical urban areas were developed with a view to reducing the cost.

The Department, in collaboration with Dept. of Applied Mechanics participated in demonstration of two low-cost houses as a part of West Bengal Exhibition at the International Exhibition held in New Delhi in 1954. The design for the Urban House was selected by The International Federation of Housing and Town Planning, submitted by B.E. College, as being the best house for hot-humid climate at the Exhibition.

During 1955-56, study on selected problem areas in the City of Calcutta was undertaken, the most important of such areas was the approaches to the Howrah Bridge on both sides of the bridge. The approach on the Calcutta side was studied in detail and an advisory scheme was also prepared.

An extensive programme of research on the 'Open spaces in Calcutta—their problems and prospects' was taken up highlighting the existing conditions and an advisory proposal for the whole city.

In the decade of sixties the Department was entrusted with preparation of plans for Durgapur Engineering College, Kalyani University and North Bengal University. The Department prepared design for an experimental building with pre-fabricated components within the College-campus (Netaji-Bhawan) and the project was implemented with financial assistance of National Building Organisation, New Delhi.

Planning for four Growth Centres at Durgachak, Kalyani, Kharagpur and Farakka was entrusted to the Department by Development and Planning Deptt. (T. & C.P.) Govt. of West Bengal in 1978. Department of Local Govt. & Urban Development, Govt. of West Bengal has now entrusted this Department with survey work and preparation of Landuse Maps of six District Towns of West Bengal—Midnapore, Suri, Darjeeling, Balurghat, Jalpaiguri and Malda. The Department is actively participating in research activities of Rural Housing Wing (Eastern Region), an unit of National Building Organisation, Delhi, housed in this college.

A society of students of Architecture, Town & Regional Planning has been functioning since 1952 for extra-curricular activities which includes conducting Annual Educational Tour, arranging film-shows on Architecture etc. A journal is published by the society which includes contributions from the students, faculty members as well as practising architects. The students have been participating in Annual Convention of National Association of Students of Architecture (N.A.S.A.) every year hosted by different institutions in turn. The Department has so far hosted two such conventions during last three decades. The performance so far made by our students in the conventions has been worth-mentioning.

INTERACTION BETWEEN PROFESSIONAL FIELD AND THE DEPARTMENT

The staff members of this Department have acted as consultants for various organisations in private as well as Government sectors. With a view to initiate interaction between professional field and the Department, a large number of Visiting Lecturers (Practising Architects and Architects working in various organisations in the city) are appointed to take lectures in the various subjects for the different years.

DEPARTMENT OF CHEMISTRY

FACULTY MEMBERS

1. Dr. G. C. Basak, M. Sc. (Cal.), Ph.D. (London), Fuel Chemistry; Head of the Deptt.—Metallurgical Analysis.
2. Professor—Vacant—Prof. of Physical Chemistry.
3. Professor—Vacant—Thermodynamics & Physical Chemistry.
4. Dr. S. K. Srimany, M.Sc. (Cal.), D.Phil. (Cal.); Asst. Prof.—Fuel Chemistry & Physical Chemistry.
5. Prof. A. Haldar, Asst. Prof.—Refractories, Physical and Industrial Chemistry.
6. Shri S. N. Ghosh, Lecturer—Industrial Chemistry, Physical Chemistry.
7. Shri P. De, Lecturer—Instrumental Methods of Analysis and Physical Chemistry.
8. Shri A. T. Dutta, M.Sc. (Benaras), Demonstrator—Practical Classes in Chemistry.
9. Shri S. K. Pakrashi, M.Sc. (Dacca); Demonstrator—Practical classes in Electrometallurgy, Thermodynamics and Metal Analysis.

HISTORY OF THE DEPARTMENT

The Department of Chemistry has its origin since the establishment of this College and was known then as Department of Chemistry, Metallurgy and Geology. In 1965, when the Department of Metallurgy was separated as a fullfledged department and Geology section was tagged with Mining Department, the Chemistry Department also came into being as a new department. The need for this separation was felt for a long time for the better functioning and development of each. According to the recommendations of the Reviewing Committee and in fulfilment of the new regulations under the five-year integrated Engineering Courses the department expanded manifolds from its staff strength of one Asstt. Professor and one Asstt. Lecturer as existed in 1948.

The department, in its present expanded form, has the following well-equipped Laboratories :

- (1) Junior Chemical Laboratory.
- (2) Senior Chemical Laboratory.
- (3) Fuels and Refractories Laboratories.
- (4) Physical Chemistry and Electro-metallurgical Laboratories.

POST-GRADUATE PROGRAMME

Till 1969 this department was teaching Chemistry at P.G. level to Metallurgical Engineering students. It has since been discontinued and a new course in Sanitary Chemistry is being offered to Civil Engineering students at P.G. level.

Research work in the following fields by research scholars and members of the staff are being carried out since 1950 and a number of papers have been published :

- (1) Electrochemical Properties of Colloides.
- (2) Synthetic Organic Chemistry.
- (3) Medicinal Plant Chemistry.
- (4) Fischer-Tropsch Synthesis.
- (5) Constitution of Assam Coals.

PROPOSED DEVELOPMENT PROGRAMME

Proposals have been submitted for introduction of Post-Graduate Diploma Courses in :

- (1) Technology of High Polymers.
- (2) Fuel Technology.

ACTIVITIES OF THE DEPARTMENT SINCE THE CELEBRATION OF THE CENTENARY IN 1956.

Research :

Research activities were performed in the fields of:

- (1) Different aspects of Metallurgy by Dr. G. P. Chatterjee and his co-workers.

(2) Soil Chemistry and Corrosion of Metals by Dr. B. Chatterjee and his co-workers.

(3) Synthetic liquid Fuels and Constitution of Coal by Dr. G. C. Basak and Prof. N. C. Neogi.

(4) Plant Chemistry by Prof. S. R. Bhattacharjee.

Large number of research papers in the above fields were published in various journals.

Dr. G. P. Chatterjee left the Department in 1957 on a higher assignment in the Durgapur Steel Plant and Dr. B. Chatterjee took over as Head of the Department of Chemistry, Metallurgy and Geology.

The Department of Chemistry, Metallurgy and Geology as existed till 1964 was split into independent Departments of Chemistry and Metallurgy and the Geology section was merged with the Mining Department.

It is sad to reflect that the decline in research activity of the Chemistry Department started from 1958 when the members of the teaching staff were brought under Education Service from the General Service and thus were transferable. The new members of the staff which started coming and leaving at an interval of 2 to 3 years did not develop any attachment or allegiance to the Department and so research activities were pursued only by those who were left untouched. But even then research activities in the fields of Soil Chemistry, Corrosion of Metals, Synthetic Liquid Fuels and Plant Chemistry were continued with some vigour till the sudden death of late Dr. B. Chatterjee in December, 1967. Dr. G. C. Basak ultimately took over as Head of the Department of Chemistry.

Two research workers, Dr. Mahitosh Sarkar, Dr. (Mrs.) Chhabhi Bhattacharjee (Chatterjee) and one member of the staff, Dr. S. R. Bhattacharjee were awarded Ph.D. (Sc.) Degree of the University of Calcutta.

With the joining of Dr. B. K. Chatterjee, research work in field of Solvation Mechanism of Metallic Soap in mixed Organic solvents was initiated along with Shri S. K. Pakrashi, Demonstrator of the Department of Chemistry and several research papers were published.

In the year 1981 Shri S. Gangopadhyay, formerly Lecturer in Chemistry of this Department obtained the Ph.D. (Sc.) Degree of the University of Calcutta for his work on Vitamins.

Political turmoil and student unrest during the period of 1970-75 brought almost practically the research activities to a stand still.

Spot Light on 5-year and 4-year Courses

The introduction of 5-year integrated course in 1960 saw a marked expansion of the Department

when from that year the Department had to cater to more than 800 students in the 1st and 2nd year classes. A new Junior Chemical Laboratory was added to the existing set up. A large number of modern equipment were acquired for student's work and research.

With the re-introduction of 4-year degree course in Engineering in 1978 the Chemistry Department has shrunk both in size and strength considerably. Its total space has almost halved and the staff strength has also decreased considerably.

The staff strength has further depleted with the transfer of Dr. S. C. Chakraborty, formerly Prof. of Chemistry and the retirement of the Dr. B. K. Chatterjee, formerly Assistant Professor of Chemistry. Chatterjee, formerly Assistant Professor of Chemistry.

To rejuvenate the Department and expand its activities, attempts were made to introduce B. Sc. (Hons.) course in Chemistry and also M. Sc. in the same subjects. The Government at that time (1966-67) showed some interest in the matter. But for reasons not yet known, the scheme did not materialize. It is felt even now that the Chemistry Department will gain in status and importance only when the above courses are introduced.

It is experienced that if the staff of the Department is strengthened to a certain extent and the space originally occupied by the Department is restored, there will be no difficulty in implementing the above scheme.

EXISTING STAFF PATTERN OF THE DEPARTMENT

At present the Department consists of 1 (one) Professor, 4 (four) Assistant Professors and Lecturers and 2 (two) Demonstrators.

COURSE COVERT

At present the following courses are covered by the Department :—

Chemistry—1st Year students (all sections);

Metallurgical Thermodynamic and Kinetics—2nd year Met. E.

Fuels and Refractories—2nd year Met. E.

Metallurgical & Instrumental Analysis—2nd year Met. E.

Principles of Electrometallurgy—3rd year Met. E.

To conclude, another point which should be stressed is that the members of the teaching staff of this Department should again be placed under the General Service as in the Engineering Departments of the College in order to remove the feeling of second grade citizenship in our staff and thus developing some sense of loyalty, allegiance and attachment to the College among the members of the staff of the Department.

DEPARTMENT OF CIVIL ENGINEERING

FACULTY MEMBERS

1. Prof. S. C. Nandi, B.E. (Cal.), M.E. (Cal.), Professor & Head—Structural Engg.; Irrigation Engg.
2. Dr. S. P. Brahma, B.E. (Cal.), M.S. (Wis.), Ph.D. (Purdus, U.S.A.); Professor—Soil & Foundation Engg.; Highway Engg.
3. Dr. J. M. Kar, B.E. (Cal.), M.Tech., Ph.D. (IIT Khrgh.); Professor—Structural Engg. including Concrete Technology, Transportation Engg.
4. Dr. S. Chakraborty, B.E. (Cal.), M.E. (Cal.), Ph.D. (Cal.); Assistant Professor—Structural Engg.; Construction Management.
5. Prof. S. K. De, B.E. (Cal.), M.E. (Cal.); Assistant Professor—Structural Engg.
6. Prof. S. Saha, B.E. (Cal.), M.E. (Cal.); Assistant Professor—Soil & Foundation Engg.
7. Prof. P. G. Bhattacharya, B.E. (Cal.), M.E. (Cal.); Assistant Professor—Traffic & Transportation Engg. Highway Engg.
8. Dr. S. Dasgupta, B.E. (Cal.), M.E. (Cal.), Ph.D. (Miss., U.S.A.); Assistant Professor—Structural Engg.; Solid Mechanics.
9. Dr. P. K. Roy, B.E. (Cal.), M.E. (Cal.), Ph.D. (Roorkee); Assistant Professor—Geodesy & Photogrammetry; Construction Management.
10. Dr. P. K. Gayen, B.C.E. (JU), M.E. (NBU), Ph.D. (NBU); Assistant Professor—Structural Engg.; including Conc. Tech.; Environmental Engg.
11. Prof. B. C. Chatterjee, B.Sc. (Hons.), B.C.E. (JU), M.Sc. Engg. (K.U.); Assistant Professor—Soil & Foundation Engg.
12. Prof. Amal K. Datta, B.E. (Cal.), M.E. (Cal.); Assistant Professor—Environmental Engg.
13. Prof. Saibal K. Ghosh, B.E. (Cal.), M.E. (Cal.); Assistant Professor—Structural Engg.; Solid Mechanics.
14. Dr. R. K. Datta, B.E., M.E. (Cal.), Ph.D. (IIT, Khrgh.); Lecturer—Structural Engg., including Concrete Technology.
15. Shri T. K. Datta, B.E. (Cal.), M.E. (Cal.); Lecturer—Water Resources Engg.
16. Shri S. K. Sarkar, B.E. (Cal.), M.E. (Cal.); Lecturer—Structural Engg.

17. Shri Amalendu Ghosh, B.E. (Cal.), M.E. (Cal.); Lecturer—Soil & Foundation Engg.

18. Shri Pranab K. Lai, B.E. (Cal.), M.E. (Cal.); Lecturer—Irrigation Engg.; Structural Engg.

HISTORY OF THE DEPARTMENT

The Department of Civil Engineering is the oldest department of the College. In fact, the College was founded on the 24th November, 1856 with the name of "Civil Engineering College" and even as late as 1931, the Civil Engineering Department was the only department offering a degree course. Starting with 10 students and an Instructive staff of 2 in 1856, the Department has grown over the years. In 1957, to cope with the increased demand for Civil Engineers, the annual intake of undergraduate students to the Department was fixed to be 120. Later, in view of the prevailing recession, the Review Committee (1972) recommended a reduction of annual intake to 90. The number of postgraduate students admitted per year is 20. The present sanctioned strength of faculty members is 31 and that of Technical and Laboratory Assistants is 12.

FACILITIES AVAILABLE

Laboratory facilities are available in the following fields :

- (i) Structural Engineering,
- (ii) Concrete Technology,
- (iii) Soil Mechanics and Foundation Engineering,
- (iv) Public Health Engineering,
- (v) Highway Engineering.

In addition, having free access to B.E. College Computer Centre, the Department has a MICRO 2200 (Hindustan Computers) of its own.

DISCIPLINES OF STUDIES

The Department is imparting a broad-based undergraduate education in Civil Engineering encompassing the following fields :

- (i) Structural Engineering,
- (ii) Soil Mechanics and Foundation Engineering,
- (iii) Transportation Engineering,
- (iv) Water Resources Engineering,
- (v) Environmental Engineering,
- (vi) Surveying and Geodesy,
- (vii) Construction, quantity Surveying and Valuation,
- (viii) Port, Dock and Harbour Engineering,
- (ix) Project Organisation and Construction Management,
- (x) Numerical Methods and Computer Programming.

Postgraduate Degree Courses are offered in the following fields :

- (i) Structural Engineering,
- (ii) Concrete Technology,
- (iii) Soil Mechanics and Foundation Engineering,
- (iv) Water Resources Engineering.

A part-time postgraduate Diploma course in Traffic and Transportation Engineering is also run by the Department. The Department offers basic facilities for research work leading to Doctoral degree in Engineering.

RESEARCH PROGRAMME

The members of the faculty and postgraduate students are engaged in research on various aspects

of Civil Engineering. The following list indicate the areas in which the research work is currently progressing or has been undertaken in the recent past.

STRUCTURAL ENGINEERING

Computer based analysis of various structural forms; Analysis of Curved Box girder; Finite Element Analysis of Slab bridges of arbitrary shapes, Annual Chimney foundation on elastic subgrade, Flat slabs, Shear walls; Contact stress problems of elastic bodies; Optimisation of structural design; Stability studies; Study of dynamic response of structures:

CONCRETE TECHNOLOGY

Fibre-reinforced Concrete, Anchor zone stresses in Prestressed concrete members, Shear strength of Prestressed concrete beams, Strength of R.C. articulated beams, Torsion in prestressed concrete beams.

SOIL MECHANICS AND FOUNDATION ENGINEERING

Pile-soil interaction; Mat foundation on elastic soil; Three-dimensional Consolidation of soil, Settlement and Strength study of cohesionless soils, Earth pressure on Retaining Wall with shelf, Geotechnical Investigations for co-relation of different soil parameters; Dynamic behaviour of embedded footings.

TRAFFIC ENGINEERING

Investigation of Passenger Car Equivalents at Controlled intersection in Calcutta, Study of Clearing Speed at Timesharing Intersections in Calcutta.

WATER RESOURCES ENGINEERING

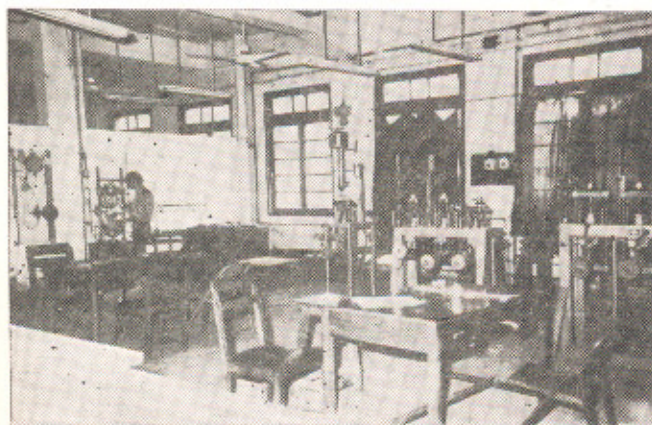

Computerised solution of canal design problems, Study.

GEODESY

Absolute orientation of Indian Geodetic system by gravimetric method.

INTERACTION BETWEEN INDUSTRY AND THE DEPARTMENT IN THE FIELD OF CONSULTATIVE SERVICE

In pursuance of the belief that the quality of engineering education is enriched by continued contact and collaboration between teaching institutes and industry, the department undertakes R & D projects for the industry. Faculty members offer their expertise in the form of consultancy to various Government agencies and Engineering concerns. Some of these works are in collaboration with other departments of the College and the Computer Centre. The

following list indicate some of the works undertaken by the faculty members of the Department.

- (i) Computer analysis of Industrial Building frames for Dastur Co.,
- (ii) Development of Computer programme for Analysis & Design of Ropeway for Usha Breco,
- (iii) Analysis of multi-storeyed building frame for P.&T. Dept., Govt. of India,
- (iv) Checking of Finite Element Analysis of Interchange Slabs of 2nd Hooghly Bridge for Calcutta Improvement Trust,
- (v) Structural Analysis of Howrah Fish Market Building-Complex for Architects Collaborated,
- (vi) Load testing of floor of a completed multi-storey apartment house,
- (vii) Investigation of stressing of structural members due to foundation settlement,
- (viii) Field study of a factory foundation on expansive clay,
- (ix) Improving the inlet condition of large drainage pumps,
- (x) Investigation and elaborate Soil Study in connection with different projects such as Belgharia Express Highway, State Bank Buildings at Andaman and Rourkela, MAMC Colony at Durgapur, 400 KVA Line near Bilaspur for M.P. State Electricity Board etc.

Routine laboratory tests of soil, cement, concrete and some other materials are undertaken by the Department, as also non-destructive field test of concrete. In addition, requests for any special tests for which facilities are available in Departmental laboratories, are entertained as far as possible.

OTHER LEARNED ACTIVITIES

The Department has organised a Winter School on Tunnel Engineering in 1975 and a Winter School on Geotechnical Investigation and Practices in 1981 for Civil Engineering College Teachers, both of which were sponsored by Indian Society for Technical Education. The faculty members of the Department have also been active in organisation and teaching in connection with various courses, workshops and seminars for practicing engineers in different forums, e.g.

- (i) Orientation Course on Computer Methods in Engineering offered by B.E.C. Computer Centre,
- (ii) Orientation Course on Computer Methods in Structural Analysis offered by B.E.C. Computer Centre,
- (iii) Orientation Course on Finite Element Method offered by The Institution of Engineers (India), West Bengal State Centre,

(iv) Orientation Course on Foundation Engineering offered by The Institution of Engineers (India), West Bengal State Centre,

(v) Continuing Education Course on Foundation Engineering offered by Jadavpur University,

(vi) Continuing Education Course on Finite Element Analysis for Engineering Structures offered by The Institution of Engineers (India), West Bengal State Centre,

LEARNED SOCIETY ACTIVITIES

The Society of Civil Engineers is an association of students of the Department to promote professionalism among its members. In addition to bringing out an annual technical journal, 'The Civil Engineer', the Society organises seminars by inviting eminent engineers as guest speakers, arranges visit to important construction sites and makes engineering models for annual exhibitions.

From 1980, by an arrangement with The Institution of Engineers (India), a member of the Society automatically becomes a member of the "Students Chapter" of the Institution.

SURVEY CAMPS

The Department is still following its old time-honoured tradition of having an Annual Survey Camp for its prefinal year undergraduate students where they have a taste for rugged outdoor life under tents and experience of working in field conditions. The success of these camps, to a large measure, are due to unflinching help and co-operation from many of our alumni and other engineers, and one of the desirable features of the camps is the contact between the present students and the professional engineers of the locality.

IMPROVEMENTS CONTEMPLATED

The Department has plans for expansion of its laboratory facilities. Several equipment such as 'Soil Exploration Outfit', 'Static Penetration Test Apparatus', 'Consolidation Test Apparatus (3 Gang)', 'Motorised Unconfined Compression Test Apparatus' have been recently purchased for the Soil Mechanics Laboratory and the whole of the first floor area of Block IX has been made available to the Soil Laboratory, while the Public Health Engineering Laboratory has been shifted to the third floor of the same Block. New equipment such as 'Standard Demineraliser', 'Hellig Turbidimeter', 'Colony Counter' are being purchased for P.H.E. Laboratory. The condition of the shed where the Structural Engineering Laboratory is presently housed is poor and the space is inadequate. Plans have been prepared and submitted for a new extended building at the same site which can house a Laboratory suitable for our present needs.

COMPUTER CENTRE

HISTORY OF THE DEPARTMENT

In March, 1976, the Government of West Bengal, Education Department, sanctioned an amount of Rs. 26.25 lakhs for the purchase of a TDC-316 Digital Computer (to be procured in three successive stages; of configuration as in Appendix I) for Bengal Engineering College with the following considerations :

(a) As demanded by the technological developments in recent years, the teaching of Computer Science and technology be introduced as a compulsory subject in the senior-undergraduate and post-graduate courses in Electrical and Electronics Engineering branches, and a subject on Numerical Methods and Computer Programming be introduced in all branches of engineering in the undergraduate and post-graduate curricula.

(b) The current orientations of some Project works in the final year undergraduate curriculum, and thesis in the Master of Engineering and Doctoral level call for the need of a digital computer as an essential equipment for this College.

(c) To foster close collaboration between industries and this College through Orientation/Refresher Courses, Consultative Services, etc., so that such collaboration may (i) bring teachers of this College in direct contact with the industries, thereby improving the instructions imparted by them; (ii) expose our students—undergraduate and post-graduate—to the R. D. & D. problems of the industries making their training in this College more fruitful.

A Computer Centre was set up in a small space (about 1 000 s. ft.) in the Electrical Engineering Department of this College, and the TDC-316 Digital Computer was formally handed over to the College in February, 1977. A Working Group consisting of a Professor-in-Charge and eight teachers (from all the major engineering Departments and the Department of Mathematics of this College) was formed. The members of the Working Group were sent for in-plant training on the operation of the TDC System at the Electronics Corporation of India Ltd., Hyderabad. It was envisaged that (i) the operation of the system will be restricted to the members of the Working Group; (ii) the members of the Working Group would act as Programme-Consultants to the U.G. and P.G. Students, and the teachers of this College.

The Computer Centre was formally inaugurated by Rear-Admiral Krishan Dev, Chairman and Managing Director, Garden Reach Workshops Ltd., Calcutta in April, 1977.

In January/April, 1979, the Centre received a special assistance for the total amount of Rs. 5.60 lakhs (Central share : Rs. 4.20 lakhs, State Share : Rs. 1.40 lakhs) under the Direct Central Assistance Scheme of Government of India, Ministry of Education & Social Welfare, for connecting the TDC-316 Computer System as RJE to the Burrough's 6 700 Computer System at the Regional Computer Centre, Calcutta. The feasibility of the project was studied in consultation with the Regional Computer Centre, Calcutta, and the Electronics Corporation of India Ltd., Hyderabad. It was decided to obtain following hardware for this purpose : Hardware Bootstrap Loader (ROM/RAM), Memory Allocation/Protection Unit, EBCDIC Options for Card Reader and Line Printer, System Clock, Business Emulator, CRT and Communication Controller. The object had been that (i) a batch of jobs can be entered through the Card Reader at B.E. College and passed on to B-6 700 system for processing; and the output can be printed on the Line Printer of TDC-316, the channel of data transfer being through a pair of dedicated telephone lines; (ii) direct communication can be had with the Burrough's System in an interactive mode whenever TDC-316 is not functional; (iii) FORTRAN IV and COBOL can be run under DOS independently on TDC-316 System.

The job of supplying the Hardware and Software was entrusted with the ECIL. The Regional Computer Centre kindly supplied the protocols of the Burroughs System in order that the necessary communication interface for the TDC-system can be developed.

The necessary hardware for RJE, except the two data—Modems which are to be imported, have already been supplied by the ECIL. It is expected that the RJE will be in operation by the end of the present financial year.

In September, 1979, a grant amounting to Rs. 9 500/- only, for the purchase of INTEL Microprocessor Kits was sanctioned by the Government of West Bengal, to initiate the development of the Microprocessor Laboratory in the Centre. Thereafter, the Centre also acquired a MICRO 78 System and two members of teaching staff of this College were sent for training on Microprocessors/Mini-Computer at the Electronics Corporation of India Ltd., Hyderabad.

The main objective of this Laboratory is to develop real time applications in the Eastern Region and design/develop real time devices/interfaces to suit each dedicated application. Provisions are being kept for linking the MICRO System with the TDC System so that the larger system can also be used for real time applications whenever necessary.

The Government of West Bengal, Education Department created on a permanent basis the following posts for the Computer Centre in July 1979/April 1980 :

A. TEACHING :

- (i) One Assistant Professor, in the scale of Rs. 1200-50-1300-60-1900/- plus admissible allowances,
- (ii) Two Lecturers, in the scale of Rs. 700-40-1100-50-1600/- plus admissible allowances.

B. SUPPORTING :

- (i) One Punch Operator-cum-Verifier, in the Scale of Rs. 375-10-415-15-610-20-650/- plus usual allowances.

The recruitment against the above mentioned posts have been taken in hand.

Apart from above, the Centre has been granted a Temporary post of Helper & Cleaner (Group IV Staff) by the Principal, B.E. College.

The West Bengal Government has sanctioned the following recurring expenditures against the maintenance of the Computer System, and other equipment of the Centre :

- (a) Maintenance of the T.D.C. 316 Digital Computer : Not exceeding Rs. 59,000/- per year;
- (b) Maintenance of Alphabetic Card Punch Machines (off-line) : Not exceeding Rs. 7,000/- per year;
- (c) Maintenance of Window type Air Conditioners : Rs. 3,000/- per year.

Total : Rs. 69,000/- per year.

IMPORTANT ACTIVITIES

Important activities of the Centre, since its inception, are summarised below. It may be of interest

to note that these activities have been due to the untiring effort of the Working Group and about fifteen more teachers of various Departments of this College, and ancillary supports from the College Office, Electrical Engineering Department and the College Press.

ORIENTATION/REFRESHER COURSES

(a) "Computer Methods in Engineering"—held from May 30 to June 19, 1977. There were 25 no. of participants, sponsored from the following organisations : Military Engineering Service, Shillong; S. K. Dadina, Calcutta; Howrah Improvement Trust; The Calcutta Electric Supply Corporation Ltd.; Dunlop India Ltd., Hooghly; Mecon Ltd., Ranchi; C.M.P.D.I., Ranchi; C.M.P.D.I., Dhanbad; Indian School of Mines, Dhanbad; Public Works Department (Roads), Calcutta; Tripura Engineering College, Agartala; Calcutta Telephones; Garden Reach Shipbuilders & Engineers Ltd., Calcutta; Damodar Valley Corporation; Makintosh Burn Ltd.,

(b) "Computer Techniques and Operational Research Concepts"—held from November, 24 to December, 23, 1978 with 15 participants sponsored from the following organisations : Directorate General, Ordnance Factories, Calcutta; Jiwani Engineering Works (P) Ltd., Calcutta; International Marketing Corporation, Calcutta; Howrah Improvement Trust; Garden Reach Shipbuilders & Engineers Ltd.; C.M.P.D.I., Ranchi; Bridge & Roof Co., Howrah; Special Bridge Cell, P.W.D., West Bengal; Highway Design Division, P.W. (Roads) Deptt., West Bengal; Indian School of Mines, Dhanbad.

(c) "Computer Methods in Structural Analysis"—held from November 24 to December 23, 1978, with 19 participants from : S. Sarkar & Associates, Calcutta; United Engineering Construction, Calcutta; MECON, Ranchi; Hindusthan Motors Ltd., West Bengal; P.W.D., West Bengal; Bridge & Roof Co. (I) Ltd., Howrah; Jessop & Co. Ltd., Calcutta; P. W. (Construction Board) Deptt., West Bengal; C. M.P.D.I., Asansol; Post & Telegraph Engineering (Civil) Deptt., Eastern Region; Howrah Improvement Trust; West Bengal State Electricity Board.

CONSULTATION SERVICES

Consultation Services on Research, Design and Development problems have been extended to the following organisations: M.N. Dastur & Co.; Usha Breco Ropeways Limited; Public Works (Electrical) Deptt., West Bengal; Post & Telegraph Engineering (Civil) Deptt., Eastern Region; Guest, Keen & Williams Limited; Howrah Improvement Trust; Gammon Nirman Limited; Garden Reach Shipbuilders & Engineering Ltd.; Electrical Manufacturing Co. Ltd., Dum Dum.

CURRICULUM DEVELOPMENT

The Centre took active part in the framing of syllabi on the following courses offered by the Computer Centre, in Under-graduate and Post-graduate curricula :

(i) "Numerical Methods and Computer Programming" as a core subject in the first year of the Master of Engineering Degree Course in Civil, Engineering Mechanics, Electrical, Electronics, Mechanical and Metallurgical Engineering;

(ii) "Numerical Methods and Fortran IV Programming" as a compulsory subject for Electrical, and Electronics Engineering Courses and Elective Subject for Civil and Mechanical Engineering courses in the 5-year Degree Course in Engineering;

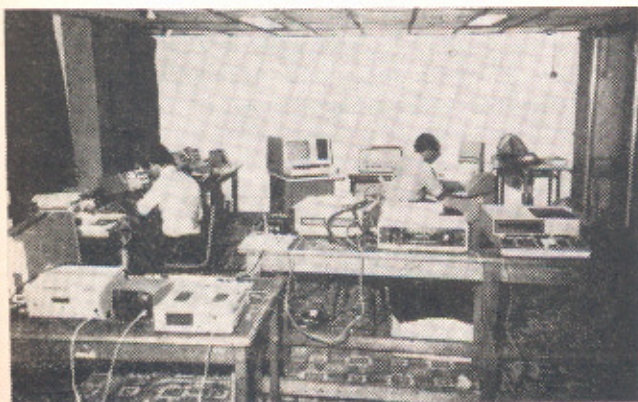

(iii) "Numerical Methods and Fortran IV Programming" as a core subject in the Undergraduate curriculum for all branches of Engineering in this College in the 4-year Degree Course in Engineering;

(iv) "Fundamental of Electronic Computers", "Digital Computer Principles" in Undergraduate Electrical Engineering Course, "Analog and Digital Computers" in Undergraduate Electronics Engineering Course;

(v) "Computer Design and Applications I and II"; "Computer Softwares", "Image Processing by Computers"; "Pattern Recognition"; "Digital Computer Structure", "Computer-aided Logical Design" in the Master of Engineering Degree Courses in Electrical, and Electronic Engineering branches.

POST-GRADUATE PROGRAMME

The All India Board of Post-graduate Engineering Studies has recommended (vide D.O. No. F. 12-45/78-T. 6 dated February 1, 1979 of the Deputy Educational Advisor (T), Government of India, Ministry of Education and Social Welfare (Department of Education) introduction of a post-graduate course in Computer Science subject to the condition that the

present level of sanctioned intake of studies is not exceeded. The additional inputs and other details are yet to be assessed by a Visiting Panel.

Two students have been admitted in 1979, and two more in 1980 to the Master of Engineering Degree Course in Electrical Engineering, with Computer Science as their Field of Specialisation.

APPENDIX-I

TDC-316 Computer System

SYSTEM FEATURES : Real time interface capability; modularity for each of system expansion; multiprogramming time and sharing capability; Multiprocessor configuration.

CONFIGURATION

1. Central Processor Unit with Core Storage of 28K words, 16 bit word length, individual 8 bit-byte addressability; Direct addressing to 32,768 words, with single and double address instructions; 8 addressable general purpose registers that serve as accumulators; index registers data address pointers and sub-routine linkage registers; Address modes include relative, immediate, indexed, absolute, auto-increment and auto-decrement modes, with one level of indirect addressing in each of the address modes; Coincident current random access core memory; one micro-second read-write cycle time, 400 nano second access time.

2. Teletypewriter with Controller;

3. Card Reader, 600 cpm with Buffer and Controller;

4. Line Printer, 600 lpm with Buffer and Controller;

5. Two nos. Magnetic Tape Transports, 37.5" per sec., 9 track, 800 bpi, with Buffers and Controller;

6. Removable Disk Drive, 7.25 m. bytes capacity, with controller.

SOFTWARE

Tape and Disk Operating Systems, Basic Symbolic Assembler; FORTRAN IV Compiler; COBOL Compiler; On-line Debugging System.

DIAGNOSTIC PROGRAMMES

Soft/Merge Package; Scientific Application Packages.

DEPARTMENT OF ELECTRICAL ENGINEERING

FACULTY MEMBERS

1. Dr. S. K. Sen, B.E., C.E., Ph. D. (Lond.), D.I.C. (Lond.), F.I.E. (India); Professor and Head & Professor-in-Charge, Computer Centre—Electrical Machines & Fields, Electric Drives.
2. Dr. J. K. Sen, M.Sc. (Tech.), D. Phil. (Cal.), Ph.D. (Illinois), M.I.E.T.E. (India); Professor—Electronic Circuits, Control Systems and Network Theory.
3. Dr. A. Mustafi, B.E., M.S. (Illinois), Ph.D. (J.U.); Professor (On line)—Systems Engineering & Operations Research.
4. Dr. R. C. Pal, B.Sc. (Hons.) (Cal.), B.Sc. (Engg.), (BHU), M. Engg. sc. (Melbourne), Ph.D. (BHU), F.I.E. (Ind.) (Gold Medalist); Associate Professor—Power Systems, Measurements.
5. Dr. C. R. Mahata, B.E., M.E., Ph.D. (Cal.); Associate Professor—Industrial Electronics, Control Systems.
6. Dr. D. Dasgupta, B.E., M.E., Ph.D., M.I.E. (India); Assistant Professor—Electrical Machines, Power Systems.
7. Dr. A. M. Ghosh, M. Tech., Ph.D.; Assistant Professor—Power Systems, Measurements & Control.
8. Prof. P. K. Nandi, B.E.E. (J.U.), M.E.; Assistant Professor—Computers, Industrial Electronics & Control.
9. Prof. P. N. Banerjee, B.E.E. (J.U.), M.E., M.I.E. (India); Assistant Professor—Electrical Machines, Power Systems.
10. Prof. K. K. Dasgupta, B. Tech. (I.I.T.), M.Sc. (Tech.) (Manchester), M.I.E. (India); Assistant Professor—Control & Nuclear Engineering.
11. Shri S. S. Basu, B.E., M.E.; Lecturer—Electrical Machines and Fields.
12. Shri N. Chaudhuri, B.E., M.E.; Lecturer—Electrical Machines.
13. Shri S. Bhattacharyya, B.E.E. (J.U.), M.E. (J.U.); Lecturer—Electrical Power Systems.
14. Shri D. Ghosh, B.E. (N.B.U.), M.E., M.I.E.T.E. (India); Lecturer—Networks and Digital Systems.
15. Shri D. M. Kar, B.F.E. (J.U.), M.E.E. (J.U.), A.M.I.E.S.T. (India); Lecturer—Measurements and Instrumentation.

16. Shri B. Rakshit, B.E.E. (J.U.). Demonstrator.

17. Shri S. P. Ray, B.E. (N.B.U.), M.E. (Cal.); Demonstrator.

BACKGROUND OF THE DEPARTMENT

Electrical Engineering encompasses all those activities associated with the generation and use of electricity. In addition to the older division of electrical engineering dealing with power generation, transmission, distribution, electric transportation and wire communications, modern electrical engineering concerns itself with the developments in such newer fields as electronics, radio, television, acoustics, facsimile, radar, computer, servomechanism and other aspects of measurement and control. Although these newer fields have their origin from Electrical Engineering, expanded so much during the last couple of decades due to fantastic progress in the exploration of space that, it now demands a separate field of study. With a view to imparting comprehensive knowledge in the field of electronics, radio, television, radar, computer, instrumentation and control, servo-mechanism, etc., a full-fledged Department of Electronics and Telecommunication has been already established in the College.

The present day trend towards mechanization and automation in large-scale industrial processes and business machines present opportunities for electrical engineering talent which continue to appear limitless. Such talent, however, requires a thorough background in physics and mathematics as well as the unique ability to apply new theoretical concepts and discoveries to immediate practical use. To this extent, electrical engineering is rapidly becoming a thorough and broad scientific endeavour ranging from pure research through development and design to immediate application, manufacture and operation.

Thus, the modern electrical engineer is continually confronted with challenging opportunities in these newer fields, or he may choose a carrier in the older branches of electrical technology. As in other branches of engineering, the electrical engineer may exploit his particular talents for specialization in such different professional activities as teaching research, development, design, application, sales, construction, administration and management.

ORGANISATION

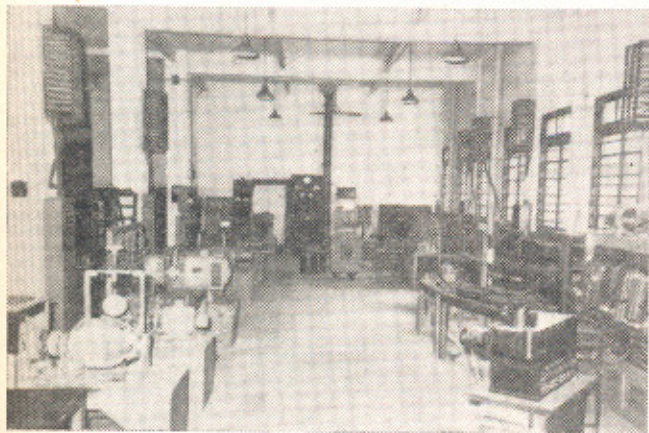

The Department of Electrical Engineering offers Under-graduate and Post-graduate programmes leading to Bachelor of Engineering, Master of Engineering and Doctor of Philosophy degree in Electrical Engineering of the Calcutta University. At present the department has sanction for 20 teaching

staff (Professor 1, Jr. Professors 2, Associate Professors 2, Assistant Professors 5, Lecturers 8, Demonstrators 2, and 16 supporting and supervising staff, Technical Assistants 4, Laboratory Assistants 4, Mechanics 2, Instrument Mechanic 1, Stenographer 1, Draftsman 1, Grade IV 3).

The department has a space of about 22,000 sq. ft. out of which 13,500 sq. ft. are used for different laboratories, repair/workshops and stores. 4,500 sq. ft. are utilized for class and seminar rooms, drawing hall and sub-library. The remaining space is used for staff rooms and office.

The department has the following laboratories :

- (i) Electrical Machines,
- (ii) Relays and Power Systems,
- (iii) Electrical Drives,
- (iv) High Voltage,
- (v) Control Systems,
- (vi) Industrial Electronics,
- (vii) Circuits and Networks.
- (viii) Instrumentation and Measurements.

HISTORY OF THE DEPARTMENT

A combined Electrical and Mechanical Engineering Department was started in 1902. This department used to take both theoretical and practical classes in Electrical Engineering for the professional group of the Bachelor of Engineering degree course in Civil Engineering. In addition, the department used to train up overseers in Mechanical and Electrical Engineering for appearing at the Joint Technical Board Examination.

The Electrical Engineering Department came into existence as a separate department in 1912-13, with Mr. W. H. Everett as the Departmental Head.

The overseer's course in Electrical and Mechanical Engineering was upgraded to a three years'

Diploma course in 1921-22. In the same year, this department also undertook to train up artisan boys in armature-winding, wiring of buildings and maintenance of accumulators.

The degree course in Electrical Engineering was introduced in this College during the year 1935-36, with the first batch of 3 students obtaining degree in 1936.

In 1936-37, the department also undertook to train up Bengal Nagpur Railway apprentices.

In 1943-44, evening coaching classes in Electrical Engineering were arranged for several R.A.F. units stationed in and around Calcutta. This continued till the session 1944-45.

In 1945-46, the University revised the curricula, syllabii, rules and regulations of the B. E. degree examinations in Electrical Engineering on the lines recommended by the Development Committee with the D.P.I., Bengal as Chairman and Dr. S. R. Sen-gupta as Secretary.

In 1952-53, regulations for Master of Engineering Course in Electrical Engineering were drawn up by the University. The College entered into a sisterhood plan with the University of Wisconsin, U.S.A., for exchange of staff. Several staff members of this department visited U.S.A. for higher training and research. Prof. R. R. Benedict and Prof. R. H. Inglemann worked in this department as Guest Professors.

In 1955, this department moved into its new abode (Block V of the present building) occupying a total space of about 16,000 sq. ft.

It is worth mentioning that the department has developed quite a few equipment and experimental set-ups, such as the generalized electrical machines, an analog computer with 25 chopper amplifiers and non-linear units, artificial transmission line, an a.c. network analyser, a relay testing bench, position control system, digital voltmeters, etc.

The important events during the years 1953-76 are highlighted below.

On the recommendation of the Review Committee which was set up in the year 1953, the student intake was increased to 30 and total number of teaching and supporting staff was increased to 10 and 5 respectively.

1955 : The department obtained the first sanction under the scheme for the development of facilities for Post-graduate course at the Bengal Engineering College, Sibpur, in 1955 with a total sanction of Rs. 51,000 (approx.) for equipment, and one post of

Associate Professor which was never recruited. There was no sanction for additional space under the scheme.

1956 : The Control Systems Laboratory was started in this year. In 1956, 5 senior Research Fellows under the Ministry of Education, Government of India, were admitted to this department and the following fields for the Master of Engineering were introduced :

- (1) Advanced Electrical Machinery,
- (2) Power System Engineering,
- (3) Control Systems.

During this period, the department had the services of eminent Professors from U.S.A. under the Technical Co-operation Mission Scheme.

1957-58 : During the year 1957-58, the intake of number of students to the Electrical Engineering Branch was increased to 60 under the expansion scheme. Moreover, from this year onwards, an additional number of 20 students admitted under the Telecommunication Engineering Branch was shifted to this department. This continued up to 1967-68 when a new Department of Electronics and Telecommunication Engineering was started. The number of teaching staff increased under the expansion scheme was 6 bringing the sanctioned total to 16. No additional space was sanctioned under the above scheme.

The department started an Analog Computation Laboratory, and the Development Programme of an analog computer was taken in hand.

1959 : In 1959, a Teacher's Training Scheme under the sanction of the Ministry of Scientific Research and Cultural Affairs was started and 6 teacher-trainees were admitted to the department. The scheme was terminated in the year 1969-70.

In 1959, the department produced the first Ph. D. in Electrical Engineering of Calcutta University.

1960-61 : During the year 1960-61, a Five-Year Integrated Course was started in the Institution with complete modification of curriculum. Under this scheme, number of Electives offered to the students was increased and the complete syllabii were modified. New courses on Industrial Electronics, Control Systems, Power Systems Analysis, Circuit Theory were introduced. However, the department did not receive any grant under any of the heads, viz., Staff, Equipment or Space.

1965 : The syllabii were further modified from time to time and new subjects such as Principles of Computation and Computing Methods, Electrical Drives and Control were introduced. New Labora-

tories such as Relays and Power Systems Laboratories and Industrial Electronics were started.

1969-70 : During the year 1969-70, the Institution and this department received additional grant under the scheme for the development of facilities for Post-graduate courses in Engineering and Technology. Four Junior Professors and three Assistant Professors, and one supporting staff were sanctioned to this Department which, however, was reduced to 2 Junior Professors and 2 Assistant Professors during the year 1971-72. Under the above scheme, a total amount of Rs. 80,000 was sanctioned to this department for the purchase of equipment. A new curriculum for the Post-graduate course leading to the degree of Master of Engineering of the Calcutta University was started in the year 1969-70 with a total sanctioned intake of 20 Research Fellows for this department. Under this curriculum the following fields of specialization were offered by this department :

- (1) Electrical Machinery,
- (2) Power Systems,
- (3) Industrial Electronics,
- (4) Control Systems,
- (5) Computer Technology.

Subjects, such as Electromagnetic Field Theory, Network Theory, Biological Control Systems, Optimal Control Theory, Electromechanical Energy Conversion, etc., were introduced.

The research programme of this department started as early as 1950 with one Senior Research Fellow of the Ministry of Education, Government of India. Subsequently research activities have enlarged and there are around 100 research publications by the members of the teaching staff of this department since 1953.

The department organised two Advanced Summer Schools on Electrical Power Systems for Engineering Teachers and Industry Personnel in the years 1965 and 1967. In each year about 30 participants registered for the schools and lecturers were drawn from various Engineering Institutions and Industries throughout India.

AIMS AND DISCIPLINES OF STUDIES AND RESPONSIBILITIES OF THE DEPARTMENT

During the last two decades there has been such an enormous development in the field of Electrical Engineering that it has become almost impossible to encompass the facets of modern electrical technology and the classical electrical engineering (still in vogue in our country) in the combined under-graduate and post-graduate curriculum of this department. Control Systems, Electrical Drives and Instrumentation,

integrated digital and logic Circuits have become an almost indispensable part of electrical engineering practice. The same thing can be said about power generation which ranges from the traditional sources of thermal and hydroelectric energy to nuclear devices and M.H.D. Conversion. Possibility of direct energy conversion by Solar and Fuel cells cannot be ignored. All analyses and syntheses methods are progressively becoming computer oriented since the invention of electronic digital computer.

The aim of this development is to orient the under-graduate courses and the laboratory experiments in such a way that the electrical engineering students get a basic acquaintance with the modern devices and techniques employed in modern electrical engineering. During the fourth and fifth year circuit and field theory, control systems, analogue and digital computer topics are made compulsory, along with conventional electrical machinery, power systems and measurement courses. During the fifth year a series of elective subjects are offered so that the student can specialize in the area of his choice and yet have a background in other areas. So far as the project planning and design aspects are concerned emphasis is still given on electrical machinery and power generation and distribution systems.

To make our senior under-graduate students acquainted with the industrial problems and requirements distinguished engineers from industries, big electrical organizations and public undertakings like C.E.S.C., W.B.S.E.B. are invited to deliver Visiting Lectures every year.

An interesting programme designed to train our students to power-station operation and maintenance practice is being conducted by the department for last ten years, in collaboration with the West Bengal State Electricity Board. The programme requires the final year electrical engineering students to camp at a modern thermal power-station like Bandel T.P.S. or Santaldih T.P.S. for about two weeks, where eminent engineers and specialists deliver lectures to the students. Each topic is followed by a visit by the students to that particular aspect of the power-station.

The other responsibility of this department is to teach courses like Fundamentals of Electrical Technology and Electrical Engineering for special purposes as required by other branches of engineering and to conduct corresponding laboratory works.

The object of the Post-graduate studies in electrical engineering is to impart specialized training and research skill to a selected group of qualified students. On the Master of Engineering programme choice of courses can be made in conformity with any one of the following fields of specialization approved by the Calcutta University under two main streams, namely : (1) Power Systems, (2) Control Systems :

- (a) Electrical Machines,
- (b) Power Systems,
- (c) Control Systems,
- (d) Industrial Electronics,
- (e) Network Theory,
- (f) Computer Technology.

The student must also write a thesis in his field of specialization in partial fulfilment of the requirements for the Master of Engineering degree. The thesis should contain some original ideas supported by theory and/or experiment or a critical analysis and comparison of some existing methods. Development of interdisciplinary approach is encouraged. This department feels that only theoretical course works will not adequately develop the faculty of a student in the development of advanced technology. Hence, laboratory works based on all the theoretical elective subjects have been introduced.

Facilities are provided for both analytical and experimental doctoral and post-doctoral research work in some well-developed laboratories.

The department organises seminar talks by its teaching staff and post-graduate students on their research topics regularly.

UNDER-GRADUATE PROGRAMME

The subjects and their course contents of the under-graduate programme (five years integrated) are detailed out by keeping in conformity with those followed in leading engineering institutions in India and abroad. Attempts have also been made to cover in the syllabi the subject-matters of All-India Engineering Service Examinations as far as possible.

The subjects for B.E. Preliminary examinations are common to all branches of engineering. Calcutta University conducts the examinations and confers the B.E. degree. The total student strength is 60 for each year at present.

POST-GRADUATE PROGRAMME (MASTER OF ENGINEERING)

The department offers many advanced and up-to-date courses followed by some fundamental and industrial research for the Master of Engineering Examination of the Calcutta University. The minimum residence required is two years after the Bachelors' degree.

The maximum intake is 15 students, most of whom enjoy a Government Scholarship of Rs. 400 per month. At present specialization in the following two fields are in vogue, namely, (i) Electrical machines including Power Systems, (ii) Control Systems including Industrial Electronics, Systems and Network Theory.

RESEARCH PROGRAMME

The department offers facilities for original research in fundamental and industrial problems on modern electrical engineering topics. In fact, most of the staff members of this department obtained their doctorate degrees by utilizing fully or partially the facilities available here. This department has got, in particular, a very well-equipped Electrical Machines Laboratory with a strong group of teachers working on the problems of Electrical Machines and Power Systems. Besides, this department is actively engaged in research works in the following fields :

(a) Electro-mechanical Energy Conversion including the aspect of Electromagnetic fields as applied to Electrical machines.

(b) Design and Construction of Control System Components such as Drag Cup Motor, Amplidyne Generator, Stepper Motor, Printed Motor, etc.

(c) Power Systems including on-line Computer Control Systems and various aspects of stability analysis with the application of modern techniques such as Lyapunov's method.

(d) Industrial Electronics and Drives, its special reference to various control of D. C. Motors, Inverters, Control of A. C. Motors and Electronic Control of Alternators.

(e) Systems and Network Theory.

(f) Control system including Process Control.

Registration for Ph.D. degree of the Calcutta University can be made ordinarily after passing the Master of Engineering Examination. The earliest a candidate could submit his thesis is two years from the date of registration. No course work is necessary for the Ph.D. degree of the Calcutta University. The dissertation for the Ph.D. degree should embody the results of research giving evidence of originality by the discovery of new facts or by a critical survey of facts or relations between facts already discovered.

INTERACTION BETWEEN INDUSTRY AND THE DEPARTMENT IN THE FIELD OF CONSULTATIVE SERVICE

The department has tried to maintain close liaison with several industrial power-supply organisations through visiting lecturers, summer-schools, project activities of students. Such organisations include W.B.S.E.B., the C.E.S.C., the D.V.C., the G.K.W. Ltd., the Tribeni Tissues Ltd., Messrs. Electric Construction and Equipment Pvt. Ltd.

Besides many of the department staff-members render expert advice on honorary capacity in the design, fabrication, maintenance of electrical and

control equipments on request from leading manufacturing concerns and public undertakings in West Bengal. Teachers of this Department are often invited to deliver special lectures on production planning and control of heavy engineering organizations like Hindusthan Steel, Heavy Engineering Corporation, Ranchi, and others.

DEPARTMENT OF ELECTRONICS AND TELECOMMUNICATION ENGG.

FACULTY MEMBERS :

1. Dr. P. K. Sinha Roy, M.Sc. (Tech.), D.Phil. (sc.); Professor & Head of the Deptt.

2. Dr. S. Basumallick, M.Sc. (Tech.), Ph.D.—Asstt. Professor.

3. Dr. S. N. Biswas, M.Tech., D.Phil. (sc.), P.R.S.—Asstt. Professor.

4. Dr. P. K. Roy, M.Tech., D.Phil. (sc.)—Lecturer.

5. Shri S. K. Ghosh, M.E.—Lecturer.

HISTORY OF THE DEPARTMENT

This department has been created in July 1968 out of a few members of the old department of Physics and Telecommunication Engineering with Dr. S. S. Baral as Head of the Department mainly through his initiative. It started functioning with 20 students in the 3rd year class and with one Professor, two Assistant Professors, one Associated Assistant Professor (now converted to lecturer) and two Demonstrators. In 1972 one Lecturer has been added to this department. All the above-mentioned posts and three posts of lecturer were sanctioned by the Government as early as 1957, all under Communication Engineering on order to start a new B.E. degree course on Electronics and Telecommunication Engineering of the Calcutta University. At present two posts of Lecturer and two posts of Demonstrator are lying vacant.

In the Undergraduate programme, in all 19 theoretical subjects are taught—16 to the departmental students and 3 to non-departmental students and 12 laboratories are run by this department of which 9 for the departmental students and 3 for the non-departmental students. The teaching load in the U.G. programme is 54 hours of lecture and 32 hours of laboratory per week. We are utilizing the services of Special Visiting Lecturers from the University College of Science and Technology, Calcutta, and from Industry to share the undergraduate load.

The Postgraduate programme was started in 1972 with about 5 students. At present two subjects of specialization viz. DIGITAL INSTRUMENTATION and MICROWAVE COMMUNICATION are offered. Previously, one more subject viz. Electromagnetic Theory and Radiating System was offered but has been discontinued now owing to lack of teaching staff. The teaching load in the P.G. Programme at present is 24 hours of lecture per week with 10 hours of laboratory. In addition, considerable time and effort have to be devoted by the teaching staff for project and thesis work by both U.G. and P.G. students. With the existing staff strength, it is very difficult to cope with this teaching load.

The department is running with acute shortage of staff and space. The department has roughly 7 000 sq. ft. of floor space. In this space, it has to accommodate as many as 10 laboratories, one class room, sitting rooms for teachers, one office room and one internal telephone exchange.

A proposal has been made to the Reviewing Committee set up in 1972 to review the existing condition of this College for sanctioning additional posts of two Professors, two Assistant Professors, six Lecturers and to assist in the laboratories, six Demonstrators, six Technical Assistants and six Laboratory Assistants and for maintenance of the laboratory equipment, four Instrument Mechanics and for administrative work, one Stenographer and one Clerk.

Proposals for additional space of the order of 14,000 Sq. ft. and an equipment grant of the order of Rs. 5 Lakhs for making the laboratories properly equipped and a furniture grant to the tune of Rs. 50,000/- have been made to the Reviewing Committee.

The Reviewing Committee have recommended two posts of Professor (one for U.G. and one for P.G.) and 4 posts of Asstt. Professors (3 for U.G. & 1 for P.G.) only. One of the posts of Demonstrator has been recommended to be upgraded to the post of Lecturer and the other abolished. Two posts of Technical Assistant, one post of Laboratory Assistant and two posts of Helper have also been recommended as supporting staff.

Additional space of 7 000 Sq. ft. for the laboratories and a financial grant for Equipment approximately to the tune of Rs. 2 lakhs have also been recommended by the Reviewing Committee.

However, to this date none of the abovementioned posts and the space have been sanctioned by the Government. An equipment grant of Rs. 4 lakhs approximately spread over the last two years has, however, been received and utilized.

Mention may be made that in recent years, maximum number of students seeking admission to this College, asks for Electronics and Telecommunication Engineering as their first choice of subject. It is unfortunate that the facilities in this department regarding staff, laboratory equipment and space are in such a sorry state.

In 1977, an Instrumentation Cell has been created within the premises of this department for repairing and servicing of costly electronic equipment of different departments of this College. Meanwhile, an additional space of approximately 1 000 Sq. ft. and an equipment grant to the tune of Rs. 3.5 lakhs have been made available with Dr. S. S. Baral as the Professor-in-Charge. A number of equipment has been purchased and housed in the space provided but the Cell could not start functioning owing to lack of staff. The posts of one Engineer in Electronics and Telecommunication Engg., two Mechanic (Electronics), two Mechanics (Electrical) and one helper have been recommended by the Reviewing Committee for the Cell. At present, Dr. S. Basumallick of this department is working as the Professor-in-Charge of this Cell after the retirement of Dr. S. S. Baral in 1979 and none of the abovementioned posts have been sanctioned as yet.

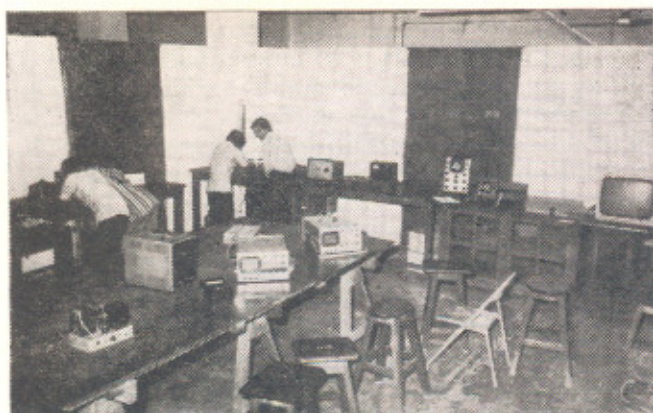

The present undergraduate intake is approximately 30 and intake per branch of specialisation in postgraduate course is 5.

Amid all these difficulties, our students are doing well in the university examination and are going for postgraduate studies at the I.I.T.'s and for service in different industries and institutions of repute.

The research and development activities of this department is spread over the following fields :

- (1) Digital Electronics
- (2) Microwave Communications, and
- (3) Optoelectronics

A Summer School on Digital Electronics sponsored by the I.S.T.E. was organised by this department in June 1980 with Dr. P. K. Sinha Roy, Head of the Department as Coordinator and Dr. R. Gangopadhyay, (then lecturer in this department now with the Radar Centre, I.I.T., Kharagpur, as Assistant Professor) as Co-Coordinator. About 16 participants from different states joined the course. Presently, three microprocessor systems based on Intel 4040, Synertek 6502, Motorola 6800 are in operation in this laboratory used by the U.G. and P.G. students. Another system based on 8085A is under development.

A new microwave engineering laboratory has been started from this year for the U.G. students under the guidance of Dr. S. Basumallick, Asstt. Professor, and the cooperation of Dr. P. K. Roy, Lecturer, who has recently joined.

The field of Optoelectronics has immense prospects in Communication and Instrumentation and Dr. S. N. Biswas who has recently come back from the Federal Republic of Germany working in the same field and has been promoted to the post of Assistant Professor is very enthusiastically developing a laboratory in Optoelectronics.

Shri S. K. Ghosh, Lecturer, was given the responsibility of overhauling the old 50-Line PAX housed in the department in 1979 and he has successfully completed the same. Another 50-line PAX has recently been purchased and is expected to be commissioned soon extending the internal communication facilities of the College.

DEPARTMENT OF HUMANITIES

FACULTY MEMBERS

1. Professor S. C. Chatterjee, M.A.; Asst. Professor, Commerce & Accounts and Head of the Department.
2. Professor Phanindra Nath Mukherjee, M.A. (Econ.), LL.B., Economics & Civics.
3. Professor M. G. Dhar, M.A. (Econ.).
4. Asst. Professor—Vacant.
5. Asst. Professor—Vacant.
6. Shri R. L. Bothra, M.A., Part time Lecture in Hindi.

The modern trend in engineering education in the advanced countries of the West is to broaden

social background of the students of Technology and Engineering through provision of general education. As the engineers and technologists are not intended to be mere experts in their own field of specialization, but capable of running organisation, projects and ventures as executives in their respective fields of assignments with a host of working personnel of different aptitude, temperament and social composition, this sort of widening of outlook in the context of the socio-economic background has been considered as of no less importance. In keeping with this trend, frontiers of technical education at various colleges and universities in India have been widened in recent years by the inclusion of liberal provisions for general education through the introduction of courses on subjects of Humanities.

A beginning in the same direction was made at the Bengal Engineering College, Sibpur, in the year 1945, when the new Department of Humanities was opened with the provisions for instruction in Civics, Sociology, Industrial Relations, Economics and Accounts, besides a fresher course in English Composition and a course in General Knowledge. All these became compulsory subjects for all the branches of engineering studies comprising Civil Engineering, Mechanical Engineering, Electrical Engineering and Metallurgy. When in 1949, the College opened its Architecture Department, the Humanities were included in the curriculum of studies for the Architecture students also, but the extent and range of Humanities have to be modified in the context of the need of the Architecture course. Likewise, some elements of Humanities, as compulsory subjects, have been kept in the curriculum of studies of the Mining Engineering, when this was introduced.

The syllabus on Humanities have undergone periodical changes in the context of the development [of the country particularly to keep the students abreast of the social and economic policies and institutional developments, as they have their considerable bearing on overall organisation, flow of resources and production technology all over the country. A trend is now developing throughout the country to standardize the courses on Humanities in all engineering colleges in the context of socio-economic requirements and this, also, leads to periodical adjustment of subjects, topics and elements of Humanities in the curriculum of studies.

Apart from the compulsory subjects, the department arranges for teaching of languages, as may be helpful in practical life or in the field of research and advanced studies. In 1951, teaching of Hindi as an optional non-examination subject was introduced, and provisions were also made for the teaching of foreign languages like German, French, etc., on part-time basis. At present, there is a part-time Hindi Teacher for teaching Hindi. As for foreign

languages in the past, the classes on part-time basis could be arranged through the collaboration of the Consulates in Calcutta, who were kind enough to provide experts to carry out this teaching of foreign languages. Similarly, the British Council offered facilities for some time for the spoken language classes in English on lines as may be helpful to students to develop their conversational power in English. These language classes are intended to be taken by foreign personnel to make them more effective from the point of view of learning, and, as such, their running in any session depends largely on the availability of teachers, with the limited facilities that the College can offer.

In addition, the College has on its programme, the introduction of a Language Laboratory in a scientific form for the development of proficiency in English, both spoken and written, along with other languages to some extent. Instructions will be imparted under expert guidance and with the help of recorded instruction series. Group discussion, debates, etc., will be held on a laboratory scale for the development of speaking power and the students will mend their errors in speech hearing their voice through tape-recorder, for which there will be provision in the proposed laboratory.

Among other activities, the Humanities Department organises intra-College or inter-Collegiate Debates, Quiz, etc., and offers its guidance to the participants. In organising the National Plan Day, under the Planning Forum activities, sponsored by the National Planning Commission, the department took an active role in arranging for lectures on important topics of our National Plan by the eminent authorities on the subject. It also organised debates, discussions, etc., on recommended subjects of the Planning Forum and conducted socio-economic-technical surveys with the student-members of the Forum.

With the growing importance of Humanities, there has been expansion in the staff strength. The department originally started with two teachers, one for English and the other for Social Sciences, viz., Economics and Sociology. There was a visiting lecturer in English. It is interesting to note that even though there was then no provision for Humanities, the College provided for the teaching of Accounts with the help of a visiting lecturer since 1924 and the well-known authority in the field of Accountancy, Shri G. Basu had acted as the Visiting Lecturer in Accounts.

DEPARTMENT OF MATHEMATICS AND GEOPHYSICS

FACULTY MEMBERS

1. Dr. S. C. Ganguly, D.Sc.; Professor & Head.
2. Dr. T. N. Maulik, Ph.D.; Professor.
3. Dr. R. K. Bera, Ph.D.; Asstt. Professor.
4. Dr. P. K. Chaudhuri, Ph.D.; Asstt. Professor.
5. Dr. S. C. Ghosh, M.Sc., Ph.D.; Asstt. Professor.
6. H. Ghosh, M.Sc.; Asstt. Professor.
7. J. Barman, Asstt. Professor.
8. S. C. Ghosh, M.Sc.; Asstt. Professor.
9. S. Mukherjee, M.Sc.; Asstt. Professor.
10. U. Samaddar, M.Sc.; Asstt. Professor.
11. J. Roy, M.Sc.; Asstt. Professor.
12. P. C. Singh, M.Sc.; Lecturer.
13. P. Jana, M.Sc.; Lecturer.

The Department of Mathematics had its initiation with that of the College and since then it is entrusted with the training in the Basic Mathematics, Theoretical Mechanics and Mathematical Physics required for the students in all branches of Engineering. The curriculum and its proportionate weightage on the total load has changed considerably in course of time. With the introduction of revised courses for Secondary Education, the course of study in Mathematics in Bengal Engineering College has also changed. Mathematics continued always to be a compulsory subject up to third year classes for all the branches and also up to fourth year classes for the students of the Electrical Engineering and Electronics & Telecommunication Engineering. Majority of Theoretical Mechanics has been progressively taken up by the Applied Mechanics Department since it was formed. From 1956 Post-graduate classes in Electrical Engineering received instruction in Advanced Mathematics. Later with the revision of regulations for Master of Engineering which has been broken up the course into sections A and B, Mathematics has become compulsory for the Post-graduate Teaching branches which are at present Civil, Mechanical, Metallurgy, Electrical and Electronics & Telecommunication Engineering. From this year, instructions are being given to D.T.R.P., D.T.T.E. and M.T.R.P. students.

The geophysical data recorded and analysed at the Geophysical Laboratory are regularly compared with the data supplied by U.S. Cost and Geodesic Survey on an exchange basis. The records are taken by equipment which can be considered to be most modern.

In addition to normal teaching, some teachers of the department carried original research and advanced studies. Particular mention may be made of Dr. C. E. Dullis who made a thorough study of Matrices and Determinoids during 1904-1908. His results were incorporated in two volumes under the title 'Matrices and Determinoids' published later by the Cambridge University. Prof. B. B. Sen and Dr. A. M. Sengupta carried research in the problems of elasticity and published a large number of papers. Since 1949 research in the department have been a regular feature and almost all members of the staff are engaged in it. Prof. B. B. Sen was admitted to the D.Sc. Degree of the Calcutta University in 1948 and Dr. A. M. Sengupta obtained Ph.D. Degree of Calcutta University in 1955. Dr. S. K. Chakraborty carried extensive research in microseisms and their correlations with cyclones since 1952 for a long period. After it most of research work is associated with Theoretical Seismology, Mathematical Theory of Elasticity, Numerical analysis, Analytical methods of Applied Mathematics and Applied Algebra—all of which have significance in our College. In the last fifteen years, fifteen persons obtained doctorate including two D.Sc. Degrees by carrying research in the department.

Advanced studies are also being carried out in the department in different branches of Applied Mathematics and Theoretical Physics.

Various approximation methods in quantum scattering processes have been studied and Shri S. N. Upadhyay, a Teacher-fellow attached to the Presidency College, Calcutta, submitted his Ph.D. Thesis to the Calcutta University working on "Approximation Methods in Quantum Scattering Problems" under the supervision of Dr. S. C. Ganguly, the Head of the Department.

Dr. T. N. Maulik continued his studies on Operation Research and network analysis and has several publications to his credit.

Dr. R. K. Bera worked on problem of elasticity and has published some papers during the last two years.

Attempts are being made to run the old Benioff Seismometers of the observatory attached to the department. These have been lying idle for a long time. The difficulty of frequent load-shedding has been overcome with the installation of a no-break power generation device.

PUBLISHED WORKS

Dr. T. N. Maulik : *Books*—Linear Programming, Part-I and Part-II (in press). *Papers*—(1) On Generalised Kronecker Products—Accepted for publication in Bull. Cal. Math. Soc. (2) Study on the inventory control for the grinding and control wheel of centreless grinding machines by Queing model.

Dr. R. K. Bera : (1) Elastic Scattering of electrons etc.—J. N. Das, R. K. Bera & B. Patra, Phys. Rev. A 23, No. 2, Feb. 1981. (2) Stresses produced in an initially stressed semi-infinite elastic medium by moving load—Accepted for publication in Quart. Bulletin Mathematique, Rumania.

Shri N. C. Maity : (1) Note on the motion from Seismic Sources—Acta Geophysics Polonica, Vol. XXVII, No. 1, 1979. (2) Wave Prop. from extended, asymmetric surface sources in an elastic half space (with Prof. M. Mitra)—Bull. Seis. Soc. Am. Vol. 69, No. 3, pp. 713-735, June 1979.

DEPARTMENT OF MECHANICAL ENGINEERING

FACULTY MEMBERS

1. Prof. S. P. Sen, B.E., M.S. (Illinois), A.M.I.E. (Ind.), M.I.Mech. E. (London); Professor & Head of the Department—I.C. Engine, Gas Turbine, Steam Power Plant.
2. Prof. B. K. Dutt, B.E., M.S. (Wisconsin), A.M.I.E. (Ind.); Professor—Workshop Technology, Production Engg.
3. Dr. D. N. Roy, B.E., M.S., Ph.D.; Professor—Heat Transfer & Fluid Flow.
4. Prof. Dr. S. Biswas, B.E., C. Eng., M.Sc., Ph.D. (Eng.), D.I.C. (Lond.), D.Phil. (Praha), F.I.NUC.E. (Lond.), A.M.Inst. F. (Lond.), M.I.E., A.M.I.E.S. (Glasgow), V.D.I. (Germany), Member, New York Academy of Sciences, U.S.A. etc.; Prof. & Head of the Dept. of Training—Nuclear Engineering & Energy Technology.
5. Dr. P. Pal, B.E., M.E., Dr. Ing. (W. Germany); Professor—Gas Dynamics, Gas Turbine, Heat Transfer, Measurement.
6. Prof. S. J. Mukherjee, B.Sc. (Engg.), M.S. (Wisconsin); Asstt. Prof.—Thermodynamics, I. C. Engine, Heat Transfer, Measurement.
7. Prof. N. R. Chakrabarti, B.M.E., M.E.; Asstt Prof.—Machine Design, Workshop Process.

gramme with a specific slant towards developing various engineering procedures and their application in industrial innovation. It is intended as a basis of a career versatility in the application of engineering knowledge in the industry and in research and development.

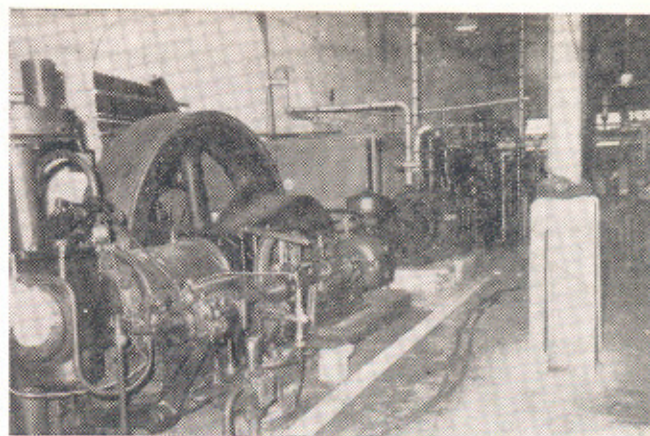

The course of Mechanical Engineering, therefore, give students the opportunity to acquire a background of industrial knowledge and experience prior to the professional work of the final year. It provides a period of approximately three months to six months of practical experience in industry, particularly the end of the third year and the beginning of the final year with a selected industrial concern. This is accomplished by arranging the programme of project elective subjects taken in the final year in the industry with a particular slant towards practical problems of the industry.

HISTORY OF THE MECHANICAL ENGINEERING DEPARTMENT

The Mechanical Engineering Department is one of the most popular departments of the College. This department got its separate existence in 1921 when diploma in Mechanical Engineering and Associateship of Mechanical Engineering were offered. The department was raised to a degree standard and the first batch of students came out in 1932. The initial intake was ten students which went up to one hundred and twenty students during 1970-71 and now has been stabilized at seventy-five. This department caters not only for Mechanical Engineers but also to the other branches in mechanical group of subjects. With the increase of subjects in the Mechanical Engineering Department, it was thought fit to separate some of the branches, such as, Drawing, Hydraulics, Strength of Materials, etc., to a separate department, namely, Applied Mechanics Department in the year 1950. Since 1954 the department is offering the Degree of Master of Engineering and also having basic facilities for research work which leads to the award of Ph.D. degree.

The following laboratory facilities exist in the Mechanical Engineering Laboratory :

- (1) Prime Mover Laboratory,
- (2) Fuel Laboratory,
- (3) Metrology Laboratory,
- (4) Gas Dynamics and Fluid Mechanics,
- (5) Machine Tools Laboratory,
- (6) Metal Forming Laboratory,
- (7) Dynamics of Machinery Laboratory,
- (8) Refrigeration Laboratory,
- (9) Production Engineering Laboratory.

This department has got a departmental library for the benefit of staff and post-graduate students.

The under-graduate students have to carry out a number of experiments in each of these laboratories to get their basic ideas clear and to give them to have a confidence to apply the scientific knowledge in the practical field; such as—

Prime Mover Laboratory : Calibration of pressure gauges and thermometers; Boiler performance and heat balance; Steam turbine trial; Compound Steam engine; Trial steam plant heat; Babcock Wilcox boiler heat balance and performance test; Performance and heat balance of diesel and petrol engines; Variable compression Ricardo engine test; Exhaust gas analysis.

Fuel Laboratory : Analysis of coal; Bomb Calorimeter test; Gas Calorimeter test; Flash point; Fire point test; Oil viscosity test; Feed water analysis.

Metrology Laboratory : Precision measurement of lengths and angles; Making use of measuring instruments as well as measuring machines and comparators; Calibration of slip gauges; Testing of screw threads, Interferometer; Tool makers microscope; Surface measuring machine.

Gas Dynamics and Fluid Mechanics Laboratory : Centrifugal fan test; Calibration of measuring devices scale; Pitot tubes; Orifice meters; Venturi-meters, etc., Wind tunnel tests; Air Compressor performance.

Machine Tools Laboratory : Measurement of forces and power in machining operations; Electro-mechanical lathe Dynamometer; Hydromechanical drilling Dynamometer; Measurement of tool wear.

Metal Forming Laboratory : Experimental study for extrusion; Drawing; Forging and Spinning; 3-dimensional spinning Dynamometer.

Dynamics of Machinery Laboratory : Moment of inertia; Torsional rigidity and damping co-efficient of flexible coupling; Natural frequency of vibration of a cantilever beam with an endmass; Practical use of Stroboscopes and Vibrometers for frequency measurements; Study of the Excitation characteristics of a Vibration Generator; Static Balancing and Whirling of shafts.

Refrigeration Laboratory : Coefficient of performance test for refrigeration plant; Ice plant performance; Psychrometric measurements; Simple test on Air-conditioning plant.

Production & Industrial Engineering Laboratory : Time study; Method time measurement; Micro machine study; Standardizing time measurement; Plant layout.

The under-graduate students in their final year, over and above the usual course have to take two Elective subjects out of the following fields :

- (i) Thermal Engineering,
- (ii) Production Engineering,
- (iii) Industrial Engineering & Operation Research,
- (iv) Design.

For post-graduate activities the department has got sanction in two broad fields, e.g., Production Engineering and Thermal Engineering having a quota of twenty students. The department has been training quite a large number of post-graduate students for many years.

Collaboration with the industry and consultancy works are permitted and undertaken by the members of the staff.

In addition to this, the department runs post-graduate research facilities as well as for industrial consultancy service. As a matter of fact, the post-graduate students have got the facilities to undergo post-graduate studies while in the industry and in their second year of studies their problems are chosen in such a manner that their work in the industrial development has some link with their post-graduate work in thesis. The Department of Mechanical Engineering also gets various industrial research and development work as well as exploring new concepts in the field of Mechanical Engineering.

DEPARTMENT OF METALLURGY

FACULTY MEMBERS

1. Dr. P. P. Das, B.Sc. (Hons), B. (Met.) (Cal.), Ph.D. (Cardiff), M.I.I.M.—Professor & Head.

2. Dr. A. K. Seal, B.Sc. (Hons.), B.E. (Met.) (Cal.), Ph.D. (Sheffield), F.I.M. (London), M.I.I.M., M.I.I.F., F.I.E.(I), National Metallurgist (1965)—Principal.

3. Shri M. K. Banerjee, B.E. (Met. E.) (Cal.), M.E. (Met.E.) (Cal.), A.M.I.I.M.,—Assistant Professor.

4. Shri M. K. Mitra, B.Tech. (Met.), M.Tech. (Met.), I.I.T., Kharagpur, A.M.I.I.M., Assistant Professor.

5. Shri S. N. Basu, B.E. (Met. E.) (Cal.), M.E. (Met.E.) (Cal.), A.M.I.I.M.—Lecturer.

INTRODUCTION

Metallurgy is the engineering science which deals with the production and utilization of metals and alloys and with the properties of metallic materials. It is a broad field, founded and closely related to several branches of engineering. For many reasons it is a field of great importance to science and industry. Metals are of immense interest as basic components of our world, since they comprise about three-fourths of all the elements. Equally important is the fact that they are available in the earth's crust in large quantity and in such a form that they can be produced at a reasonable cost. Metals also have remarkable properties, which can often be modified to make them of particular use to man. They can be combined in an almost limitless number of ways, so that new alloys are constantly being developed to meet new needs more adequately. As a result of their usefulness and availability, metals are now the working substance of modern engineering. The efficient operation of gas turbines, nuclear reactors, and many electrical devices of the future depends critically on metals as materials of construction.

The metallurgical engineer finds his services in great demand. Industries which are producing metals and converting them into useful products offer opportunities in plant operation and management to metallurgists with a Bachelor's degree. Metallurgists also play a prominent role in research on the nature and properties of metals and in the development of new processes and alloys to meet the increasingly severe demands of modern technology. While opportunities for this work exist for those with basic training, the demand is particularly active for persons who have taken postgraduate study.

Material science is a study of the structure, properties and behaviour of materials of all kinds, but especially of those engineering materials which are useful in structures, machines, or devices. Modern manufacturing operations utilize materials of many sorts, metallic and non-metallic. Advanced engineering developments depend upon materials having

such highly specialized properties as strength, toughness, elasticity, resistance to oxidation, or specific electrical or magnetic characteristics. Such properties must be maintained under extremes of high or low temperatures, under intense radiation, or in outer space. Selection of the right material for a given demand on the ability to invent and develop a new material depends upon a thorough grasp of material science. The syllabus of the department covers a wide area of material science.

The Department offers a wide range of subjects in metallurgy, mineral engineering, ceramics and materials science and engineering, together with excellent opportunities for research.

HISTORY OF THE DEPARTMENT

The Metallurgy Department was opened at B.E. College in the year 1939 with the introduction of 3-year degree course in Metallurgy under Calcutta University. This department is the second oldest Metallurgy Department in India. Four-year degree course was introduced in the year 1945 when the development plan (immediate) was implemented by the State Government. The annual intake was raised from 20 to 30 students in the year 1957 according to the recommendations of the 1953 Reviewing Committee. In 1960, the 5-year integrated course replaced the 4-year degree course. With the introduction of 10 + 2 course in the High Secondary level the 4-year degree course was again introduced in 1978 and the department is still running the same undergraduate programme.

Although the 2-year post-graduate programme was started in the year 1953, the necessary Government sanction for the post-graduate programme was received in the year 1967 for two fields of specialization viz., Physical Metallurgy and Process Metallurgy. The revised postgraduate syllabus was introduced in 1969. The department, however, is running at present the Physical Metallurgy course only.

THE UNDERGRADUATE PROGRAMME

The undergraduate course is of four year duration. In the first two years of the course emphasis is laid on fundamental subjects of science and engineering e.g., Mathematics, Physics, Chemistry, Engineering Drawing etc. Through suitable courses in these subjects students build up a strong science-oriented background. Special attention is also paid on Humanities subjects, e.g., Language, Social Science etc.

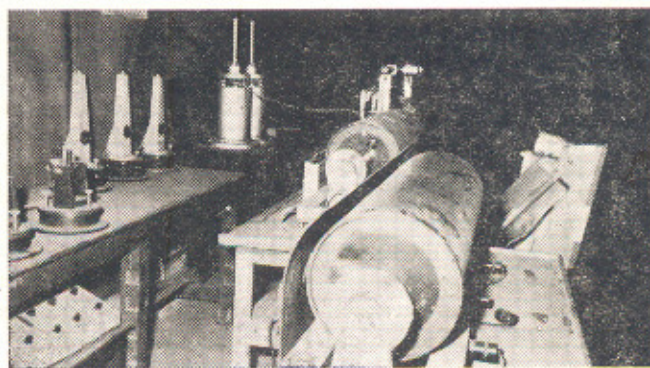

Differentiation of the course for each branch of engineering starts in a small way in the second year and is almost complete in the third year of the course. In the fourth or final year specialization is offered in some subjects through a number of elective

papers. In order to induce the students to think creatively a number of problems on current topics are given to them for investigation and/or a number of projects are given to them for proper design and layout. The undergraduate course is developed in such a way that students become competent in analysing practical problems and become conversant with current industrial developments.

In order to accommodate new ideas and avoid stagnation of Metallurgy curriculum, all the courses undergo periodic changes and steps are taken to reorganise courses and to introduce current topics of interest. Educational tours are arranged for the students so that they have a chance to see various industrial plants and laboratories and form a good idea about the recent trends in industrial development. There is also provision for inviting leading experts from industrial and research organisations to deliver lectures on specialized topics to both undergraduate and post-graduate students, so that the latter are exposed to current industrial practices as well as research and development activities in specialized metallurgical areas.

DEVELOPMENT PROGRAMME

In the development programme the department proposes to open new postgraduate fields on (a) Materials Technology, (b) Industrial Metallurgy and Management and (c) Mineral Engineering along with post-graduate part-time diploma courses in (a) Heat treatment Technology, (b) Industrial Metallurgy and (c) Advanced Foundry Technology. The following subjects have been recently introduced in the curriculum to keep abreast with the modern developments in the metallurgical field : (a) Nuclear Metallurgy, (b) Powder Metallurgy, (c) Furnace Technology, (d) Welding Technology, (e) Advanced Foundry Technology, (f) Computation and Computer Programming and (g) Electron Microscopy.

Attempts are being made for modernisation of laboratories of the department with new equipment keeping in view of meaningful teaching and research work both in the undergraduate and the postgraduate levels. To study the transformation characteristics of metals and various other materials a

Derivatograph has been purchased and it is kept in the Central Instrumentation Laboratory for a wider use and better utilisation by the members of staff and students of other disciplines. In the melting side to produce a greater amount of melt necessary for some alloy development work an electric furnace of 40 kg. capacity has been procured and is now being installed in the foundry. It is going to be commissioned within a very short time. A Strolein apparatus has been purchased to analyse the composition of the melt produced by the Arc furnace. In the mechanical metallurgy laboratory attempts are being made to increase the capacity of the existing rolling mill. A wire drawing machine has also been purchased in this Laboratory. In the Powder Metallurgy Laboratory a high temperature sintering furnace has been purchased and this will greatly facilitate studies on the development of newer types of powder metallurgy products. The metallography laboratory has been equipped with a new automatic polishing machine.

Finally, a few words may be said about the training schemes for the improvement in the quality of teaching on the part of the teachers. From time to time teachers are granted study leave to acquire higher qualifications in advanced technological institutions in India and abroad. Opportunities are also availed by the teachers of the Quality Improvement Programme of the Government of India to go to other institutions for short durations for participating in various summer and winter schools as well as seminars and symposia or for long durations for acquiring postgraduate degrees.

THE POSTGRADUATE PROGRAMME

The post-graduate programme leading to the Master of Engineering degree in various branches is of two-year duration. Facilities also exist for carrying out higher research leading to the Ph. D. degree.

The first batch of post-graduate students in the old syllabus passed out in 1955. The old post-graduate course was of two-year duration with more emphasis on research. In the new post-graduate syllabus introduced in 1969 more attention has been paid to course work.

The department has so far produced about 40 M.E.s and six Ph.D.s. Seven candidates are now working in the department for their Ph.D. degrees.

RESEARCH PROGRAMME

The department pursues active research programmes with a particular slant towards developing new concepts in the field of Metallurgy which will be useful towards achieving not only technological development but also self-reliance in the country. Work on one research project is now being carried

out by the department in collaboration with the Steel Authority of India Ltd. and a research scholar has been appointed for the purpose. During the last fifteen years, the Department of Metallurgy undertook various commendable development and research programmes. Some of which are, for instance :

1. Development Ni-free Maraging Steel.
2. Ausforming of alloy steels.
3. Development of Al-Mg-Zn base alloys.
4. Thermal and thermo-mechanical treatment of Al-bronzes.
5. Development of alloy S. G. iron.
6. Development of Al-Cu-Mn alloys.
7. Tempering characteristics of alloy steels.
8. Fatigue properties of single and polycrystals of different metals and alloys.
9. Underground corrosion and cathodic protection of metals and alloys.
10. Ageing characteristics of Al-base alloys.
11. Studies on stress corrosion characteristics of different non-ferrous alloys.
12. Studies on sintering and compacting characteristics of indigenously manufactured metal powders.
13. Development of microalloyed steels.
14. Development of acicular ferritic HSLA steels.
15. Studies on the effect of vibration and Mechanical treatment on the characteristics of Iron-Carbon-Silicon alloys and some non-ferrous alloys.
16. Studies on the effect of various parameters on welding of stainless steels.
17. Studies on Segregation and inclusion control in Microalloyed steels.
18. Development of white cast iron cutting tools.
19. Studies on low cycle fatigue and fracture toughness of microalloyed steels.
20. Development Dual phase steel.
21. Studies on the effect of exothermic materials on the piping characteristics and overall improvement in the field of casting.

INTERACTION BETWEEN INDUSTRY AND OTHER METALLURGICAL INSTITUTE AND THE DEPARTMENT IN THE FIELD OF CONSULTATIVE SERVICE

Interaction between this department and industry has been reasonably good. There are a large number of metallurgical industries in Howrah and Calcutta, which do not have sufficient testing and investigation facilities. The members of the staff of this department take part in consultation work with the above industries and solve their problems. Thus, this consultative service keeps the teachers abreast of the latest developments in industrial practices.

OTHER LEARNED ACTIVITIES

To develop and promote scientific and technological knowledge and research activities of the members of staff and students of the Department in the field of Metallurgy, the B.E. College Chapter of the Indian Institute of Metals was founded in the year 1953. The activities of the Chapter are directed towards a closer liaison between the members of staff and students of the Department and metallurgists of India and abroad by arranging seminar lectures by eminent metallurgists of India and abroad, by organising short term courses on important metallurgical topics of interest, by film shows and plant visits and by circulation of Journals, Transactions and reprints of important articles related to the field of Metallurgy. The Chapter organised in previous years four short term courses on topics such as Heat Treatment Technology, Selection of Engg. Materials and Electric Furnace Steel Making. A short term Course on Failure Analysis has been organised this year also by the Chapter.

DEPARTMENT OF MINING ENGINEERING AND GEOLOGY

FACULTY MEMBERS

1. Prof. J. L. Chakravarty, A.I.S.M. (Dhanbad), 2nd Class Manager Certificate, 1st Class Manager Certificate, M.Tech. (Min.E.), I.I.T., Kharagpur, M.M.G.I. (India), M.I.M.M.A., M.I.E., Professor of Mining Engineering and Head.(a) Mine Planning & Design. (b) Coal Mining.
2. Prof. H. K. Bose, B.A. (Delhi University), A.I.S.M. (Mining), Dhanbad, M.I.E., M.M.G.I., F.G.M.S., M. Inst. of Mineral Engineering (India).—Assistant Professor of Mining Engg. 8.3.1928.—Metal Mining.
3. Shri J. M. Sinha, B.Sc. (Min.E.), B.H.U., A.M.G.I., Lecturer in C.E. Surveying (Mining) 28.7.1930.—Mine Surveying.

Geology Section

4. Shri G. K. Modak, M.Sc. (Cal. University); Assistant Prof. of Geology. 31.10.1925.—Stratigraphy and Palaeontology.
5. Prof. A. Ghose, M.Sc. in Geology, Calcutta University; Assistant Prof. of Geology.—
6. Shri S. L. Ray, M.Sc. in Geology, Calcutta University, F.G.S., Lecturer in Geology—Petrology & Geochemistry.

HISTORY OF THE MINING DEPARTMENT

On the recommendations of the Expert Committee, appointed by the Board of Engineering Studies, Government of India, a four-year degree course in mining engineering was introduced to meet the then urgent and immediate demand for mining engineers for implementation of the Second Five-Year Plan. The first batch of 30 students were admitted in 1956. Since then the annual intake has been 30 up to 1967. The admission strength was reduced to 20 in 1968 and later further decreased to 10 in view of the employment difficulties in 1965. The set-back in the employment position was, however, short-lived and with the nationalisation of coal and some other mineral industries, the employment position for mining engineers greatly improved. The intake is now being restored to the original of 30 per year. At the time of starting the course, a non-recurring equipment grant of Rupees four lakhs was received to equip the mining laboratories.

The Mining Engineering Department was started with three sanctioned teaching staff consisting of one Professor of Mining and two Assistant Professors of Mining, and one Lecturer in Mine Surveying.

POST-GRADUATE PROGRAMME

Preparations for opening of the M.E. course in mining has been taken up and is in progress.

CONSULTATIVE SERVICE

There is wide scope for building up consultancy service in collaboration with the industry, but owing to the serious shortage of staff in the department this could not be developed.

GEOLOGY SECTION

This section was originally attached to the Department of Civil Engineering and subsequently combined with the Department of Chemistry and Metallurgy. In 1965, the section was taken out from the Chemistry and Metallurgy Department and was attached to the Mining Engineering Department.

AIMS AND DISCIPLINES OF STUDIES AND RESPONSIBILITIES OF THE DEPARTMENT

The section has to look after the students belonging to four disciplines, viz., Mining Engineering, Civil Engineering and Metallurgical Engineering and Arch. (D.T.R.P., M.T.R.P.).

RESEARCH PROGRAMME

Recently two research projects from the department have been financially supported by the U.G.C., the principal lines of investigation being (i) Mineralogy and Petrology, and (ii) Structure and Stratigraphy of Precambrian rocks of South India. In addition, investigation on (i) Stratigraphy and mineral resources of Palamau District of Bihar, (ii) Precambrian and Gondwana Stratigraphy of Surguja District of M.P. with special reference to petrology, geotectonics, palaeontology and economics, and (iii) Petrology of gondites and associated manganese ores of M.P. are also being carried out.

DEPARTMENT OF PHYSICS

FACULTY MEMBERS

1. Prof. Dr. S. R. Basu, M.Sc., Ph.D., Professor and Head.—Nuclear Physics & Bio Physics.
2. Prof. D. P. Moitra, M.Sc. (C.U.), M.Sc. (Eng.) (Nottingham), M.I.E. (Eng.), M.I.E.E. (London).—Assistant Professor.
3. Dr. M. M. Mitra, M.Sc., Ph.D., Assistant Professor—Applied Physics.
4. Prof. Sajal Ganguly, M.Sc.; Assistant Professor.
5. Dr. B. R. Gupta, M.Sc., Ph.D.; Assistant Professor.
6. Prof. S. N. Roy Chowdhury, M.Sc.; Assistant Professor.

7. Shri A. K. Chakraborty, M.Sc. (B.U.), Demonstrator—Electronic & Radiophysics.

BRIEF HISTORY OF THE DEPARTMENT

It took a long time for the Department of Physics to have a name and habitation of its own. Up-till 1912 Physics was taught as a Branch of "Physical Science". After 1912 Physics was merged with the Department of Mathematics headed by Prof. A. Macdonald. It was in 1926 that the Department of Physics gained its separate identity under the Professorship of Shri Amaresh Chandra Chakraborty. When Dr. H. Rakshit joined the Department as its head in 1950, Telecommunication Engineering was introduced as a subject under the Department. When Dr. S. S. Baral took over, the subject of Telecommunication Engineering grew in stature and magnitude and till 1968 Physics Department continued to be a part of the Department of Electronics and Telecommunication. In July 1968 Physics was again made a separate department. Since 1948 the location of the Department of Physics had to be shifted as many as five times. It is now located in Block 9 with Prof. P. K. Chatterjee as Head of the Department.

AIMS AND DISCIPLINES OF STUDIES AND RESPONSIBILITIES OF THE DEPARTMENT

The aims of the department is to provide the students with a sound physical background so as to enable the students to form clearest ideas about the concepts involved in modern physical science. The training imparted aims at enabling the students to visualise the physical nature of different problems and to grapple with them through the maze of equations.

The disciplines of studies involved the various branches of Physics in the under-graduate with emphasis on atomic structure and modern physics, and the fundamentals of classical physics with a bias for engineering and practical applications.

This department is also entrusted with the responsibility of offering courses in Materials Science, an interdisciplinary compulsory subject to the post-graduate students belonging to the different branches of Engineering.

RESEARCH PROGRAMME

Department of Physics offers facilities for research work. Research work of theoretical side are already in progress, e.g., calculation of twilight period in different altitudes, magnetic field distribution around a coil carrying current, the nature of the uniformity of the magnetic field for a Helmholtz-galv. Efficiency of a thermojunction for power generation, etc., research in circuit theory, control mecha-

nisms and in lesser materials are also being actively considered.

THE POST-GRADUATE PROGRAMME

The Post-Graduate Programme in Physics consists of two courses, Materials Science to the First Year Post-graduate students belonging to the different branches in Engineering, one for M.E., C.E. and Met. Engg. branches and the other for E.E. and E. & T.C. branches. The papers are compulsory and each is covered within one year—3 lectures per week—100 marks.

There is no laboratory G.S.T.

INTERACTION WITH INDUSTRY

The scope of interaction between the industry and the department in the field of consultative service is limited but sometimes firms seek advice regarding methods of finding physical properties of non-conventional objects not usually done in a physical laboratory, such as specific heat and coefficient of expansion of wood.

PROCTORIAL DEPARTMENT

FACULTY MEMBERS

1. Professor Dr. S. Roy, M.Sc., Ph.D., M.M.G.I. Proctor
2. Assistant Proctor—Vacant.

On recommendation of the first Review Committee (1953), the Proctorial Department was started in 1956 with the object of improving the personal qualities of the students and looking after the discipline, welfare and extracurricular activities of the students. Inasmuch as genesis of the Proctorial work is in shaping the career, conduct and discipline of students both in their academic as well as extra-academic fields, it warrants a lot of personal contact with students—both inside and outside their class rooms. Besides, the department has been looking after the following specific work related to students' activities:

(a) *Students' Discipline* : In a residential Institution like the Bengal Engineering College, students' discipline is naturally a matter of vital importance. Apart from drawing particular attention of students to the Standing Orders and Rules of the College, efforts are made to see its actual implementation. For follow up measures as and when necessary there is a Discipline Committee set up by the College Council consisting of Proctor, two members of the teaching staff and two students' union representatives. Students' participation in the Discipline

Committee has been a recent feature and it is observed that such involvement of students in matters of discipline usually yields the desired result.

(b) *Class Attendance* : In a professional institution such as the Bengal Engineering College, regularity in class attendance is a matter of major importance particularly in view of the internal assessment system that has recently been introduced. Attention to students having irregular attendance is drawn at regular intervals on receipt of the monthly attendance reports from the respective departments.

(c) *Hostels and Messes* : The under-graduate course of the College is fully residential while it is optional for postgraduate students. There are 8 multiseated hostels (with a capacity of about 140) and 6 Single-seated hostels (capacity 100) out of which 1 single-seated hostel is meant for postgraduate students. Each hostel is under the direct supervision of a Superintendent from the members of the Teaching Staff. As the number of girl students is small, 6 B-Type Quarters are being used as Girls' Hostel under the supervision of a Matron and a Professor-in-Charge. Since the number is increasing, the proposal for construction of a new Ladies' Hostel is under active consideration. Each hostel is provided with a Common Room and a Reading Room. Hostel Messes are supervised by the respective Mess Committee consisting of student representatives under the guidance of the Hostel Superintendent who is also ex-officio Mess President. There is a Joint Mess Committee which is a common forum for all the hostel messes and which functions under a Chairman who is elected from amongst the Hostel Superintendents. Proctor acts as the Principal's nominee in the Joint Mess Committee.

(d) *Health Service* : The College has a hospital of 10 beds (which can be increased to 24 in emergency) with the following two resident Medical Officers and other supporting staff.

- (1) Dr. A. K. Dasgupta, *Medical Officer*,
- (2) Dr. B. Das, *Addl. Medical Officer*.

Besides, the hospital has an I.D. ward to effectively isolate students suffering from infectious diseases such as chicken pox, mumps etc., so that the diseases may not spread among other students. Arrangements for outdoor treatment are there in two shifts—morning and afternoon. Serious cases are generally transferred either to regular city hospitals or to Students Health Home, the college having Universal Membership for the latter.

(e) *Co-curricular activities*—

(i) *Departmental Societies* : The Co-curricular activities not only give adequate opportunity to the stu-

dents for recreation but also build up their cultural and scientific talent and other qualities during the most important formative periods of their lives. The quality of leadership, team work and spirit of social service run by Committees comprising student-representatives, elected by the students. The main activities of these societies are to arrange for technical film shows, specialised technical and semi-technical lectures, industrial visits, publications of technical magazines, model making etc.

(ii) *National Cadet Corps* : 1st Bengal Comp(T) Regiment has raised one unit of the Senior Corps under the overall charge of one Officer Commanding from the Regular Army and one N.C.C. Officer from the members of the Teaching Staff.

(iii) *B. E. College Athletic Club* : The College has an Athletic Club and has got facilities for almost all the outdoor and indoor games, such as Athletics, Badminton, Basket ball, Cricket, Football, Hockey, Swimming, Table Tennis, Volleyball etc. The Proctor of the College is the ex-officio President of the Athletic Club and the Athletic Club Committee consists of one Professor-in-Charge and one Captain for each section, the General Secretary, teachers in Physical Education and Student Representatives from Hostels and different class-years. The President is assisted by the following 11 full-time teachers in Physical Education.

1. Shri Debes Chandra Sarkar, M.A., Dip. in Phy. Edn., orientation in National Discipline Corps. Physical Instructor Organiser.

2. Shri Santi Ranjan Santra, M.A., B.Ed., Dip. in Phy. Edn., Physical Instructor.

3. Shri Bibekananda Maiti, M.A., Dip. in Phy. Edn., Physical Instructor.

4. Shri Arun Kumar Mandal, B.A., Dip. in Phy. Edn., Physical Instructor.

5. Shri Sukhendu Bikas Chowdhury, B.A., Dip. in Phy. Edn., N.I.S. Dip. in Coaching (Basketball), Physical Instructor.

6. Shri Amitabha Nath, M.A., Dip. in Phy. Edn., Physical Instructor.

7. Shri Swapan Kr. Basu, B.Sc., Dip. in Phy. Edn., N.I.S. Orientation in Athletics, Physical Instructor.

8. Shri Nirmal Kr. Giri, B.A., Dip. in Phy. Edn., Physical Instructor.

9. Shri Dilip Kr. Chowdhury, B.A., Dip. in Phy. Edn., Physical Instructor.

10. Smt. Sumita Banerjee, B.Sc., Dip. in Phy. Edn., Physical Instructress.

11. Shri Tarun Bera, B. Com., Dip. in Phy. Edn., N.I.S. Dip. in Coaching (Volleyball), Physical Instructor.

The College has adequate provision of ground for major games such as Cricket, Football, Hockey etc. in the spacious grounds, the 'Lords' and the 'Oval'. There are a number of Tennis Courts, Volleyball Courts and an Indoor Badminton Court. The College has its own Swimming Pool, a well-equipped Gymnasium and a Boxing Ring.

For maintenance of the facilities of games and sports at Bengal Engg. College under galloping rise in prices of sports goods and materials, an athletic grant at the rate of Re. 1/- per student per month was first sanctioned by the Govt. under G.O. No. 5568-Edn. dated 28.5.1957 which was subsequently enhanced to Rs. 2/- per student per month under G.O. No 1366 Edn. dated 28.10.1975.

Besides the work referred to above, the existing load of daily work of the Proctorial Dept. includes issuing of various types of certificates, issuing of Rly. concession and sending monthly statement thereof to Rly. authority, handling of matters relating to students' extra-curricular activities (debating, elocution test, cultural competitions etc.) correspondence regarding absence/missing of students from hostels, correspondence with guardians regarding various matters of the students, dealing with leave applications of students and other miscellaneous matters.

DEPARTMENT OF TRAINING AND PLACEMENT

FACULTY MEMBERS

1. Dr. S. K. Biswas, B.E., C. ENG., MSc., Ph.D. (Eng), D.I.C. (Lond), D.Phil. (Praha), F.I. NUC. E. (London), A. Inst. F. (Lond), A.M.I.E.S. (Glass), V.D.I. (Germany) M.I.E. (Member, New York Academy of Sciences, U.S.A). Professor and Head of Department.

2. Shri D. K. Manna, B.Sc. (Eng), A.M.I.E. Assistant Training Officer.

THE COLLEGE AND INDUSTRY

The relations of the Bengal Engineering College with industry have always been close. It was due to the fact that various industries and numbers of professional bodies have been represented in the College Governing Body. Besides this, the College is represented to the various industries in India through the Professor of Training who maintains constant liaison between the industries and the College. In

this way a close link with industry was forged at the outset, and developments over the years have made it stronger than ever. There are also industrial representatives on the Special Committees which advise the Governing Body from time to time on particular aspects of its advanced technological work.

Industry gives generous support to the College in a wide variety of ways, to foster the growth of advanced courses and research for industrial innovation. In addition, the College is engaged in important research contracts with industrial organisations and Government departments. Members of the teaching staff are encouraged to maintain their contacts with industry and with the professional and learned societies and the function of the Department of Training is to maintain continuous liaison between the College and the industry to explore scope for such consultancy service for the member of teaching staff of the College so that interaction between the academic institution like this College and industry is maintained for getting advantage of the technical development taking place in the world of industry.

BRIEF HISTORY OF THE DEPARTMENT OF TRAINING

Department of Training is under the Professor of Training who is assisted by an Assistant Training Officer, one stenographer, a clerk and one class IV staff. This department was started in the year of 1948 with the object of securing training places for suitable industrial training for the students, to plan in consultation with the participating industries, the training programmes, to supervise the work and progress of the students during the training period, to establish liaison with the industries and finally to help the students to get suitable placements in the industry after they graduate. The objective with which the department was started was laudable and the Training Department worked quite satisfactorily during the decade of its existence.

TRAINING SCOPES

The importance of industrial training of short duration, educational tours, camps and field trips for engineering students can hardly be over emphasised. The basic workshop training which is arranged in the College Workshops is limited in scope and is supplemented by short term industrial training during the vacations for proper orientation and industrial exposure. Such training is arranged for all students at least twice during the entire course of study and is never less than four weeks at a time. The arrangements for short term training during the summer vacation are being made through the Department of Training for a large number of students, especially for those who express their desire to avail of such facilities. With a view to streamlining the vocational training as well as to plan train-

ing programme in industries, the Department of Training of the College take responsibility for provision of facilities for industrial training especially to pre-Final and Final Year students and to ensure that training is properly organised, inspected and evaluated in co-operation with the Training Officers of the industries. In order to make such training effective and worth-while for the students, the training is now being made more or less compulsory for the pre-Final and Final Year students. In addition to this, Department of Training provides opportunity to regular staff and students for industrial tour with the object of giving them overall impression about the working of factories, construction sites and operation of plants so that the students and relevance between their studies and the practical mode of working in the world of industry.

Opportunities to the teachers and staff are also provided for industrial training during the College recesses under the "Quality Improvement Programme". This is essential because of the tremendous advances made during the last couple of decades in the field of science and technology where teachers can take advantage of keeping themselves abreast of the latest development in the industry so that they can better equipped themselves with advanced knowledge which can be conveyed to the students for bridging the gap between the theory and practice.

The Department of Training also provides facilities to the Final Year students for taking up project work of practical nature for their final year curriculum requirement in the industry. This gives them an unique opportunity to involve themselves in industrial problems. By doing so, students get themselves acquainted with the nature of the problem and working of the industry as such, and prepare themselves in advance for meeting the requisite qualifications and experience required for prospective opening in the industry.

EMPLOYMENT OPPORTUNITIES

Education being the principal tool for development of human resources has a direct contribution towards achievement of economic goals and aspirations of the country. This is more so in the field of technical education, since the major emphasis in this area is equipping the manpower with requisite skills with the object of maximising man's contribution to the production of goods and services the community needs. The technique and process of production of goods and services do not make demand only on technical skills, but on a cluster or conglomerate of skills—a significant parts of which is related to the total humanistic growth of the man. Such conglomerate of skills—technical and humanistic—cannot obviously be acquired through pure academic learning of concepts in formalised and institutional

courses in isolation of actual work situation. It, therefore, naturally follows that no technical education will be complete till it has two complements, one learning of concepts vis-a-vis acquiring conceptual skills and the other application of the concepts in real work situation vis-a-vis acquiring manipulative or practising skills. Again, since application concepts, can only be learnt in actual work situations as these exist in industry and business, where goods and services are being produced, technical education needs to have a complement of learning of the technique of applying the concepts within the industry and business, through formalised programmes of apprenticeship training.

In order to activate the training schemes of the Graduate Engineers as well as to provide opportunities for employment in the public and private sector undertakings, Government of India, took appropriate steps to amend the Apprenticeship Act of 1961 and, the new Act of Apprentices enforced in 1973 to organise facilities on a nationwide scale to provide equal opportunities to Graduate Engineers coming out of the various technical colleges in India. This action is also a part of the Prime Minister's 20-point programme and accordingly, the Board of Practical Training of the various regions of the country have been activated to fulfil the above commitments. The Board of Practical Training, Eastern Region, took up this challenging task to provide equal opportunities to Graduate Engineers in industries located in the eastern region for fruitful training and employment.

The Board of Practical Training, Eastern Region, is therefore, responsible for providing scopes for training of the Graduate Engineers coming out of the Degree Engineering Colleges/Institutes for training and employment. Besides this, there are some opportunities for Graduate Engineers to be absorbed by the private undertakings in their own training scheme, which normally last for two years (one year devoted towards fulfilling the amended Act of 1973 of the Government of India). In this particular kind of training, a Graduate Engineer after having successfully completed two years of training with credit, is then absorbed in the executive cadre. The opportunities for such openings are good provided the Graduate Engineers meet the requisite qualifications of the individual companies. The Department of Training normally keeps track with this type of openings in industry and according to the requirements of the individual industry, sponsors Graduate Engineers from this College.

As far as this College is concerned, Graduate Apprenticeship training is offered to several branches of Engineering, viz., Civil Engineering, Mechanical Engineering, Electrical Engineering, Electronics and Telecommunication Engineering, Metallurgical

Engineering, Mining Engineering and Architectural Engineering. In regard to Electrical Engineering although some facilities will be available in the industries located in Eastern Region (principally in maintenance) the major bulk of opportunities will be in electric supply undertakings, viz., State Electricity Board, Damodar Valley Corporation, Calcutta Electric Supply Corporation Ltd. and a few undertakings in private sector. In Civil Engineering field the largest opportunities will be in the Engineering departments of State and Central Governments, and a few in consultant and construction firms in private sector. Likewise, the growth of Electronics industries being poor in Eastern Region, the Graduate Apprenticeship facility in Electronics is rather limited and endeavour was made by the department to mobilise Graduate Engineers to Bangalore, Bombay and Faridabad for better prospects and opening for training and employment. In this sphere, the Department of Training assists the students to get themselves settled in the various Electronics industries in the country. As regards opportunities for Graduate Metallurgical Engineers the scope for training and employment is not bad in the Eastern Region. Although most of the Metallurgical industries are under the Government of India undertakings and as such, the Graduate of this discipline needs to be moved out of West Bengal to the other States for better and prospective openings. The Department of Training comes into action in such cases of mobilisation of the Graduate Metallurgical Engineers to the industries located outside the State. The Department of Training, therefore, keeps constant touch with the Metallurgical industries for training and recruitment.

In the public sector undertakings a Graduate Engineer is likely to get a stipend of Rs. 280 per month as per the Apprentices Amendment Act, 1973, during the period of their training in the industry; yet a number of establishment offers stipend much more than the minimum specified mentioned above. The higher rate of stipend has been offered by the establishment with a number of stipulations, the first stipulation being that since the establishment is free to have apprentices according to its own choice, it expects that higher rate of stipend will attract bright Graduates. The second stipulation is that after attracting brighter graduates, the establishment will observe performance of the apprentices over a period of 12 months and may decide, if need be, to retain a few of the apprentices after 12 months on the organisations's own terms either for further apprenticeship or for direct employment. It is to be noted in this context that the employer will not under the contract of apprenticeship stipulate eventual employment, but if he ever wishes to do so will do it in a subsequent communication. It is to be noted further that selection of apprentices is left entirely with the concerned establishments, it will be very much competitive, and the establishments

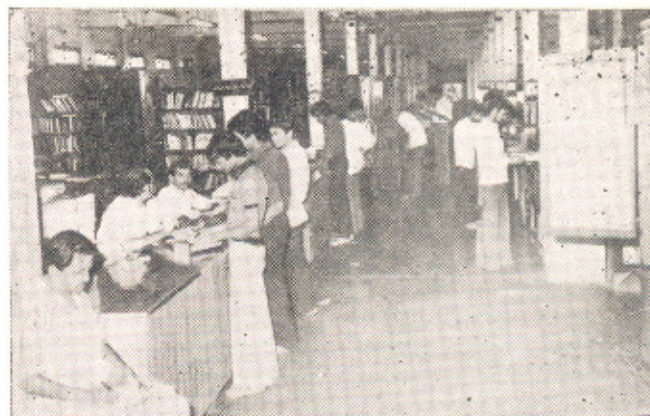

may invite applications from Graduates of other Regions for ensuring selection of bright apprentices. The fresh Graduates of the Eastern Region should therefore, be prepared to compete with youngmen from the other Regions.

Thus for pursuing all these activities, the Department of Training of this College maintained active liaison between the industries of public and private sector undertakings, Board of Practical Training, Eastern Region, as well as with other industry located in the country and the Colleges. This department continuously explores opportunities for Graduate Engineers in various categories of industries located not only in the Eastern Region but also in the other Regions of the country for providing scopes and openings for Graduate Engineers. Besides these, the department also assists in career guidance, self employment schemes, in decision making, as well as to guide the students in Project Work in the industry and to maintain continuous liaison with the industry in the various sectors.

LIBRARY

The Bengal Engineering College Library is as old as its mother Institution and as such it has the distinction of being one of the most important technical Library in the Country. It has a valuable collection of rare books and journals unmatched by any other Technical Library in the country.

The Library has now a total floor space of 20,000 sq. ft. which will be almost doubled very soon and work in this direction is in progress. The present collection of books and journals now exceeds 1,00,000 copies. There is a full fledged journal section in the western part of the library providing ample scope for serious study and reference work. The library with its limited financial resources subscribes to over two hundred titles of scientific journals mostly foreign and has now an acquisition of 25,000 bound volumes. The book section of the library has a collection of 81,000 books on engineering, technology, science, humanities and reference materials. The College being a residential one, its students, members of the teaching staff, research scholars as also others make a fruitful use of the library and the library is busy serving them from 9 A.M. to 6 P.M. The daily circulation of books and other materials is now about 600 on an average. The use of the library by its readers is increasing day by day as more and more books suitable for both undergraduate and post-graduate study, are being added to the stock of the Library every year. It has to be mentioned in this connection that the Review Committee set up by the Govt. of West Bengal in 1972, gave a serious consideration to the problems of the Library and recommended several development schemes for the Library to be implemented in phases.

The Library has been able to purchase books, back vols. of journals and furniture and equipment. A Xerox photo copier (Panaprint) was purchased during the financial year 1978-79. As there was a great demand for Xeroxing services in the College, a sophisticated Xeroxing machine, UBIX-1500, was purchased in November, 1980.

Lastly, the library is proud to declare that, a Text Book Library for the Undergraduate Students was opened in the Library on 26.8.81. Thus a long standing demand of the student was fulfilled at last. It is sincerely hoped that in the near future every student would get a least five text books from the Text Book Library for pursuing their studies in their respective branches of Engineering.

WORKSHOPS

The College has extensive workshop facilities consisting of nine different workshops, viz., (i) automobile shop, (ii) carpentry shop, (iii) fitting shop, (iv) foundry and pattern making shop, (v) machine shop, (vi) smithy, welding and paint shop, (vii) electric shop, (viii) boiler house and engine testing shop. In addition, there is a special workshop known as development shop which is, in fact, a part of the machine shop.

The workshop is under the charge of the Superintendent of Workshop who works directly under the Principal. Theoretical and practical instructions in

various workshop techniques and processes given to the students form a part of the duty of the Superintendent of Workshops. The Mechanical Engineering Department which teaches the subjects of workshop technology, tool engineering, production engineering, etc., under mechanical engineering curriculum has no control over the practical training or instruction in workshop practice.

The College workshops and laboratory buildings housing heat engines (steam) laboratory, machine shop, fitting shop, automobile shop, electrical workshop, and small printing section has a total area of 38,000 sq. ft. In addition, it has two separate sheds for (a) carpentry and (b) smithy, welding and tin smithy having a total area of 13,600 sq. ft. Two new blocks having a total floor area of 9,600 sq. ft. have been added recently to house the (c) foundry and (d) pattern making sections. Total floor area of the four workshop sheds mentioned above is 23,200 sq. ft.

STUDENTS' UNION

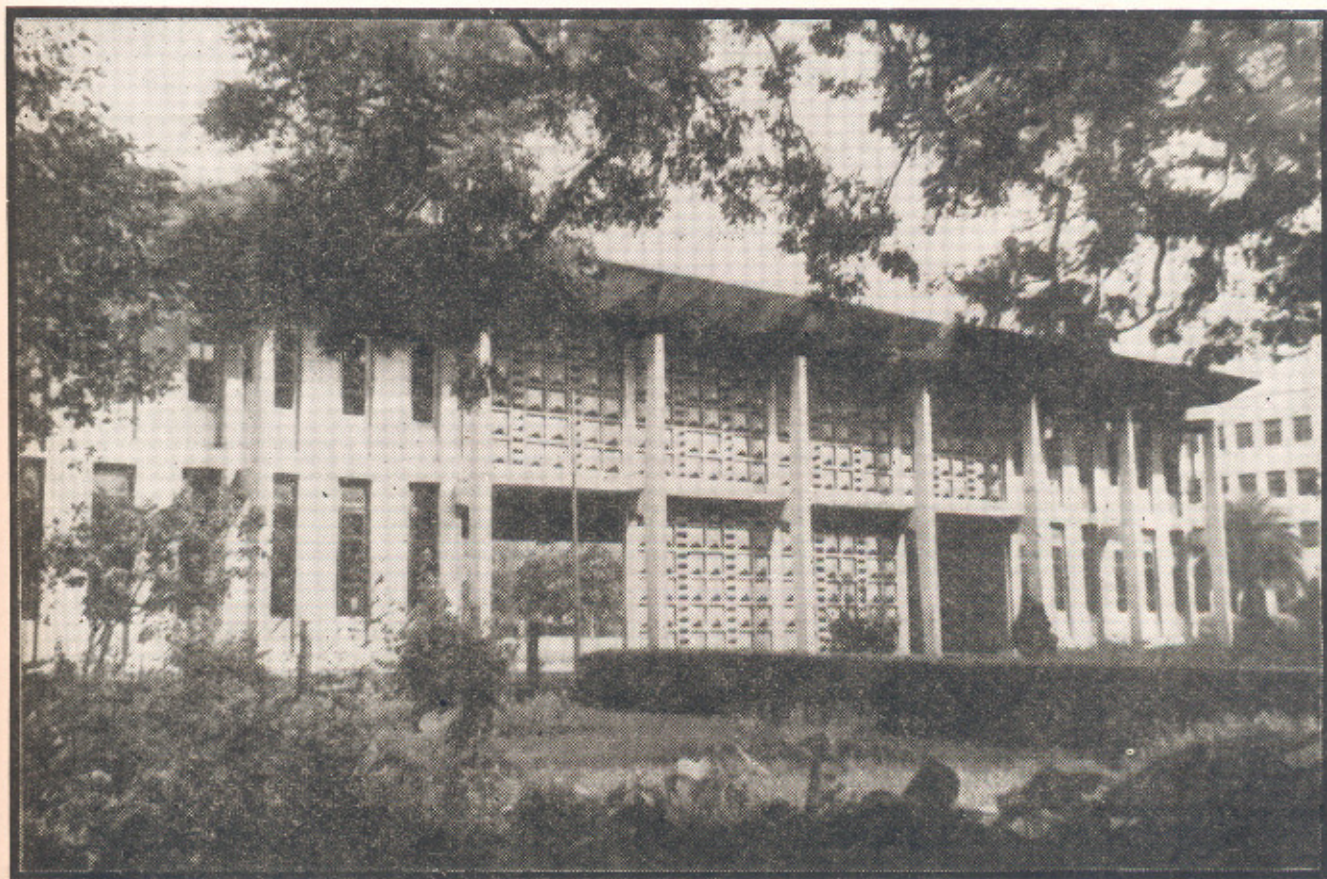

On the auspicious occasion of the 125th Anniversary of our glorious alma-mater let us take a look into the past of the students organisation. Though this College started functioning in 1856 no organised students' forum could be introduced before 1932

excepting a few clubs set up by the students of Civil or Mechanical Engineering Department.

Only one club served the students of the entire College at that time. This club held social and cultural programmes only. It had a library of simple fiction. There was also a social service league, the main function of which was to teach the interested poor boys at night. A debating society was also established. The engineers club was first situated at the old hospital (now demolished) then shifted to Slater House.

The first forum named Bengal Engineering College Students Institute was formed in 1932 with Shri Amulyadhan Deb as its founder Secretary which tried earnestly to put an end to the rancour prevailing among different clubs introduced by different streams. And surely Mr. A. Macdonald, the then Principal, was the protagonist in this regard. A constitution was framed and passed with amendments in the general meeting and finally approved by the Principal. Membership of the Institute was compulsory to the students and optional to the members of the staff and ex-students.

The Civil Engineering students used to publish the 'Engineers' Annual' on the occasion of their Reunion. The Mechanical students started the B.E.

College Annual in 1931 on the occasion of their Re-union (first Editor-Kabiruddin Ahmmad). The Civil Engineering students objected to the use of this name and boycotted the Re-union in 1931. But the publication continued till BECA was jointly published by both streams.

The necessity for a Students Union in this College was first felt in 1940 and several movements were launched in this respect. The desire came to a reality in July 1956. We proudly remember Shri Benoy Majumdar and Shri Arun Kr. Majumdar who were the President and the General Secretary of the first elected Union respectively. In this connection the introduction of the first Constitution of Bengal Engineering College Students' Union (B.E.C.S.U.) may be quoted :

"It is most gratifying for me to inform the students of this college that our long-cherished hope of establishing a Students' Union is going to take a concrete shape very soon. At long last, the Students Institute and the college authority have arrived at an agreement about the starting of the Students' Union from the coming academic session. The nature and composition of the organisation have been ascertained and a constitution of the organisation has also been framed.

"In order to prepare a draft constitution of the Students' Union, a Committee was formed in the month of September, 1955 with representatives from both the students and the staff. The following were the members of the Committee :

"Nominated by the Principal to represent the College staff"

- (1) Prof. K. C. Roy,
- (2) Dr. P. N. Chatterjee,

Selected by the Institute Committee to represent the students

- (3) Shri Sunandan Bose, President, B.E.C.S.I.
- (4) Shri Sukhen Chatterjee, Genl. Secretary, B.E.C.S.I.
- (5) Shri Amitava Ghosal, Treasure, B.E.C.S.I.
- (6) Shri Somesh Mukherjee,
- (7) Shri Benoy Mazumdar,
- (8) Shri Benoy Saha.

"On the basis of the draft that was prepared in 1953 by a similar committee, this Committee prepared a constitution in the month of February, 1956. A number of modifications had to be made to the aforesaid draft regarding the formation of the Executive Committee, the process of working, etc. Finally it was placed before the Principal of this College for the final approval on behalf of the College

authority. The Principal approved of the general content of the draft and suggested a few minor modifications. These were again considered by the Committee and necessary amendment were again made. The final draft prepared in this way got the approval of all the members of the Constitution Committee as well as the approval of the Principal. A few copies were then put up on the hostel notice boards and suggestions for modification were invited in writing from the students. As no modification was proposed by any student, it was 'ipso-facto' accepted that the draft got the approval of the students in general.

"We have tried our utmost to make the clauses simple, unambiguous, practicable and democratic. The interest of the students have been carefully looked upon and the affairs of the students have been left to the students themselves as far as possible. All along our objective was to see that the students themselves would take care of their social, cultural and academic well-being, with the minimum amount of external restrictions and limitations.

"Our years-old aspiration for a Students' Union in this college is now going to be fulfilled and I fervently hope, this Students' Union will be able to cater the needs and wants of the students of this college in a more extensive and effective manner."

A brief enumeration of the B.E.C.S.U. since its founding is given below.

In connection with the cultural programme it can be mentioned that, Barsa Baran, Sesh Barishan, Kavi-Sammelans, Debate competitions etc. have been organised regularly on several occasion by the BECSU. Apart from that Annual Re-Union is a regular feature when the present and ex-students assemble to exchange their hearts. Other than cultural activities the BECSU has been involved with the social services since its inception. Night schools are run by the students, school building constructed by the students. These activities have been so noteworthy that they are mentioned in the College Annual Report regularly. Students service in the relief work of flood victims of Howrah in 1958 should also be remembered in this respect.

In 1967 the Students Union launched their movement on some basic genuine grievances of the students. In 1970 joint movement of students, members of the staff and non-teaching employees of the college was launched with their 44-point charter of demands. Next between the years 1970 to 1972 a new breed of political instability ushered in an era which saw a complete disruption of academic courses. The College had to be closed many time in this period. Among others, a popular student Ashim

Ganguli was murdered while resisting this hooliganism.

The Executive Committees of BECSU formed all along by free and fair elections held under peaceful circumstances, were totally jeopardized because of the political situation in West Bengal at that time. Elections were next held only in April 1975 which was rather an apology for the democratic procedure. The otherwise serene academic atmosphere of the college was torn asunder. Cases of terrorisation, beating up of students became frequent. It was not unusual for inviting some outsiders to come and create trouble within the campus. A few so-called students (i.e. dynamic leadership of BECSU) controlled the campus and held convulsion over the situation. Boys were taken out from examination halls and beaten up in the face of complete indifference of the authorities.

With the stabilisation of the political situation in West Bengal after 1977, the campus scene turned towards the better. The normal academic atmosphere gradually returned. Student Union election were duly held again in 1977. Two students representations on the College Council were sanctioned. President and General Secretary of the Students' Union became the permanent members of the Principal's Advisory Body, i.e. the College Council.

During the same year BECAFEST (B.E. College Autumn Festival, an Inter-college cultural festival) was held with a great success. Now it is an Annual Programme of the College. Cultural activities of the college started with a great zeal. Debate competition, Drama, Extempore Speech Competitions, Recitations, Quiz, etc. were revived in full swing. It is well known that the cultural sphere of the college faced several constraints during the first part of the last decade.

In the same year the Institute Hall was renovated and a Students' Union Library was started.

The Mess employees of the hostels went on a prolonged strike in 1978 to press some of their demands. At the intervention of BECSU their demands were recognised. The same year saw the devastating floods in West Bengal. The area adjoining the college was submerged in water. The students of the collage played a glorious role in the work of relief and rescue in the area. The work was hard and demanding—but every student responded with zeal.

The year 1979 saw the amendment of the Students' Union Constitution to make it more democratic and broad based. President B.E.C.S.U.

became a permanent member of the Governing Body of the College. Students representative on the Governing Body of an educational institution was a long cherished demand to the students of India. And this historic event took shape in our alma-mater.

B.E.C.S.U. is still working for the students; it works hard to maintain the academic life normal; it is playing a great role to maintain democracy in the College campus. The most eventful contribution made by the B.E.C.S.U. during the last two years is the introduction of an updated syllabus in the undergraduate courses. This syllabus was framed by the students. Fortunately several educationists, teachers and administrators had approved of it and this syllabus was introduced.

The Text Book Library started functioning at the initiative of B.E.C.S.U. The generator was also installed due to Students pressure.

Govt. of West Bengal has already sanctioned a grant for the field trips and educational tours for the students of B.E. College. It was a demand of B.E.C.S.U. for a long time and now it has materialised by the persuasion of B.E.C.S.U.

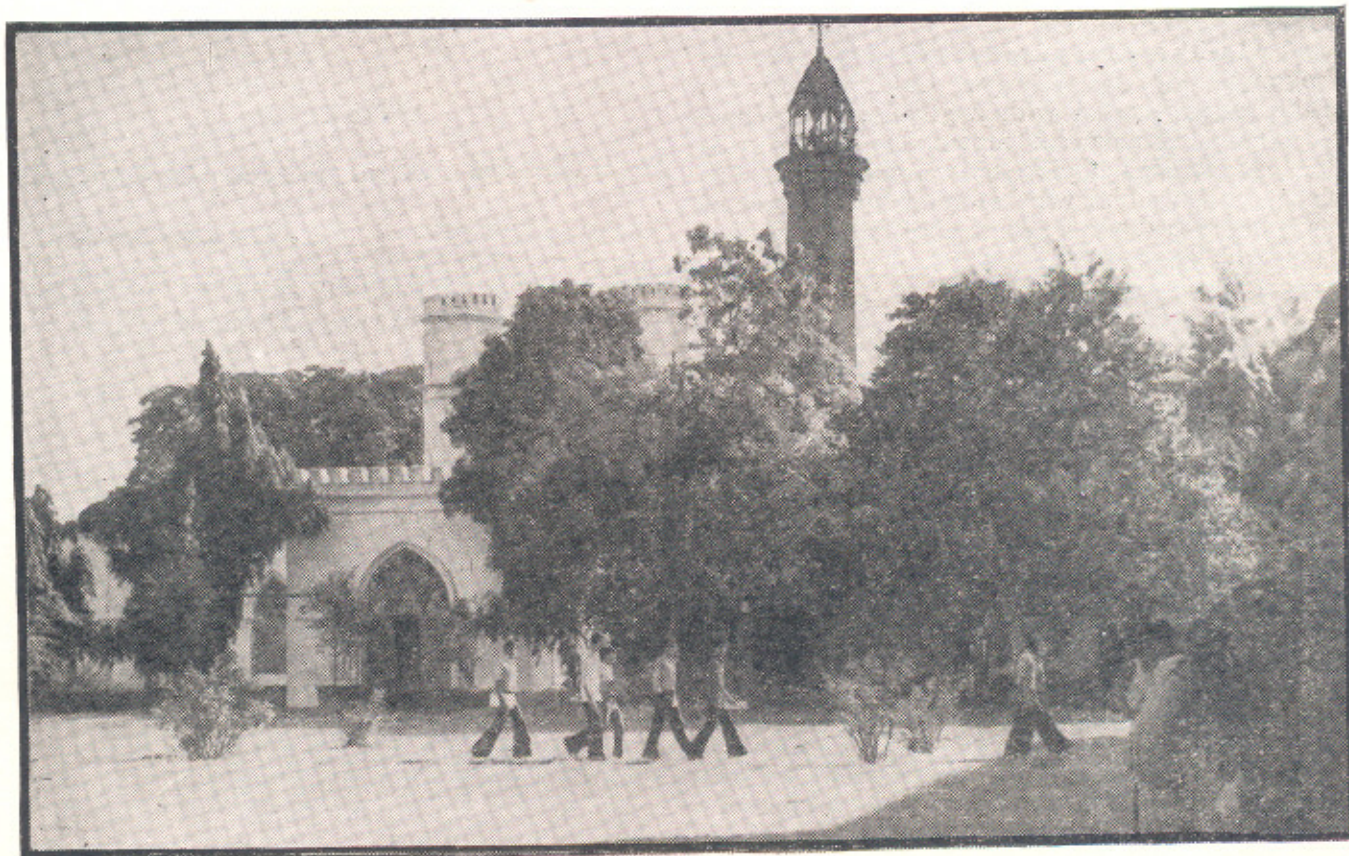

At the end of this report it should be mentioned that B.E.C.S.U. is playing a great role in the 125th Anniversary Celebration of the College like all other developmental and day-to-day activities of the College.

ANNEXURE

President and General Secretary of B.E.C.S.U.

YEARS	PRESIDENTS	GENL. SECRETARIES
1956-57	Binoy Majumdar	Arun Kr. Majumdar
1957-58	Pulin Kr. Bhattacharya	Debnarayan Indu
1958-59	Rupendra Kr. Biswas	Mukul Ray
1959-60	Durga Basu	Sisir Mukherjee
1960-61	Election was not held	
1961-62	Mondip Chatterjee	Ashoke Basak
1962-63	Ashoke Kr. Gupta	Pradip Kr. Sandell
1963-64	Pradip Kr. Sandell	Udayan Ghosh
1964-65	Santanu Chatterjee	Tathagata Ray
1965-66	Siten Sikdar	Sankar Halder

YEARS	PRESIDENTS	GENL. SECRETARIES	YEARS	PRESIDENTS	GENL. SECRETARIES
1966-67	Twisampati Dutta	Shyamal Kanungoe	1974-75	Amit Samanta	Manik Basak
1967-68	Amitava Ghosh	Rabindranath Halder	1975-76	Election was not held	
1968-69	Jayanta Pradhan	Amitava Chakraborty	1976-77	Sudip Ray	Amitabha Ray
1969-70	Swapan Choudhuri	Prasanta Ghosh	1977-78	Subhajyoti Chatterjee	Abhijit Datta
1970-71	Sreekumar Mukherjee	Bikash Bhattacharjee	1978-79	Amitabha Ray (Member Governing Body)	Amit Ray
1971-72	Siladitya Ray	Dhrubojyoti Biswas	1979-80	Anjan Mukherjee (Member Governing Body)	Gautam Ray
1972-73	Election was not held		1980-81	Gautam Ray (Member Governing Body)	Indranath Sinha
1973-74	Election was not held				

Governing body

BOARD OF VISITORS

1892

Ex-Officio

1. Secretary to the Govt. of Bengal, Public Works Department.
2. Director of Public Instruction, Bengal.
3. Joint-Secretary, Govt. of Bengal, Public Works department.
4. Civil Surgeon, Howrah.
5. Inspector of Schools, Presidency Circle.
6. Principal, Civil Engineering College, Sibpur.
7. Executive Engineer, Calcutta Workshops Division.
8. Magistrate of Howrah.
9. Superintendent of Works, Calcutta.

Ordinary Members

10. Babu Kunja Lal Banerjee.
11. W. H. Ryland, Esq.
12. Babu Bhudev Mukherjee.
13. Mahamahopadhyaya Mahes Chandra Nyaratna, C.I.E.
14. The Lord Bishop of Calcutta.
15. Maharajah Sir Jetendra Mohan Tagore, K.C.S.I.
16. Brigade Surgeon G. King.
17. F. J. E. Spring, Esq.

1893

Ex-officio

1. Secretary to the Government of Bengal, Public Works Department.
2. Director of Public Instruction, Bengal.
3. Joint-Secretary, Government of Bengal, Public Works Department.
4. Civil Surgeon, Howrah.
5. Inspector of Schools, Presidency Circle.
6. Principal, Civil Engineering College, Sibpur.
7. Executive Engineer, Calcutta Workshops Division.
8. Magistrate of Howrah.
9. Superintendent of Works, Calcutta.

Ordinary Members

10. Babu Kunja Lal Banerjee.
11. W. H. Ryland, Esq.
12. Babu Bhudev Mukherjee.
13. Mahamahopadhyaya Mahes Chandra Nyaratna.
14. The Lord Bishop of Calcutta.
15. Maharajah Sir Jetendra Mohan Tagore.
16. Brigade Surgeon G. King.
17. F. J. E. Spring, Esq.

1894

Ex-officio

1. Secretary to the Government of Bengal, Public Works Department.
2. Director of Public Instruction, Bengal.
3. Joint-Secretary to the Govt. of Bengal, Public Works Department.
4. Civil Surgeon, Howrah.
5. Inspector of Schools, Presidency Circle.
6. Principal, Civil Engineering College, Sibpur.
7. Executive Engineer, Calcutta Workshops Division.
8. Magistrate of Howrah.
9. Superintendent of Works, Calcutta.

Ordinary Members

10. W. H. Ryland, Esq.
11. Babu Bhudev Mukherjee.
12. Mahamahopadhyaya Mahes Chandra Nyaratna.
13. The Lord Bishop of Calcutta.

14. Maharajah Sir Jetendra Mohan Tagore Bahadur.
15. Brigade-Surgeon G. King.
16. F. J. E. Spring, Esq.

1895

Ex-officio

1. Secretary to the Govt. of Bengal, Public Works Department.
2. Director of Public Instruction, Bengal.
3. Joint Secretary to the Govt. of Bengal, Public Works Deptt.
4. Civil Surgeon, Howrah.
5. Inspector of Schools, Presidency Circle.
6. Principal, Civil Engineering College, Sibpur.
7. Executive Engineer, Calcutta Workshops Division.
8. Magistrate, of Howrah.
9. Superintendent of Works, Calcutta.

Ordinary Members

10. W. H. Ryland, Esq.
11. Mahamahopadhyaya Mahes Chandra Nyaratna.
12. The Lord Bishop of Calcutta.
13. Maharajah Sir Jetendra Mohan Tagore Bahadur.
14. Brigade Surgeon G. King.
15. F. J. E. Spring, Esq.

1896

Ex-officio

1. Secretary to the Government of Bengal, Public Works Department.
2. Director of Public Instruction, Bengal.
3. Secretary to the Govt. of Bengal, Irrigation & Marine Department.
4. Civil Surgeon, Howrah.
5. Inspector of Schools, Presidency Circle.
6. Principal, Civil Engineering College, Sibpur.
7. Executive Engineer, Calcutta Workshops Division.
8. Magistrate of Howrah.
9. Superintendent of Works, Calcutta.

Ordinary Members

10. W. H. Ryland, Esq.
11. Mahamahopadhyaya Mahes Chandra Nyaratna.
12. The Lord Bishop of Calcutta.
13. Maharajah Sir Jetendra Mohan Tagore Bahadur.
14. Brigade-Surgeon G. King.
15. F. J. E. Spring, Esq.
16. A. Macdonell, Esq., Secretary.

1897

Ex-officio

1. Secretary to the Govt. of Bengal, Public Works Department.
2. Director of Public Instruction, Bengal.
3. Secretary to the Government of Bengal, Irrigation & Marine Department.
4. Civil Surgeon, Howrah.
5. Inspector of Schools, Presidency Circle.
6. Principal, Civil Engineering College, Sibpur.
7. Executive Engineer, Calcutta Workshops Division.
8. Magistrate of Howrah.
9. Superintendent of Works, Calcutta.

Ordinary Members

10. W. H. Ryland, Esq.
11. Mahamahopadhyaya Mahes Chandra Nyaratna.
12. The Lord Bishop of Calcutta.
13. Maharajah Sir Jetendra Mohan Tagore Bahadur.
14. Brigade Surgeon G. King.

15. F. J. E. Spring, Esq.
16. A. Macdonell, Esq., Secretary.

1898

Ex-officio

1. Secretary to the Government of Bengal, Public Works Department.
2. Director of Public Instruction, Bengal.
3. Secretary to the Govt. of Bengal, Irrigation & Marine Department.
4. Civil Surgeon, Howrah.
5. Inspector of Schools, Presidency Circle.
6. Principal, Civil Engineering College, Sibpur.
7. Magistrate of Howrah.

Ordinary Members

8. Mahamahopadhyaya Mahes Chandra Nyaratna.
9. The Lord Bishop of Calcutta.
10. Maharajah Sir Jetendra Mohan Tagore Bahadur.
11. Brigade Surgeon Sir G. King.
12. F. J. E. Spring, Esq.
13. A. Macdonell, Esq., Secretary.

1899

Ex-officio

1. Secretary to the Government of Bengal, Public Works Department.
2. Director of Public Instruction, Bengal.
3. Secretary to the Govt. of Bengal, Irrigation & Marine Departments.
4. Civil Surgeon, Howrah.
5. Inspector of Schools, Presidency Circle.
6. Principal, Civil Engineering College, Sibpur.
7. Magistrate of Howrah.

Ordinary Members

8. Director of Land Records and Agriculture.
9. Mahamahopadhyaya Mahes Chandra Nyaratna.
10. The Lord Bishop of Calcutta.
11. Maharajah Sir Jetendra Mohan Tagore Bahadur.
12. Major D. Prain.
13. F. J. E. Spring, Esq.
14. A. Macdonell, Esq., Secretary.
15. Rai Radhika Prasanna Mukherjee Bahadur.

1900

Ex-officio

1. Secretary to the Govt. of Bengal, Public Works Department.
2. Director of Public Instruction, Bengal.
3. Secretary to the Govt. of Bengal, Irrigation & Marine Department.
4. Civil Surgeon, Howrah.
5. Inspector of Schools, Presidency Circle.
6. Principal, Civil Engineering College, Sibpur.
7. Magistrate of Howrah.

Ordinary Members

8. Director of Land Records and Agriculture.
9. Mahamahopadhyaya Mahes Chandra Nyaratna.
10. The Lord Bishop of Calcutta.
11. Maharajah Sir Jetendra Mohan Tagore Bahadur.
12. Major D. Prain.
13. F. J. E. Spring, Esq.
14. A. Macdonell, Esq., Secretary.
15. Rai Radhika Prasanna Mukherjee Bahadur.

1901

Ex-officio

1. Director of Public Instruction, Bengal.
2. Secretary to the Govt. of Bengal, Public Works Department, Roads & Buildings Branch.
3. Secretary to the Govt. of Bengal, Public Works Department, Irrigation Branch.

4. Principal, Civil Engineering College.
5. Inspector of Schools, Presidency Circle.
6. Director of Land Records and Agriculture.
7. Magistrate of Howrah.
8. Civil Surgeon, Howrah.
9. The Lord Bishop of Calcutta.

Ordinary Members

10. Major D. Prain.
11. Maharajah Sir Jetendra Mohan Tagore Bahadur.
12. Mahamahopadhyaya Mahes Chandra Nyaratna.
13. F. J. E. Spring, Esq.
14. Rai Radhika Prasanna Mukerji Bahadur.
15. B. Heaton, Esq., Secretary.

1902

Ex-officio

20. Shri S. N. Chakraborti, Assistant Educational Adviser (Tech.) to the Government of India, Ministry of Education & Culture, Eastern Regional Office.
21. Dr. Dipten Das Gupta, Assistant Professor of Electrical Engineering, Bengal Engineering College (Elected Representative of the Teaching Staff of the College).
22. Shri P. K. Chatterjee, Laboratory Assistant, Department of Mechanical Engineering, Bengal Engineering College, Representative of the Teaching Staff of the College).
23. Shri N. C. Karmakar, Senior Clerk, Bengal Engineering College, (Elected Representative of the non-teaching staff of the College).
24. Shri Gautam Ray, 5th Year Electrical Engineering, *President, BECSU*
25. Dr. A. K. Seal, Principal, B. E. College, *(Member-Secretary)*

B E College Alumni Association

The B. E. College Alumni Congress, registered in 1947, under Indian Companies Act, could not function for several years during the decade 1970's. But the urge of the alumni to promote fellowship amongst ex-students, teachers and students and to provide suitable support towards improvement of the status of B. E. College never withered. And so under the stewardship of evergreen Shri B. K. Datta (1928), a meeting of the B. E. College ex-students was convened on May 13, 1978, at 1, British Indian Street (1st floor), Calcutta. This meeting, attended amongst others by Shri R. B. Chakravarty (President of the then defunct B. E. College Alumni Congress), unananimously decided to form an association in the name and style of "B. E. College Alumni Association".

A steering Committee was formed to give the shape of the Association and enroll members. The composition of the Steering Committee had been :

Shri B. K. Datta	— <i>Chairman</i>
Dr Sankar Sen	— <i>Vice Chairman</i>
Shri K. N. Majumdar	— <i>Convener</i>
Shri H. Nandy	— <i>Member</i>
Shri Bimalendu Dev	— <i>Member</i>
Shri S. K. Roy	— <i>Member</i>
Shri T. Roy	— <i>Member</i>
Shri B. N. Aich	— <i>Member</i>
Prof J. L. Chakravarti	— <i>Member</i>
Prof Bhupal Datta	— <i>Member</i>
Shri Rama Majumdar	— <i>Member</i>
Shri R. B. Chakraborty	as permanent invitee.

The Steering Committee started functioning right from its inception. Memorandum, Articles of Association, Regulations were formulated. Membership increased. Close liaison with College campus was established. The B. E. College Alumni Association was finally registered under West Bengal Societies Registration Act (XXVI of 1961), on November 7, 1978.

The 1st Executive Committee for the year 1978-79 was finalised with Shri B. K. Datta as President, Prof Dr Sankar Sen as Vice President and Shri K. N. Majumdar as Honorary Secretary, and all the members of the Steering Committee as Members.

During this short span of 3 years of its existence, the Alumni Association, obviously has not made a major dent

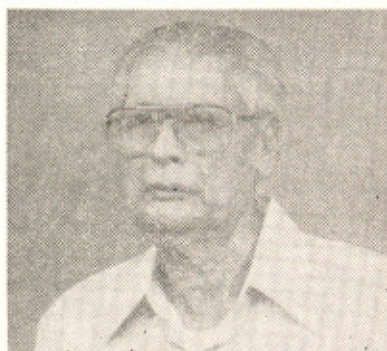

in organising the vast section of Alumni, spread all over the country and abroad, nor has it been able to establish regular contacts with alumni bodies/associations existing at different centres. But a short summary of the activities performed so far may be listed hereunder :

- (a) Immediately after its formation, a deputation led by its President, Shri B. K. Datta met Prof Sambhu Ghosh, Hon'ble Minister in-charge of Education, and discussed with him the situation prevailing in the College, including that of the large number of vacancies in the faculties. The assurance to look after the matter was given by the Minister and the process of recruitment followed. The permanent Principal of the College was also appointed soon after.
- (b) The Government of West Bengal recognised the Association and a representative of the Association was included in the reconstituted Governing Body of B. E. College with effect from October, 1978.
- (c) The Governing Body of the College formed an action Committee to chalk out plans for implementation of the Review Committee recommendations (1976). The Association representative was included in the 'Action Committee'.
- (d) In collaboration with B. E. College Engineering Teachers Association a Panel Discussion, on the topic "Autonomous Status of B. E. College" was organised, where reputed educationists in the field of engineering education participated.
- (e) The Association met Director, Board of Practical Training (Eastern Region) and not only impressed upon him the necessity for extending practical training facilities, but also organised a meeting at the College campus where the Director, Shri P. K. Mukherjee, delivered a talk on the avenues open to fresh graduates.
- (f) The Association contacted alumni bodies at Durgapur, Ranchi, Delhi, Chicago (USA), etc. and established liaison with them.
- (g) The new Bulletin "BECAA TIMES" has been published several issues.

- (h) The Association actively participated in the 1980 Reunion meet and is now involved fully on the occasion of the 125th Anniversary Celebrations.
- (i) The Association was actively associated with the Vijaya Sammelani Social get-together, 1979, at Salt Lake, Calcutta, organized by Sibpur Old Boys' Association.
- (j) The Association has established a close liaison with the Students of B. E. College and a Faculties Students Sub-Committee has been formed with members of the teaching Staff and Students representatives.

The Present Executive Committee of the Association is as follows :

Shri B. K. Datta	— <i>President</i>
Prof Dr Sankar Sen	— <i>Vice-President</i>
Shri K. N. Majumdar	— <i>Honorary Secretary</i>
Shri B. N. Aich	— <i>Member</i>
Shri H. Nandy	— "
Shri B. Dev	— "
Prof J. L. Chakravorti	— "
Shri T. K. Roy	— "
Shri R. K. Dasgupta	— "
Shri Yoganath Bhattacharya	— "
Shri Bibhas Ranjan Adhikary	— "
Shri Dheeman Chatterjee	— "

FROM THE PEN OF

SHRI BIRENDRA KANTA DUTT

PRESIDENT

B. E. COLLEGE ALUMNI ASSOCIATION

— A WORD FROM AN AGED ALUMNI

To most of the ex-students of B. E. College at present, I am "Birenda". Though I crave to hear it, there are not many still living to call me by my name, Biren. Reminiscing I find I have out lived many of the boys who had been by contemporary in college. By the grace of the Almighty God I am still active and have the privilege of participating in the 125th Anniversary Celebration of the College, now being held in a grand scale. Just a quarter of a century ago in 1956, I had also the opportunity of taking part in the Centenary Celebration. Yet another 25 years before that, in 1931, the Platinum Jubilee year of the College passed by, perhaps without any notice ; there had been no celebration of any kind held to commemorate the occasion. However, from the point of view of my career at best, I had been a qualified Civil Engineer with 3 years standing on that 75 years of standing of B. E. College itself. It is,

therefore, simply arithmetic in reckoning that I have obtained my B. E. degree in 1928 and hence my association with B. E. College spans over a period of 57 years counting from the year of my admission in 1924.

Probably the members of the B. E. College Alumni Association had been looking for a veteran to become the President of the new found body. The lot has fallen on me ; I have been in the saddle for 3 years. I am not sure how far I have been able to do justice to the honour and responsibility bestowed on me and to what extent I have been able to contribute my mite in meeting the aspirations of the alumni or in fulfilling the objectives of the Association. Anyway, I have tried, which is my solace.

I wish the 125th Anniversary Celebration of the B. E. College all success.
